Materials Form And Architecture:

Materials, Form and Architecture Richard Weston, 2003 After a century largely dominated by discussions of space and form there is now renewed interest in the material aspects of architecture Backlashing against the digital and virtual wave there is a fresh emphasis on the material qualities of buildings while ironically it is the information technologies that allow the architect direct control over what happens on the building site once more The early chapters of the book survey the field historically and explore the theory of materials and form These are followed by seven thematic chapters and a well illustrated discussion of the future of materials with examples chosen from contemporary architecture The book aims to excite students and architects to take more interest in this often neglected aspect of architecture It counters the tendency to think of materials as a technical issue by addressing the subject historically and critically linking cultural ideas to technical means

Materials, Form and Architecture Richard Weston, 2003-01-01 First published in Great Britain in 2003 by Laurence King Publishing Ltd London T p verso **Transparent Plastics** Simone Jeska, 2007-10-05 A fascinating guide to building with transparent plastics Prominent international avant garde architects such as Shigeru Ban and Herzog de Meuron frequently use transparent plastic for their structures Transparent plastic seems ephemeral and thus captures the spirit of the times

Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well

Materials and Meaning in Architecture Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history Materials and Meaning in Architecture develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect's work to consider the enduring expressive possibilities of material use in architecture The book's chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers Materials and Meaning in Architecture will cause theorists to rethink their assumptions and designers to see new potential for their projects

□□□□□□ □□ □□□, 2003 900 **Basics Materials** Manfred Hegger, Hans Drexler, Martin Zeumer, 2017-05-22 The Materiality of buildings and constructions is an important aspect of architectural design The approach to and use of materials is a fundamental building block of architectural training Themes Subjective effect of materials Haptic influences Use of materials Creative use of classical construction materials *Situate, Manipulate, Fabricate* Chad Schwartz, 2020-08-25 This anthology of selected works outlines three critical instigators of architecture all tied directly to the tectonic makeup of our built

environment place material and assembly These catalysts provide the organizational framework for a collection of essays discussing their significant influence on the processes of architectural design and construction With content from a diverse collection of notable architects historians and scholars this book serves as a theoretical structure for understanding the tectonic potential of architecture Each chapter is thematically driven consisting of a pair of essays preceded by an introduction highlighting the fundamental issues at hand and comparing and contrasting the points of view presented Situate Manipulate Fabricate offers an opportunity to explore the essential topics that affect the design and construction as well as the experiential qualities of our built environment

Modernism in Art, Design and Architecture Christopher Crouch, 1998-11-20 This text summarises and contextualises the ideas that formed visual arts practices this century Art design and architecture are located in their social and political contexts and the ideas of modernism are traced from the development of industrialised Europe at the turn of the century to the post industrial post colonial present The complex relationship between modernism and postmodernism in the visual arts is examined and the book concludes with a review of the global impact of the new technologies on art and design production

Elements of Architecture Pierre von Meiss, 2013-11-13 Modernity has opened the way to a greater pluralism of forms But even if architecture is a cultural phenomenon that does not mean it is a product of fashion Its principles are enduring and its foundations less tangible than the novice who tried to shake them would realize To start that stretch towards the foundations one must first acquire the basics to know the permanence of the architectural field and appreciate the certainties tested by time This book will act as a guide for the reaching hand The first part explores the mediums of compositional architecture and the relationships between space light and place Four or five thousand years of history demonstrate the persistence of certain fundamental principles intrinsic to a discipline that organizes in three dimensions the vital space of man In the second part the author provides certain keys to manage the relationship between shape materials and construction recalling that the need to build by itself has never been enough to design the form of the house or the city Neither encyclopedia nor dictionary this book seeks to fill a gap in light of our time it serves as a contemporary introduction to architectural design and criticism Following the praise of critics the first edition has been adopted as a reference text in numerous schools and translated into several languages This new translation from the 3rd French edition offers revised and reworked content with an additional three chapters dedicated to tectonics

Revealing Architectural Design Philip D. Plowright, 2014-01-10 Revealing Architectural Design examines the architectural design process from the point of view of knowledge domains domain syntax coherence framing thinking styles decision making and testing Using straightforward language the book connects general design thinking to underlying frameworks that are used in the architectural design process The book provides historical grounding as well as clear examples of real design outcomes It includes diagrams and explanations to make that content accessible The frameworks and their methods are described by what they can accomplish what biases they introduce and the use of their final outcomes Revealing Architectural Design is an advanced primer useful to anyone interested in increasing the quality of their architectural design proposals through understanding the conceptual tools used to achieve that process While it is intended for undergraduate and graduate students of architectural design it will also be useful for experienced architectural practitioners For the non architect this book opens a window into the priorities of a discipline seldom presented with such transparency

Hannes Meyer: Soviet Architect. Life and Work in the USSR, 1930-1936 Tatiana Efrussi, 2025-03-31 Swiss architect and urban planner the second director of the Bauhaus Dessau Hannes Meyer spent about six years in the USSR from 1930 to 1936 This book presents the first in depth study of Hannes Meyer's activities during the years of early Stalinism There is a global interest in this architect's legacy today but his work can hardly be understood without a closer examination of the key chapter in his career This book is an attempt to challenge the usual Western centered perspective and explore not only what Meyer could bring to the Soviet Union but also what he sought to learn there and how this interaction influenced his work and thinking The somewhat provocative title underscores this thesis A detailed reconstruction of his professional activities during this period was made possible through archival research in several countries Russia Germany Austria and Switzerland and field trips across Russia In the end the narrative offers a glimpse into the Soviet architectural context of the 1930s networks hierarchies behavioral strategies theories and interpretations of major polemical concepts such as proletarian architecture and socialist realism Among the projects for socialist cities Meyer was commissioned to create the urban plan for the capital of the Jewish Autonomous Region in the USSR Birobidzhan The dedicated book chapter explores his involvement in the search for a distinct Soviet Jewish style Hannes Meyer the most controversial of the architects associated with the Bauhaus was passionately involved in politics and available documents indicate his desire to become a Soviet architect at all costs The research allows us to view Meyer not only as a victim but also as an actor in the early Stalinist system based on violence

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08 The escalating

interdependency of nations drives global geopolitics to shift ever more quickly Societies seem unable to control any change that affects their cities whether positively or negatively Challenges are global but solutions need to be implemented locally How can architectural research contribute to the future of our changing society How has it contributed in the past The theme of the 10th EAAE ARCC International Conference Architectural Research Addressing Societal Challenges was set to address these questions This book Architectural Research Addressing Societal Challenges includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference which was held at the facilities of the Faculty of Architecture of the University of Lisbon The papers have been further divided into the following five sub themes a Changing Society In Transit Global Migration Renaturalization of the City Emerging Fields of Architectural Practice and Research on Architectural Education The EAAE ARCC International Conference held under the aegis of the EAAE and of the ARCC is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe
