Bowker's Complete Video Directory ,2000 **Principles and Practice of Child and Adolescent Forensic Mental Health** Elissa P. Benedek, Peter Ash, Charles L. Scott, 2009-10-20 When care of younger patients raises thorny legal questions you need answers you can trust that's why this book belongs on every clinician's reference shelf *Principles and Practice of Child and Adolescent Forensic Mental Health* is a timely and authoritative source that covers issues ranging from child custody to litigation concerns as it walks clinicians through the often confusing field of depositions and courtroom testimony The book expands on the 2002 volume *Principles and Practice of Child and Adolescent Forensic Psychiatry* winner of the 2003 Manfred S Guttmacher Award to meet pressing twenty first century concerns from telepsychiatry to the Internet while continuing to cover basic issues such as forensic evaluation psychological screening and the interviewing of children for suspected sexual abuse that are important to both new and experienced practitioners Many of its chapters have been entirely rewritten by new authors to provide fresh insight into such topics as child custody juvenile law abuse neglect and permanent wardship cases transcultural transracial and gay lesbian parenting and adoption and the reliability and suggestibility of children's statements It also includes significant material not found in the previous volume Two chapters on special education offer an introduction to screening instruments and help practitioners determine a child's potential need for special education programs and services A chapter on cultural competence helps readers improve the accuracy and responsiveness of forensic evaluations and minimize the chance of an unjust outcome resulting from misguided expert opinion The section on youth violence features three new chapters Taxonomy and Neurobiology of Aggression Prevention of School Violence and Juvenile Stalkers plus a newly written chapter on assessment of violence risk offering guidance on how to confront problems such as bullying and initiate effective family interventions A chapter on psychiatric malpractice and professional liability addresses these legal concerns with an eye toward cases involving minors A chapter on psychological autopsy covers evaluation of the circumstances surrounding pediatric suicides describing various types of equivocal deaths and discussing legal issues such as admissibility of the autopsy in court A newly written chapter on the Internet expands the previous book's focus on child pornography to help practitioners deal with issues ranging from online threats to emotional and legal consequences of interactions in cyberspace This is a valuable reference not only for practitioners in psychiatry and the mental health field but also for attorneys and judges It opens up a field that may be too often avoided and helps professionals make their way through legal thickets with confidence **Early Intervention for Young Children with Disabilities** Wendi Beamish, Mantak Yuen, 2025-06-19 This book focuses on the provision of early intervention for children with disabilities 0-6 years and their families throughout the Asia Pacific The motivation for the book stems from a policy brief by

the Economic and Social Commission for Asia and the Pacific ESCAP issued in 2021 This brief urgently called for young children with disabilities to be identified and to receive intervention and support in lower income countries throughout Asia and the Pacific The ESCAP has estimated that at least 33% of young children with disabilities across the region currently lack any service or support to optimise their development before entering school This book seeks to inform policy and provision within lower income countries by providing policymakers in government and non government organisations with practical guidelines In particular it presents real world frameworks and promising programs to assist in establishing and delivering early intervention services that cater to local needs and demands It also introduces personnel in the field to recommended intervention practices and strategies that support children with diverse disabilities across the age range birth 6 years It also includes suggestions and strategies for supporting and collaborating with the children s families Importantly when blended with early child development material these practices and strategies constitute essential topics for ongoing professional development and training activities The concluding chapter also presents a critical analysis and synthesis of policies service models and programs across the Asia Pacific region From this analysis recommendations are presented with likely translatability to countries at different stages of development in delivering quality early intervention to this vulnerable group of children

Interdisciplinary Pediatric Palliative Care Joanne Wolfe,2022 We hope that the lives of all children will be filled with possibility with open horizons and rainbows into the future Children with serious illnesses their families and those who care for them confront the realization that not everything is possible that despite dramatic scientific and medical advances the lifespan of some children will be shortened This threat of premature loss heightens the sense of time for children and families alike and challenges clinicians to create new pathways of hope for them
