Parenting Evaluations For The Court:

Conducting Child Custody Evaluations Philip M. Stahl, 1994-08-15 This important contribution to understanding the whole process of conducting child custody evaluation based on the author's extensive experience examines in detail the complex questions and issues involved. The many topics addressed include interviewing parents and children testifying in court, writing custody evaluations, assessing the capacity to parent, assessing the attachment of children to their parents, planning custody and parental access, children's adjustment to divorce, domestic violence, drug and alcohol abuse, mental illness, parental alienation, and on-going evaluation.

Conducting Child Custody Evaluations Philip M. Stahl, 2010-08-12 Covering the mental health expert's many roles as therapist, mediator, evaluator, consultant to attorneys, expert witness, and more, Philip M. Stahl's *Conducting Child Custody Evaluations: From Basic to Complex Issues* addresses key topics such as the best interests of the child, custody and time share, divorce, and its impact on children and children's developmental needs. From tackling the terror of testifying to critiquing your own child custody evaluations and avoiding bias inherent in this work, this practical and easy-to-read book offers comprehensive coverage vital to practitioners in this field.

Parenting Plan Evaluations Kathryn Kuehnle, Leslie Drozd, 2012-01-09 When conducting parenting plan evaluations, mental health professionals need to be aware of a myriad of different factors. More so than in any other form of forensic evaluation, they must have an understanding of the most current findings in developmental research, behavioral psychology, attachment theory, and legal issues to substantiate their opinions. As such, there is an essential need for a text focused on translating and implementing research associated with the most important topics within the family court. This book addresses this gap in the literature by presenting an organized and in-depth analysis of the current research and offering specific recommendations for applying these findings to the evaluation process. Written by experts in the child custody arena, chapters cover issues associated with the most important and complex issues that arise in family court, such as attachment and overnight timesharing with very young children, dynamics between divorced parents and children's potential for resiliency, co-parenting children with chronic medical conditions and developmental disorders, domestic violence during separation and divorce, gay and lesbian co-parents, and relocation, among others. The scientific information provided in these chapters assists forensic mental health professionals to proffer empirically based opinions, conclusions, and recommendations.

Parenting Plan Evaluations is a must-read for legal practitioners, family law judges, and attorneys and other professionals seeking to understand more about the science behind child custody evaluations.

Clinician's Guide to Child Custody Evaluations Marc J. Ackerman, 2002-02-28 Comprehensive coverage of every phase of the child custody evaluation process.
