Parental Loss of a Child Therese A. Rando, 1986 Parental loss of a child is unlike any other loss The grief of parents is particularly severe complicated and long lasting with major and unparalleled symptom fluctuations over time Parental Loss of a Child investigates this specific and quite unique case of bereavement The Death of a Child Elaine Stillwell, 2004 There is perhaps no more excruciating pain than the loss of a child It is a life changing event that will forever scar a parent When a child dies bereaved parents face the challenge of rebuilding their lives a daunting task that may often seem overwhelming The Death of a Child is filled with stories of people who have lost a child and how they dealt with the reality of that event This collection of life giving lessons touches on a wide range of emotions and situations that parents may encounter after the death of their child Chapter titles include Creating a New Normal Riding the Roller Coaster of Grief Cherishing the Seasons Singing Their Song *Parent Grief* Paul C. Silverman, Madelyn Kelly, 2009 When children lose someone they love life is never the same In this sympathetic book the authors advocate an open honest approach suggesting that our instinctive desire to protect children from the reality of death may be more harmful than helpful **Surviving the Loss of a Child** Elizabeth B. Brown, 2010-03 Revised and updated this tender book offers encouragement and hope to those who may think they will never be able to get on with life after losing a child **Why My Child?** Stephanie A. Carson, 2009-09 No parent can ever prepare for the death of a child period When a child dies a parent's world is shattered There are no words no explanations no information that can ever make sense out of a child dying before a parent Why My Child A Clinical Guide for Helping Parents Survive the Sudden Death of a Child provides clinicians grief counselors clergy and other professionals or paraprofessionals a clearer understanding of the unique issues surrounding the parental loss of a child In addition to helping foster more appropriate clinical interventions and therapeutic support for bereaved parents Why My Child outlines more realistic expectations for coping with such a life changing loss While nothing can take away the pain of losing a child there are ways of supporting bereaved parents to help make their pain more bearable As a marriage and family therapist former clinical director of a mental health department adjunct professor and as a parent whose adult child died unexpectedly I wholeheartedly recommend this powerful book as a much needed tool on the healing journey of grief Thank you Stephanie for contributing your insight skills and wisdom to those who are so much in need Shari Lowder M S LMFT Clinical Consultant and Supervisor Catholic Charities Professional Counseling Services Catholic Charities San Bernardino Riverside **Losing a Parent to Death in the Early Years** Alicia F. The guide also addresses common problems for grieving parents including dealing with marital stress, helping surviving siblings, dealing with hurtful advice and exploring feelings of guilt. This compassionate resource will aid parents who have been through the death of a child, whether the passing happened recently or many years ago, whether the child was young or an adult.

Parenting After the Death of a Child Jennifer L. Buckle, Stephen J. Fleming, 2011-01-19 The death of a child has a tremendous and overwhelming impact on parents and siblings, completely altering the psychological landscape of the family. In the aftermath of such a tragedy, parents face the challenge of not only dealing with their own grief but also that of their surviving children. How can someone attempt to cease parenting a deceased child while maintaining this role with his/her other children? Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children? *Parenting After the Death of a Child: A Practitioner's Guide* addresses this complex and daunting dilemma. Following on the heels of a qualitative research study that involved interviewing bereaved parents, both fathers and mothers, Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians, students and grieving parents. The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way, demonstrating the strength and importance of their book for the counseling field.

Finkbeiner, 2012-12-11 For a parent losing a child is the most devastating event that can occur Most books on the subject focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Based on extensive interviews and grief research Finkbeiner explains how parents have changed five to twenty five years after the deaths of their children The first half of the book discusses the short and long term effects of the child's death on the parent's relationships with the outside world that is with their spouses other children friends and relatives The second half of the book details the effect on the parents internal world their continuing sense of guilt their need to place the death in some larger context and their inability sometimes to consistently do so their new set of priorities the nature of their bond with the lost child and the subtle and creative ways they have of continuing that bond Finkbeiner's central point is not so much how parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner's is a genuine and moving search to come to

terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived

Children and Grief J. William Worden, 1996 Drawing upon extensive interviews and assessments of school age children who have lost a parent to death this book offers a richly textured portrait of the mourning process in children The volume presents major findings from the Harvard Child Bereavement Study and places them in the context of previous research providing insights on both the wide range of normal variation in children s experience of grief and the factors that put bereaved children at risk The book also compares parentally bereaved children with those who have suffered loss of a sibling to death or of a parent through divorce exploring similarities and differences in these experiences of loss A concluding section explores the clinical implications of the findings and includes a review of intervention models and activities as well as a screening instrument designed to help identify high risk bereaved children
