Parallel Developments A Comparative History Of Ideas:

Parallel Developments Hajime Nakamura,1977 *A Comparative History of Ideas* Hajime Nakamura,1992 Hajime Nakamura argues with remarkable erudition that particular intellectual and social developments can be traced in all great cultures that each culture deals with its problems in about the same order Discussing in their similarities and in their subtle differences ideas from India China Japan and Europe the author considers such inclusive notions as the concept of God the controversy over universals and the nature of orthodoxy and heterodoxy This is a lucid and rewarding book which sets a new standard for dealing with a history of thought across many cultures **Parallel Developments** Hajime Nakamura,1977

Complementarity Beyond Physics Arun Bala,2016-12-01 In this study Arun Bala examines the implications that Niels Bohr's principle of complementarity holds for fields beyond physics Bohr one of the founding figures of modern quantum physics argued that the principle of complementarity he proposed for understanding atomic processes has parallels in psychology biology and social science as well as in Buddhist and Taoist thought But Bohr failed to offer any explanation for why complementarity might extend beyond physics and his claims have been widely rejected by scientists as empty speculation Scientific scepticism has only been reinforced by the naive enthusiasm of postmodern relativists and New Age intuitionists who seize upon Bohr's ideas to justify anti realist and mystical positions Arun Bala offers a detailed defence of Bohr's claim that complementarity has far reaching implications for the biological and social sciences as well as for comparative philosophies of science by explaining Bohr's parallels as responses to the omnipresence of grown properties in nature *The East in the West* Jack Goody,1996-03-21 The East in the West reassesses Western views of Asia Traditionally many European historians and theorists have seen the societies of the East as static or backward Jack Goody challenges these assumptions beginning with the notion of a special Western rationality which enabled us and not them to modernise He then turns to book keeping which several social and economic historians have seen as intrinsic to capitalism arguing that there was in fact little difference between East and West in terms of mercantile activity Other factors said to inhibit the East's development such as the family and forms of labour have also been greatly exaggerated This Eurocentrism both fails to explain the current achievements of the East and misunderstands Western history The East in the West starts to redress the balance and so marks a fundamental shift in our view of Western and Eastern history and society **Histories of**

Methodologies of Comparative

Philosophy Robert W. Smid, 2010-07-02 What is comparative philosophy This question is ultimately a methodological one according to this much needed book The cultivation of area studies in diverse traditions has opened up opportunities for cross cultural understanding that have rarely existed before and comparative philosophy is a rapidly emerging area of inquiry Yet surprisingly little has been written on comparative methodology in philosophy Of course there is much at stake in how we compare things how comparison is done determines what comparison is Author Robert W Smid provides a critical review of four of the most influential comparative methodologies within the American pragmatist and process philosophical traditions those of William Ernest Hocking F S C Northrop Robert Cummings Neville and David L Hall in collaboration with Roger T Ames Discussing the history of each methodology s development and critically assessing its strengths and weaknesses Smid demonstrates that it is possible to compare methods as well as traditions and encourages those interested to join the

contemporary conversation Cosmopolitan Political Thought Farah Godrej, 2011-08-01 Cosmopolitan Political Thought asks the question of what it might mean for the very practices of political theorizing to be cosmopolitan. It suggests that such a vision of political theory is intimately linked to methodological questions about what is commonly called comparative political theory, namely the turn beyond ideas and modes of inquiry determined by traditional Western scholarship. It is therefore an argument for applying the idea of cosmopolitanism understood in a particular way to the discipline of political theory itself. As Farah Godrej argues, there are four crucial components of this cosmopolitan intervention: the texts under analysis, the methods for interpreting non-Western texts and ideas, the application of these ideas across geographical and cultural boundaries, and the deconstruction of Eurocentrism. In order to be genuinely cosmopolitan, Godrej states, political theorists must reflect on their perspectives inside and outside various traditions and immerse themselves in foreign ideas, languages, histories, and cultures, ultimately relocating themselves within their disciplinary homes. The result will be a serious challenge to accepted solutions to political life.

Thinking History Globally Diego Olstein, 2014-11-04 The book brings together many recent trends in writing history under a common framework: thinking history globally. By thinking history globally, the book explains, applies, and exemplifies the four basic strategies of analysis: the big C's: comparing, connecting, conceptualizing, and contextualizing, using twelve different branches of history.

What is Global History? Pamela Kyle Crossley, 2008-03-03 Global and world history address the deep structural changes that have shaped human experience. Many are material, related to environmental and climatic alteration, to the domestication of livestock, and development of agriculture, to technology, to disease, and to variations in human immunity, reproduction, and physiology. Others are social and cultural, touching upon issues of migration, trade, language, development, and differentiation, institutions of enslavement and of freedom, traditions of marriage and child rearing, the emergence of large-scale political organization from early kingdoms to vast empires, republics, and federations, and the management of war and peace. To deal with such challenging issues, global historians draw upon new techniques of analysis and comparison. But they also continue venerable traditions inherited from the earliest civilizations of narrating the past on the most comprehensive and significant scale possible. This book examines the long search for an integrated human story and particularly the points at which rapid changes of philosophy and perspective in the twentieth century transformed the historical disciplines. It provides the perfect introduction to global history for students and scholars alike.

History and Belief Robert Eric Frykenberg, 1996 In this study of the relationship between history and belief, the author shows how our underlying commitments, whether religious or ideological, determine which events we find significant enough to remember as history, yet how those same beliefs distort our understandings of events, leaving them incomplete and contingent.

The Epistemology of Comparative Philosophy Joseph Kaipayil, 1995

The Axial Age and Its Consequences Robert N. Bellah, Hans Joas, 2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium BCE. From Axial Age

thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression **Philosophy History Sophistry** Dennis

Rohatyn,2022-04-25 Post modernism believes in nothing not even unbelief Hence it is a genial version of nihilism and the flip side of despair Like skepticism from which it descends it is healthy insofar as it rejects all dogmas but unhealthy insofar as it substitutes its own while eating its own essence This book diagnoses this disease and offers irony as its cure What failure of nerve did to Hellenism strength of character must do for the decline of the best Humor laughter and detachment are the gifts of historical art and of Socratic science As we take refuge in the myth of truth we must realize that there is no truth in myth and no comfort in illusion except the lie of immortality **Parallel Developments: A Comparative History of Ideas**

Edited by Ronald Burr ; with a Preface by Charles Morris Hajime Nakamura,1975 The Dialogue of Civilizations in the Birth of Modern Science A. Bala,2006-11-13 Arun Bala challenges Eurocentric conceptions of history by showing how Chinese Indian Arabic and ancient Egyptian ideas in philosophy mathematics cosmology and physics played an indispensable role in making possible the birth of modern science **The Humanities** Frank Whaling,2019-10-08 No detailed description available for The Humanities **A Concise History of History** Daniel Woolf,2019-01-17 This short history of history is an ideal introduction for those studying or teaching the subject as part of courses on the historian s craft historical theory and method and historiography Spanning the earliest known forms of historical writing in the ancient Near East right through to the present and covering developments in Europe Asia Africa and the Americas it also touches on the latest topics and debates in the field such as Big History Deep History and the impact of the electronic age It features timelines listing major dynasties or regimes throughout the world alongside historiographical developments guides to key thinkers and seminal historical works further reading a glossary of terms and sample questions to promote further debate at the end of each chapter This is a truly global account of the process of progressive intercultural contact that led to the hegemony of Western historiographical methods Global History of Philosophy John C. Plott,Russell E. Hatton,1993 This is the first in a series of five volumes on the global history of philosophy In this and subsequent volumes instead of the traditional division of western and non western philosophies each philosophy is seen in relation to global contemporaries throughout Eurasia Scholasticism should not be taken in the pejorative sense as the juggling of arguments by straw men but in the sense of a challenge even in our own era to work for consistent and comprehensive systematic synthesis All the older traditions need to be reinterpreted in terms of modern conditions which after all is what the Eurasian scholastics of these centuries were doing for their own time The major developments of this period are Monism in Many Moods during the ninth century through Exfoliation and Elaboration of those seminal systems in the tenth and eleventh centuries until the time of the Great Summas in the twelfth and thirteenth centuries It was during this time that philosophy and theology developed a very highly sophisticated technique of balancing arguments and refutations and counter arguments and counter refutations Most of these architectonic

structurings were in the form of commentaries on basic handbook texts handed down as authoritative scripture In every culture of Eurasia systematic philosophy as well as intuitive wisdom had reached a high degree of sophistication from which it might be said that it has never quite completely recovered In terms of method seldom since has there been such thoroughness in treatment of every single topic with arguments and counter arguments architectonically juxtaposed and counter balanced into such a grand harmony As is true of the whole series these volumes are a new way of exploring the accumulative wisdom of mankind and in the process explode many of the ethnocentric stereotypes which still hinder intercultural communications and world peace through intercultural understanding

Buddhism and American Thinkers

Kenneth K. Inada, Nolan P. Jacobson, 1984-06-30 In Buddhism and American Thinkers leading scholars explore Buddhist influences on the currents of American thought The essays presented here advance a continuing dialogue between East and West and show how Buddhism has made ever deepening penetrations into the very substratum of American thinking Contributors to this volume share a concern with ideas that constitute a common core of Buddhist and American philosophy Each relates Buddhism to a factor in American thinking exploring the numerous ways in which Buddhist perspectives on personal identity human suffering and alienation the nature of compassionate love and the social nature of ultimate reality amplify and clarify perspectives found in the golden age of American philosophy particularly in the thought of William James Josiah Royce Alfred North Whitehead John Dewey Charles Sanders Peirce and Charles Hartshorne the great living American philosopher Buddhism and American Thinkers brings new light to the interrelationship between an ancient orientation to life and the very deepest ideas in the history of American thought
