solving This book significantly extends two pedagogical movements that have recently influenced mathematics teaching the use of physical manipulatives and visual imagery and the use of children s literature It takes a giant leap in leaving behind the written word for oral language and integrating serious mathematical explorations with fantasy Author Michael Stephen Schiro presents the teaching of mathematics often a high anxiety subject in a non threatening innovative fashion via the use of epic storytelling It is written in a conversational tone and includes numerous sample illustrations The book s presentation of stories how a teacher actually used them in class along with students responses and a discussion of the educational value of such strategies make this a comprehensive work that recognizes teachers capabilities and concerns about employing the best available educational practices The accompanying CD ROM contains the full text of two epic stories plus additional worksheets handouts and artwork This book will be of immediate interest to both pre service and in service teachers and all educators devoted to providing children powerful mathematical and literary experiences
