Chaudhury, Vijay Chandru, Sharada Srinivasan, 2018-03-31 The book represents the culmination of a hugely successful heritage preservation project initiated by the Government of India s Department of Science and Technology It presents extensive research on the digital preservation of the history mythology art architecture and culture of the world heritage site Hampi in Karnataka the seat of the Vijayanagara dynasty in medieval India Further the book introduces readers to a range of

techniques developed by Indian technical research groups for digitally preserving both the tangible and intangible cultural heritage of the region. These techniques are sufficiently generic to be applied in heritage preservation efforts for other historical sites around the world as well. Technological advances have made it possible to not only create digital archives of these heritage artifacts but to also share these resources for people to view, explore, experience, and analyze. This book showcases how cutting edge technology can be combined with cultural and historical research to digitize and preserve heritage. It is the consolidation of work conducted under the Indian Digital Heritage project, a unique initiative of the Department of Science Technology DST Government of India. The project involved collaboration between researchers in the areas of Technology, Computer Science, Architecture, and the Humanities for the digital documentation and interpretation of India's tangible and intangible heritage. It highlights the art, architecture, and cultural legacy of the world heritage site of Hampi in Karnataka, the medieval capital of the 14th-16th century Vijayanagara dynasty. The contributors to this book are scientists and technology experts from prominent academic institutes in India, such as the IITs, Indian Institutes of Technology, NIIT, and NID, National Institute of Design, working in collaboration with some of India's top architects, art historians, anthropologists, heritage groups, and multi-disciplinary cultural institutions such as the National Institute of Advanced Studies, NIAS. Their papers will introduce readers to cutting edge technologies from research areas such as computer vision, 3D modeling, and artificial intelligence as they are employed to preserve art and culture in the digital domain. The book is divided into four parts. Part 1 details efforts and techniques for modeling and representing the tangible heritage of Hampi, such as the reconstruction of damaged structures, realistic walk-throughs, and haptic rendering. Part 2 includes chapters detailing the analysis and digital restoration of artifacts such as mural paintings, inscriptions, and sculptures, as well as mobile-based visual search for artifacts. Part 3 includes chapters on conjectural reconstructions of the architectural, life, social life, and traditions of Hampi. Lastly, Part 4 addresses the knowledge-based archiving and exploration of cultural heritage.

The Rock-cut Temples of Western India Dulari Qureshi, 2010. The present book entitled *Rock Cut Temples of Western India* is an exhaustive book that covers all the caves of Western India. The book is the need of the times as a more researched book. A more detailed book on Western Caves has not been published after James Burgess and James Fergusson. Modern viewpoints and deeper understanding of the caves was essential. The study required huge travel around the caves; it was difficult to access some caves. Since there are no facilities around, photography was extremely perplexing. However, the book was completed within a span of three and a half years. Focus of the book is on the evolution of the chaitya and the vihara caves, as well as a comprehensive documentation of all the caves. Each cave was carefully studied, and their architectural, cultural details were documented. A comparative study too has been included as similarities and dissimilarities establish a more authentic dating in case of absence of inscriptions. The book also throws light on many unidentified sculptures. The special contribution of the book is the inclusion of practically all caves, even some caves that were not included by James Burgess and

Fergusson like the unknown caves of Kol Yerphal Pohale Nadsur and Nenavali Some of these caves are simply in accessible Besides all the documentation the book has also taken special pains to assess and evaluate the present conditions of all these monuments as after a gap of many years many cave groups are in an extremely bad condition Those caves under ASI are in fairly good condition though of course caves like Ajanta where the painting despite commendable development and conservation work being done are in a bad condition due to climatic and other geographical and man made reasons In the study major scholars work has been referred to as their contribution is significant

Body, History, Myth Anna Lise Seastrand, 2024-07-16 The first major exploration of the mural tradition in early modern South India. An astonishing variety of murals greet visitors to the temples and palaces of southern India. Beautiful in execution and extensive in scope, murals painted on walls and ceilings adorn the most important spaces of early modern religious and political performance. Scene by scene, histories of holy sites, portraits that incorporate historical figures into mythic landscapes, and Tamil and Telugu inscriptions that evoke the imagined topographies of devotional poetry unfold before the mobile spectator. *Body History Myth* reconceives the relationship between art and devotion in South India by describing how the extraordinary sensory experience of a viewing body in motion unfurls a sacred narrative exquisitely designed to teach, impress, and inspire. Anna Lise Seastrand offers new insights into the arts of early modern southern India, bringing to life one of the most culturally vibrant yet least understood periods in Indian art. She shows how temple visitors become active participants in the paintings through their somatic engagement with visual stories and devotional landscapes. Seastrand highlights the significance of textuality in early modern South Asia by examining the status of professional scribes and the prominence given to authorship of religious literature and art. Her insights are presented alongside new translations of the texts that accompany mural paintings. Featuring a wealth of stunning images published here for the first time, *Body History Myth* provides a multidimensional reading of temple art that fundamentally reframes the artistic, intellectual, religious, and political histories of early modern India.

Portraiture in South Asia since the Mughals Crispin Branfoot, 2018-06-30 One of the most remarkable artistic achievements of the Mughal Empire was the emergence in the early seventeenth century of portraits of identifiable individuals unprecedented in both South Asia and the Islamic world. Appearing at a time of increasing contact between Europe and Asia, portraits from the reigns of the great Mughal emperor/patrons Akbar, Jahangir, and Shah Jahan are among the best known paintings produced in South Asia. In the following centuries, portraiture became

more widespread in the visual culture of South Asia especially in the rich and varied traditions of painting but also in sculpture and later prints and photography This collection seeks to understand the intended purpose of a range of portrait traditions in South Asia and how their style setting and representation may have advanced a range of aesthetic social and political functions The chapters range across a wide historical period exploring ideals of portraiture in Sanskrit and Persian literature the emergence and political symbolism of Mughal portraiture through to the paintings of the Rajput courts sculpture in Tamil temples and the transformation of portraiture in colonial north India and post independence Pakistan This specially commissioned collection of studies from a strong list of established scholars and rising stars makes a significant contribution to South Asian history art and visual culture *Atlas of World Art* Oxford University Press,2004 The Atlas of World Art maps the cumulative traces of humankind s artistic activity and demonstrates the importance of physical and political geography for the history of the world s art This stunning volume is the first to treat the art of the whole world from prehistory to present day and to show the importance of natural and social factors in shaping artistic activity The Atlas is divided into seven parts each devoted to a specific time period Art of the Hunter Gatherer 50 000 5 000 BCE Art Agriculture and Urbanization 5 000 500 BCE Art War and Empire 500 BCE 600 CE Art Religion and Empire 600 1500 Art Exploitation and Display 1500 1800 Art Industry and Science 1800 1900 Art Competition and Identity 1900 2000 Each section opens with a helpful timeline for that period bringing together important dates from across various cultures Within each section the spreads are organized by four broad geographic regions the Americas Europe Africa and Asia and the Pacific With dramatic full color maps as well as commentaries and illustrations the Atlas of World Art is an authoritative comprehensive and elegant volume [The Routledge Handbook of Hindu Temples](#) Himanshu Prabha Ray,Salila Kulshreshtha,Uthara Suvrathan,2022-10-13 This handbook is a comprehensive study of the archaeology social history and the cultural landscape of the Hindu temple Perhaps the most recognizable of the material forms of Hinduism temples are lived dynamic spaces They are significant sites for the creation of cultural heritage both in the past and in the present Drawing on historiographical surveys and in depth case studies the volume centres the material form of the Hindu temple as an entry point to study its many adaptations and transformations from the early centuries CE to the 20th century It highlights the vibrancy and dynamism of the shrine in different locales and studies the active participation of the community for its establishment maintenance and survival The illustrated handbook takes a unique approach by focusing on the social base of the temple rather than its aesthetics or chronological linear development It fills a significant gap in the study of Hinduism and will be an indispensable resource for scholars of archaeology Hinduism Indian history religious studies museum studies South Asian history and Southeast Asian history Chapters 1 4 and 5 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com They have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license
