Medicine Dog:

Medicine Dog Julia Szabo, 2014-03-04 Julia Szabo was a nationally recognized pet reporter when her dog Sam collapsed from osteoarthritis. Diligently researching how to restore his quality of life, she discovered Vet Stem, a service that provides cutting edge regeneration therapy for pets using stem cells harvested from animals' own tissue. Just hours after receiving IV and intra joint injections, Sam began aging backward, which left Julia wondering why this simple effective treatment was not available for humans. Julia suffered from chronic inflammatory bowel disease and after witnessing Sam's astonishing recovery, she set out on a curious quest to be treated like a dog by a doctor as competent as her vet. After a four year wait, Julia became the first American to be successfully cured of a perirectal fistula with stem cells derived from her own fat. With this amazing true story of how a pack of shelter dogs she rescued from death row came to save her life, Julia hopes to inspire and inform readers about exciting healthcare options available to them and their cherished animal companions. **Manual of Clinical**
