## **Material Stone Constructions And Technologies For Contemporary Architecture:**

Material Stone Christoph Mäckler, 2004 In recent years building with stone has gained new significance not only because of its impressive appearance but also in the debate that has arisen in architecture between the monumental and the transparent Principally used in facades but also for interior design natural stone and even man made stone such as concrete and bricks is now being appreciated for its high quality performance For international architects such as Michael Graves Frank O Gehry Mario Botta or Richard Meier this diverse material plays a major role This publication examines the use of stone in contemporary architecture drawing also on the work and experience of such great predecessors as Semper or Hegger In thematic chapters it presents the state of the art The emphasis of the book is laid on the many different kinds of natural stone which come from a wide range of countries Further chapters elucidate innovative applications of concrete and bricks also illustrated by international examples *Construction Materials Manual* Manfred Hegger, Volker Auch-Schwelk, Matthias Fuchs, Thorsten Rosenkranz, 2013-02-12 Until now the few existing systematic texts on construction materials have primarily been directed at building engineers An overview for architects which also considers the importance of construction materials in the sensory perception of architecture including tactile qualities smell color and surface structure has not been available With the publication of the *Construction Materials Manual* all that has changed As a basic work aimed equally at the questions and perspectives of architects and building engineers it will bring together all of the above mentioned viewpoints It addresses fundamental questions of sustainability including life span environmental impact and material cycles while also presenting material innovations All of the principal conventional and innovative construction materials are comprehensively documented with attention to their production manufacture fabrication treatment surfaces connections and characteristics International examples help to illustrate their use in architecture where a building's appearance is often defined by a single material Thus the *Construction Materials Manual* will support the daily work of architects and engineers in the choice of construction materials in a comprehensive and at the same time vivid and stimulating manner **Materials for Architects and Builders** Arthur R. Lyons, 2007 *Materials for Architects and Builders* provides an introduction to a wide range of building materials It explains in detail the manufacture key physical properties specification and uses of the standard building products everything a student would need to know The book also describes many recent technological innovations and rediscovered materials reflecting an increased concern for environmental issues within the Industry This new edition has been completely updated to reflect the amended Building Regulations the latest British and European Standards as well as incorporating current advice and information from the Building Research Establishment Dr Arthur Lyons is a teacher fellow and principal lecturer in building materials at the Leicester School of Architecture within the Faculty of Art and Design at De Montfort University UK He has taught the subject of building materials for thirty five years to a wide range of students within the built environment disciplines The text covers the widest range of materials from standard products to ecofriendly

materials and components Up to date with respect to the latest Building Regulations and European British Standards Well illustrated with many colour images showing typical use of the materials in high quality construction

**Materials for Architects and Builders** Arthur Lyons, 2014-08-21 Materials for Architects and Builders provides a clear and concise introduction to the broad range of materials used within the construction industry and covers the essential details of their manufacture key physical properties specification and uses Understanding the basics of materials is a crucial part of undergraduate and diploma construction or architecture related courses and this established textbook helps the reader to do just that with the help of colour photographs and clear diagrams throughout This new edition has been completely revised and updated to include the latest developments in materials research new images appropriate technologies and relevant legislation The ecological effects of building construction and lifetime use remain an important focus and this new edition includes a wide range of energy saving building components

*The Art of Precast Concrete* David Bennett, 2005-08-26 As a building material precast concrete allows a wide range of sculptural forms and design options By treating the surface in various ways fascinating textures and fine finishes can be produced This book provides a systematic overview of the variety of applications for such concrete elements throughout Europe Author David Bennett provides in depth information on newly developed especially lightweight forms of concrete such as GRC Glass Fibre Reinforced Concrete Ductal and CRC Compact Reinforced Composite A selection of some 24 projects which are of particular significance are documented in detail and provide a wealth of inspiring design ideas The appendix comprises an overview of the building practices in the individual European countries and the availability of concrete elements Amongst the buildings documented are the Scottish Parliament Building in Edinburgh by Enric Miralles Benedetta Tagliabue the Synagogue in Dresden by Wandel Hoefer Lorch Hirsch and the Mexican Embassy in Berlin by Gonz lez de Le n

Failed Stone Patrick Loughran, 2006-11-21 Concrete and stone seem made to last forever But the fact is they develop problems It is not always as dramatic as the collapse of a section of the roof of the Paris Charles de Gaulle airport in 2004 Gradual changes also occur that may compromise the appearance and structural soundness of buildings constructed with these materials These changes can be created by efflorescence thermal stress weathering leakage and corrosion This book explains how to avoid typical kinds of failure With this in mind it systematically analyzes cases of damage in contemporary international architecture It also offers strategies for minimizing the risk of damage Examples include such high visibility structures as Finlandia Hall in Helsinki Parco della Musica in Rome and Vontz Center for Molecular Studies in Cincinnati In eight chapters typical kinds of damage are explained and illustrated with examples Beton und Stein scheinen f r die Ewigkeit gemacht Dennoch kommt es hier zu Bausch den Nicht immer sind sie so dramatisch wie der Deckeneinsturz im Terminal des Flughafen Paris Roissy 2004 Es gibt auch schleichende Ver nderungen die Erscheinungsbild und Statik von Beton oder Steingeb uden beeintr chtigen k nnen Dazu geh ren Ausbl hungen thermische Auswirkungen Materialunvertr glichkeiten Korrosion oder massive Krafteinwirkung Dieses Buch zeigt wie sich

typische Schäden vermeiden lassen. Zu diesem Zweck analysiert es systematisch Schadensfälle in der zeitgenössischen internationalen Architektur. Ebenso werden Strategien vorgestellt, mit denen sich das Schadensrisiko minimieren lässt. Zu den Beispielen gehören so bekannte Bauten wie die Finlandia Hall in Helsinki, Renzo Pianos Parco della Musica in Rom oder Vontz Center for Molecular Studies in Cincinnati. In insgesamt acht Kapiteln werden typische Schäden erklärt und dann mit Beispielen illustriert.

**New Stone Architecture** David Dernie, 2003. A discussion of stone construction and the nature of stone as a material. Aimed at practising architects and students, this study describes the new technologies that make the new stone forms possible. This is followed by 33 case studies from around the world.

**Proceedings of EcoComfort 2024** Zinoviy Blikharsky, Vasyl Zhelykh, 2024-08-08. This book gathers the latest innovations and applications in the field of resource saving technologies and advanced materials in civil and environmental engineering as presented by leading international researchers and engineers at the 4th International Scientific Conference EcoComfort and Current Issues of Civil Engineering held in Lviv, Ukraine, on September 11-13, 2024. It covers a diverse range of topics including ecological and energy saving technologies, renewable energy sources, heat, gas, and water supply, microclimate provision systems, innovative building materials and products, smart technologies in water purification and treatment, protection of water ecosystems, and architectural shaping and structural solutions. The book, which was selected using a rigorous international peer review process, highlights exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

**Basics Architecture 02: Construction & Materiality** Lorraine Farrelly, 2009. This volume explores the key materials used in construction today, looking at their history, development, and practical application in contemporary architecture.

**Eleven Exercises in the Art of Architectural Drawing** Marco Frascari, 2011-03-08. This text offers 11 servings of slow food for the architectural imagination, as opposed to the tasteless fast food that dominates many drawing tables or digital tablets.

**New Architecture and Technology** Gyula Sebestyen, Christopher Pollington, 2007-06-07. Many books have covered the topics of architecture, materials, and technology. *New Architecture and Technology* is the first to explore the interrelation between these three subjects. It illustrates the impact of modern technology and materials on architecture. The book explores the technical progress of building, showing how developments both past and present are influenced by design methods. It provides a survey of contemporary architecture as affected by construction technology. It also explores aspects of building technology within the context of general industrial, social, and economic developments. The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design.

**Facades** Ulrich Knaack, Tillmann Klein, Marcel Bilow, Thomas Auer, 2014-09-05 Introduction to building facades as revised edition Facades determine the appearance of a building Hence they constitute a major element in architecture At the same time the building's envelope has important functions to fulfil such as lighting weatherproofing thermal insulation load transfer and sound insulation Over the past 15 years facades have become increasingly complex intelligent facades for instance adapt to changing climate and lighting conditions Newly developed materials and technologies have broadened the scope of facade functions This book demonstrates the principles of facade construction It systematically describes the most common types such as post and beam facade curtain wall corridor facade or double facade and provides guidelines for appropriate detailing Numerous drawings made especially for the book explain the principles of different types of facades which are then illustrated with built examples For this second edition all chapters were revised and all four examples in the case studies chapter were replaced by new material The new chapter Future Facades offers insights into what's next

*Sustainable and Resilient Infrastructure Development in Africa's Changing Climate* Emmanuel Adinyira, Clifford Amoako, Titus Ebenezer Kwofie, Clinton Aigbavboa, Kofi Agyekum, Michael Addy, 2024-10-11 This book contains the proceedings of ICIDA 2023 The conference is a platform for deliberating the delivery and management of infrastructure in Africa in the face of a changing climate It helped to engage various stakeholders in the continent and beyond on how to develop and deliver sustainable and resilient infrastructure against climate variabilities This book brings together the experiences of participants gathered through many years of research and practice across various fields of infrastructure development that can help shape the future of the African continent

**Transparent Plastics** Simone Jeska, 2007-10-05 Recent years have seen the construction of buildings made of plastic structures that are as attractive as they are unusual After initial experiments in the 1970s plastic is currently experiencing a tremendous boom Originally used for temporary structures like the BMW Pavilion in Frankfurt it is now employed in many permanent buildings as well including the recent Catholic church in Radebeul by Staib Behnisch Prominent international avant garde architects such as Shigeru Ban and Herzog de Meuron frequently use transparent plastic for their structures Transparent plastic seems ephemeral and thus captures the spirit of the times Its various qualities between transparent and translucent make it possible to achieve fascinating effects with light and color Projects presented include the Allianz Arena in Munich by Herzog de Meuron the Rocket Tower in Leicester by Grimshaw Partners the Paper Art Museum by Shigeru Ban in Shizuoka Japan and the public housing development Cit Manfeste in Mulhouse by Lacaton Vassal Seit einigen Jahren entstehen ebenso

attraktive wie ungewöhnliche Bauten aus Kunststoff Nach ersten Versuchen in den 1970er Jahren erlebt der Baustoff derzeit einen ungeheuren Boom Zunächst für temporäre Bauten wie dem BMW Pavillon in Frankfurt genutzt entstehen mittlerweile auch zahlreiche bleibende Gebäude wie kürzlich die Katholische Kirche von Staib Behnisch in Radebeul Bekannte Architekten der internationalen Avantgarde wie Shigeru Ban oder Herzog de Meuron verwenden gerne transparenten Kunststoff für ihre Bauten Das Material scheint ephemere transitorisch ohne es zu sein und trifft damit den Nerv der heutigen Zeit Seine unterschiedlichen Qualitäten zwischen transparent und transluzent erlauben faszinierende Licht und Farbeffekte Zu den dargestellten Projekten gehören die Allianz Arena in München von Herzog de Meuron der Rocket Tower in Leicester von Grimshaw Partner das Papiermuseum von Shigeru Ban in Shizuoka Japan und der soziale Wohnungsbau der Cité Manifeste in Mulhouse von Lacaton Vassal
