

PARTNERSHIP

Art. 1767. By the contract of partnership two or more persons bind themselves to contribute money, property, or industry to a common fund with the intention of dividing the profits among themselves.

Definition

Partnership: is a contract whereby two or more persons bind themselves to contribute money, property or industry to a common fund with the intention of dividing profits among themselves.

Elements

1. Intention to form a contract of partnership
2. Participation in both profits and losses
3. Community of interests

Basic Features

1. Voluntary agreement
2. Association for profit
3. Mutual contribution to a common fund
4. Lawful purpose or object
5. Mutual agency of partners
6. Articles must not be kept secret
7. Separate juridical personality

Characteristics

1. **Consensual** – perfected by mere consent.
2. **Bilateral** – formed by two or more persons creating reciprocal rights and obligations.
3. **Preparatory** – entered into as a means to an end.
4. **Nominative** – has a special name or designation.
5. **Onerous** – contributions in the form of either money, property and/or industry must be made.
6. **Commutative** – the undertaking of each partner is considered as the equivalent of that of the others.
7. **Principal** – its existence or validity does not depend on some other contract.

Principle of Elective Personae (choice of persons) – a person has the right to select persons with whom he wants to be associated with in partnership.

Art. 1768. The partnership has a juridical personality separate and distinct from that of each of the partners even in case of

failure to comply with the requirements of Article 1772, first paragraph.

Partnership, a juridical person

As an independent juridical person, a partnership may enter into contracts, acquire and possess property of all kinds in its name, as well as incur obligations and bring civil or criminal actions. Thus, a partnership may be declared insolvent even if the partners are not. It may enter into contracts and may sue and be sued in its firm name or by its duly authorized representative. It is sufficient that service of summons be served on any partner.

Partners cannot be held liable for the obligations of the partnership unless it is shown that the legal fiction of a different juridical personality is being used for a fraudulent, unfair or illegal purpose.

Effect of failure to comply with statutory requirements

Under Art. 1774

Partnership still acquires personality despite failure to comply with the requirements of execution of public instrument and registration of name in SEC.

Under Arts. 1773 and 1775

Partnership with immovable property contributed, if without requisite inventory, signed and attached to public instrument, shall not acquire any juridical personality because the contract itself is void. This is also true for secret associations or societies.

To organize a partnership not an absolute right

It is but a privilege which may be enjoyed only under such terms as the State may deem necessary to impose.

Art. 1768. In determining whether a partnership exists, these rules shall apply:

1. Except as provided by Article 1825, persons who are not partners as to third persons.
2. Co-ownership or co-possession does not of itself establish a partnership, whether such co-ownership or co-possession do or do not share any profits made by the use of the property.

Parameters Of Popular Culture

Marshall William Fishwick

Parameters Of Popular Culture:

Parameters of Popular Culture Marshall William Fishwick, 1974 *Making Sense of Mass Education* Gordon Tait, 2013 *Making Sense of Mass Education* provides a comprehensive analysis of the field of mass education. The book presents new assessment of traditional issues associated with education: class, race, gender, discrimination, and equity, to dispel myths and assumptions about the classroom. It examines the complex relationship between the media, popular culture, and schooling, and places the expectations surrounding the modern teacher within ethical, legal, and historical contexts. The book blurs some of the disciplinary boundaries within the field of education, drawing upon sociology, cultural studies, history, philosophy, ethics, and jurisprudence to provide stronger analyses. The book reframes the sociology of education as a complex mosaic of cultural practices, forces, and innovations. Engaging and contemporary, it is an invaluable resource for teacher education students and anyone interested in a better understanding of mass education.

The Politics of the Artificial Victor Margolin, 2018-01-11 Emerging from the world of commercial art and product styling, design has now become completely integrated into human life. Its marks are all around us, from the chairs we sit on to the Web sites on our computer screens. One of the pioneers of design studies and still one of its most distinguished practitioners, Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields. Divided into sections on the practice and study of design, the essays in *The Politics of the Artificial* cover such topics as design history, design research, design as a political tool, sustainable design, and the problems of design's relation to advanced technologies. Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs. Throughout the book, Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design. He argues for the creation of an international interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that encompasses the responsibility to users, the problems of sustainability, and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life. Opinionated and erudite, Victor Margolin's *The Politics of the Artificial* breaks fresh ground in its call for a new approach to design research and practice. Designers, engineers, architects, anthropologists, sociologists, and historians will all benefit from its insights.

The Culture of Military Innovation Dima Adamsky, 2010-01-27 This book studies the impact of cultural factors on the course of military innovations. One would expect that countries accustomed to similar technologies would undergo analogous changes in their perception of and approach to warfare. However, the intellectual history of the Revolution in Military Affairs (RMA) in Russia, the US, and Israel indicates the opposite. The US developed technology and weaponry for about a decade without reconceptualizing the existing paradigm about the nature of warfare. Soviet new theory of victory represented a conceptualization which chronologically preceded technological procurement. Israel was the first to utilize the weaponry on the battlefield but was the last to develop a conceptual framework that acknowledged its revolutionary implications. Utilizing

primary sources that had previously been completely inaccessible and borrowing methods of analysis from political science history anthropology and cognitive psychology this book suggests a cultural explanation for this puzzling transformation in warfare The Culture of Military Innovation offers a systematic thorough and unique analytical approach that may well be applicable in other perplexing strategic situations Though framed in the context of specific historical experience the insights of this book reveal important implications related to conventional subconventional and nonconventional security issues It is therefore an ideal reference work for practitioners scholars teachers and students of security studies **Art in the Age of**
