Reflecting the nature of this issue the volume is notably interdisciplinary with contributions from scholars in psychology sociology human development family studies gender studies sexuality studies legal studies social work and anthropology. Additionally scholarship from regions beyond the U S including England Australia Canada and South Africa is presented. In addition to gender and sexuality all contributors address issues of social class race and ethnicity in their chapters

Parenting Across the Life Span Jane Beckman Lancaster, Research on parenting through the life course has developed around two separate approaches. Evolutionary biology provides fresh perspectives from life history theory using behavioral ecology and parental investment theory. At the same time the social and behavioral sciences integrates research from long term studies of individual development and from the collection of life histories. This path breaking book advances evolutionary life history research by integrating perspectives of these two approaches into a biosocial science of the life course. It examines parenthood as a commitment extending throughout life and focuses on the impact on parental and child behavior of changes in the timing distribution and intensity of parental investment. This perspective is particularly appropriate for research on parenting since the family is the universal human institution within which the bearing and rearing of children has been based and which transmits traditions beliefs and values to the young

What is a Parent Andrew Bainham, Shelley Day Sclater, Martin Richards, 1999-07-01

This collection of essays is the product of a series of seminars held at the University of Cambridge in 1998 under the auspices of the newly formed Cambridge Socio Legal Group. The book presents an interdisciplinary exploration of the nature of parenthood and its various manifestations in contemporary society. It is divided into three sections dealing respectively with defining parenthood new issues in contemporary parenting and parenting post divorce. Each contributor addresses the central question What is a Parent from the perspective of his or her own discipline thus bringing together ideas about parents derived from law sociology psychology biology and criminology. Despite the familiar and apparently obvious answer to this question the notion of parent emerges from the analysis as a contested concept. Definitions are various and fluid parenting practices are by no means fixed and ideologies which frame who parents are and what they do are subject to disruptions from several quarters. In short the essays in this book show the ways in which parent like child is a term with a shifting meaning and parenthood refers to a fluid set of social practices which are historically and culturally situated.

Handbook of Parenting: Being and becoming a parent Marc H. Bornstein, 2002 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny *Fatherhood and Family Policy* M. E. Lamb, A. Sagi, 2014-02-25 First published in 1984 In the last two decades countries throughout the Western world have witnessed dramatic changes in social attitudes concerning sex roles The aim of this book is to review the evidence concerning a the factors that limit or constrain male involvement in child care b the ways in which some of these factors are being or might be changed and c the effects of traditional and increased paternal involvement on men women and children

[Adolescents and Their Families](#) Richard M. Lerner, Domini R. Castellino, 2013-12-02 First published in 1999 The adolescent period is marked by changes in the biological psychological cognitive and social dimensions of the individual as well as by changes in the adolescents multilevel context i e the peers family school and other institutions in his or her ecology Adolescence is a dynamic period one which exemplifies the

importance of understanding the relations between the developing individual and his or her changing context The articles included in this volume represent the current range of scholarship pertaining to adolescents and their families and exemplify the use of such an approach The articles underscore the continual importance of the family across adolescence *The Psychology of Grandparenthood* Peter K. Smith, 2017-09-29 The majority of people will now spend about one third of their lives as grandparents yet developmental psychologists have largely ignored the nature of the grandparental role and the influence which grandparents can have on grandchildren Originally published in 1991 this book redresses the balance and uses life span evolutionary and psychodynamic theoretical frameworks to provide a comprehensive analysis of the phenomenon of grandparenthood from cross cultural perspectives Much recent work in developmental psychology has disregarded the extended family in favour of the two generational nuclear family of parents and children But grandparents do have a significant role in family relationships and children's development This volume contains detailed discussion of intergenerational transmission of parenting skills cooperation and conflict in three generational families and the ways in which grandparents and grandchildren perceive one another The importance of considering social and cultural contexts of development applies to grandparents just as much as to other areas of human development Kinds of family structure social policies regarding employment health and housing attitudes to marriage and even particular historical events all have an impact on the position and role of grandparents and on stereotypes of old age These factors vary considerably from country to country Our understanding of grandparenthood can only be enriched by learning about the variety of ways in which it is expressed in different cultural settings Most previous research has been confined to the USA This book is truly international containing contributions from Britain Canada Finland Italy the Netherlands Poland West Germany and the USA International comparisons enable us to see which elements are essential to grandparenthood and which are culture dependant In most Western countries the population is ageing and this sort of study is becoming vitally important *The Psychology of Grandparenthood* is required reading for anybody who is professionally involved with the elderly and for psychologists interested in development the life span and family systems **The Oxford Handbook of Poverty and Child Development** Valerie Maholmes, Rosalind B. King, Ph.D., 2012-05-21 Comprehensive and integrative *The Oxford Handbook of Poverty and Child Development* describes the contextual and social ecology of children living in poverty and illuminates the biological and behavioral interactions that either promote optimal development or that place children at risk of having poor developmental outcomes **Handbook of Parenting** Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the *Handbook of Parenting* brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the *Handbook* look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores

house shelves of how to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence based. The Handbook of Parenting is Period. Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting, each with her or his own customs and agenda, and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I on The Parent show just how rich and multifaceted is the constellation of children's caregivers. Considered first are family systems, and then successively mothers and fathers, coparenting and gatekeeping between parents, adolescent parenting, grandparenting, and single parenthood, divorced and remarried parenting, lesbian and gay parents, and finally sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical, personality, and intellectual characteristics of the individual. The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood, and stages of parental development, and then chapters turn to parents' well-being, emotions, self-efficacy, cognitions, and attributions, as well as socialization, personality in parenting, and psychoanalytic theory. These features of parents serve many functions; they generate and shape parental practices, mediate the effectiveness of parenting, and help to organize parenting.

On New Shores Susan S. Chuang, Robert P. Moreno, 2008-01-01 *On New Shores* focuses on immigrant fathers in North America and provides readers with a richer and more comprehensive approach to how researchers, practitioners, and social policymakers can examine immigrant fathering among ethnic minority families. The chapters focus on the various methodological advances used to explicitly investigate immigrant fathers.

Retrospect and Prospect in the Psychological Study of Families James P. McHale, Wendy S. Grolnick, 2001-10 This book assembles 11 of the leading thinkers and researchers in the field of family psychology to create a compendium summarizing both what psychology researchers have learned about the family and where the field should be going next. It evolved after the volume's contributors met with other distinguished family scholars to discuss family influences on child development and to ponder how this knowledge could be used to benefit families and children. This volume includes approaches to the family that feature multiple levels and topics of focal interest to benefit anyone interested in the family. Central topics include mothering, fathering, marriages, family group processes, sibling relations, and families as systems. In addition, three senior authors offer road maps to detect and suggest challenges in research on parenting, b) marital and family dynamics, and c) family systems in the years ahead. In keeping with the theme of how research affects the lives of families outside the university lab settings, this volume

includes a chapter on the interface between family research and law This book closes with a big picture analysis and critique of what is known and not known Psychologists anthropologists sociologists and public policymakers interested in the family should especially find this volume of interest Parenting Evaluations for the Court Lois Oberlander Condie,2007-05-28
