Materials For Architects And Builders An Introduction:

Materials for Architects and Builders Arthur R. Lyons, 2007 *Materials for Architects and Builders* provides an introduction to a wide range of building materials. It explains in detail the manufacture, key physical properties, specification and uses of the standard building products everything a student would need to know. The book also describes many recent technological innovations and rediscovered materials reflecting an increased concern for environmental issues within the Industry. This new edition has been completely updated to reflect the amended Building Regulations, the latest British and European Standards as well as incorporating current advice and information from the Building Research Establishment. Dr Arthur Lyons is a teacher fellow and principal lecturer in building materials at the Leicester School of Architecture within the Faculty of Art and Design at De Montfort University UK. He has taught the subject of building materials for thirty five years to a wide range of students within the built environment disciplines. The text covers the widest range of materials from standard products to ecofriendly materials and components. Up to date with respect to the latest Building Regulations and European British Standards. Well illustrated with many colour images showing typical use of the materials in high quality construction.

Materials for Architects and Builders Arthur R. Lyons, 1997 Throughout the book is clearly illustrated with many photographs and diagrams showing materials and building components both individually and in use. Where relevant the environmental aspects of the building materials are considered. Each chapter lists the up to date British and European Standards together with related Building Research Establishment publications and suggested further reading. A selection of colour images illustrates the appropriate use of different construction materials within the context of quality architectural design. Essential reading for students of building architecture and construction. Extensive coverage of all types of building materials. Key introductory text. *Materials for Architects and Builders* Arthur Lyons, 2019-08-28 *Materials for Architects and Builders* provides a clear and concise introduction to the broad range of materials used within the construction industry and covers the essential details of their manufacture, key physical properties, specification and uses. Understanding the basics of materials is a crucial part of undergraduate and diploma construction or architecture related courses and this established textbook helps the reader to do just that with the help of colour photographs and clear diagrams throughout. This new sixth edition has been completely revised and updated to include the latest developments in materials research, new images, appropriate technologies and relevant legislation. The ecological effects of building construction and lifetime use remain an important focus and this new edition includes a wide range of energy saving building components. Architects' and Builders' Magazine, 1906 *Elementary Structures for Architects and Builders* R. E. Shaeffer, 2007 For courses in Structural Technology and Statics and Strength of Materials.
