### **Materials management**

G.K. Beckman-Love, L. Nieger, 2012-12-06 For decades the materials sector of an enterprise has been relatively unimportant compared with the production and sales side but it has gained in importance during the last 25 30 years This is clearly indicated by the increasing attachment of this sector to the commercial side of an enterprise the delegation of materials oriented tasks to highly qualified people and closely correlated the integration of the materials sector with the key positions of a company s organizational hierarchy The materials management area has become an interesting part of business life Stimulating this development was the realization that an important part of company rationalization had been overlooked namely provision of adequate supervision of the materials flow This area was given particular attention firstly because the relatively high percentage of materials losses the value of materials and cost of supervision in the total production costs offered the possibility of considerable cost reductions and liquidity improvements and secondly because effective supervision permits faster reactions to changes and reliable delivery times essential considerations for a competitive company An important contribution to the realization of these possibilities is found in an efficient organizational structure in combination with an integrated information system Together they provide coordinated supervision of the various control functions associated with the materials flow and a concentration of expertise
