visualization attention intention and other forms of self regulation for fostering physical and psychological health and well being Is it possible for us to use such techniques to influence others even at a distance for purposes of healing Is it possible for us to influence the images thoughts behaviors and physiological reactions of other persons separated by distance without conventional sensory means of interaction Can these abilities extend to animals and even to cells e g human red blood cells Might these abilities be involved in the efficacy of distant mental or spiritual healing and intercessory prayer Might these influences even extend to events distant in time even backwards in time Do these influences have major implications for our scientific theories our human identity the interconnections between ourselves and nature and our relationships with others Careful laboratory work described in detail in this book suggests that the answer to all these questions is a resounding Yes A personal introduction and 12 detailed chapters describe the evidence that support these important claims The book also describes the factors that make such distant mental influences more or less likely so that anyone might use these distant influence skills more effectively and consistently for their own benefit and for the benefit of others **An Introduction to**

Messages from the Afterlife Mark Ireland, 2013-12-10 A father watches his teenage son step out the door on a hiking trip not knowing that this is the last time he would see him A journal of grief despair and ultimately hope this book tells the story of every parent s nightmare the sudden death of a child and a father s search for meaning in a seemingly random world of psychics and skeptics Expanding on territory covered in his 2008 memoir of his son s death Soul Shift Messages from the Afterlife is both an account of Ireland s journey from indifference to belief and an overview of the resources available to the bereaved to help them receive messages from the afterlife Mark Ireland son of celebrated psychic to the stars Dr Richard Ireland was a successful marketing executive in Arizona with little interest in his father s colorful history While his father held readings for Mae West and traveled the U S demonstrating his parapsychological powers Mark Ireland took a more conventional route through life But when his own teenage son Brandon suddenly dies while hiking in the mountains with friends Ireland is forced to confront his resistance to all things spiritual and begins to explore the possibility that communication with the dead is real In his search for conclusive evidence of life after death he plunges into his father s world and meets an array of respected psychic mediums who deliver unexpected messages not only from his son in the afterlife but

also from many other souls seeking to communicate with the living Fighting to retain a sense of critical thinking Ireland also contacts scientists conducting research into the survival of consciousness after death The book features detailed accounts of tests and experiments that various people have conducted to obtain proof of consciousness survival including Ireland's own involving a secret message left behind by his sister Robin who died of pancreatic cancer The contents of this message were unknown to any living person and remained sealed in an envelope untouched until responses had been received from a group of qualified mediums who sought to crack the code Messages from the Afterlife shows how spirit communication can be both undeniably accurate and frustratingly ambiguous and above all demonstrates the value of having an open receptive mind while maintaining faith in the indestructibility of the human spirit Parapsychology Abstracts International ,1988

Science in the New Age David J. Hess,1993 In Science in the New Age David Hess explores ideologies of the paranormal in the United States He offers a map of the labyrinth of views put forward by parapsychologists and skeptical debunkers spirit channelers and crystal healers Hollywood poltergeist scripts and prophets of the New Age Adopting a cultural perspective Hess moves beyond the question of who is right or wrong to the cultural politics of how each group constructs its own boundaries of true and false knowledge Hess begins by looking at each group's unique version of knowledge science and religion and at its story about the other groups Comparing the various discourses texts writers and groups as cultures he shows how skeptics parapsychologists and New Agers may disagree vehemently with each other but end up sharing many rhetorical strategies metaphors models values and cultural categories Furthermore he argues their shared paraculture has a great deal in common with the larger culture of the United States The dialogue on the paranormal Hess concludes has as much to do with gender power and cultural values as it does with spirits extrasensory perception and crystal healing
