

Weather Data Collection & Analysis

Science/Math Connection

Students can use digital resources, thermometer placed outside the classroom or thermometer in the classroom. Students find the temperature and graph every day for a week. Teacher may make several copies to graph weekly if they so choose.

Page 2: Students create a bar graph after measuring temperature each day for a week (use weather.com to find Saturday and Sunday's average temperature).

Page 3: Use 2 column chart to record daily temperatures more precisely. Make several copies if necessary.

Page 4: Extension: Students find the mean average temperature for a week and graph on a line graph.

Suggested Questions for Analysis

- What patterns do you notice?
- What are any outliers?
- Do you notice anything unusual about the temperatures?
- What is the range of temperatures for the week/month?
- What is the difference between the highest and lowest temperature that you found?
- How would this graph be different if it were made in a different place in the world? How would it be different during a different season?
- What do you think was the highest temperature ever recorded for this time of year?
- How does that differ from what we found?
- Is anyone's graph different from a classmate? Why do you think that is?

Other Extension: Students could either choose a place they would like to live or visit and research the daily/weekly/average temperatures in that place and graph that data.

Social Studies Connection: Students can research daily temperatures in a place they are currently studying in SS
