Library of Congress Subject Headings Library of Congress. Office for Subject Cataloging Policy,1990 *Parapsychology and Religion* Everton de Oliveira Maraldi,2021-06-29 Parapsychology and Religion is perhaps the most controversial research area in the psychology of religion However in recent decades psychology of religion has witnessed a growing literature bearing on ontological issues including parapsychological topics such as distant healing and near death experiences This

book argues that despite the methodological and theoretical controversies that still surround the field of parapsychology the findings of research on alleged anomalous processes can inform the study of religious spiritual experiences Psychological literature on the paranormal is critically reviewed and it is argued that it became less a scientific endeavor and more an ideological program devised to denigrate paranormal believers and experiencers This volume explores how an open minded dialogue between parapsychology and psychology of religion might help us move beyond the present ideological disputes and reviews the complex relations between parapsychology and religion over time as well as their implications for interdisciplinary research on religion and spirituality

Psychology and Philosophy Sara Heinämaa, Martina Reuter, 2008-10-17 Psychology and Philosophy provides a history of the relations between philosophy and the science of psychology from late scholasticism to contemporary discussions The book covers the development from 16th century interpretations of Aristotle's De Anima through Kantianism and the 19th century revival of Aristotelianism up to 20th century phenomenological and analytic studies of consciousness and the mind In this volume historically divergent conceptions of psychology as a science receive special emphasis The volume illuminates the particular nature of studies of the psyche in the contexts of Aristotelian and Cartesian as well as 19th and 20th century science and philosophy The relations between metaphysics transcendental philosophy and natural science are studied in the works of Kant Brentano Bergson Husserl Merleau Ponty Wittgenstein and Davidson Accounts of less known philosophers such as Trendelenburg and Maine de Biran throw new light on the history of the field Discussions concerning the connections between moral philosophy and philosophical psychology broaden the volume's perspective and show new directions for development All contributions are based on novel research in their respective fields The collection provides materials for researchers and graduate students in the fields of philosophy of mind history of philosophy and psychology
