Children's Rights and the Developing Law Jane Fortin, 2003-04 This text considers the developing law in England and Wales as it applies to the burgeoning and confusing subject of the rights of children It examines the extent to which the emerging legal principles can be harnessed to fulfil those rights Parents' Rights, 1999 **Parental Rights and**

Responsibilities Act of 1995 United States. Congress. House. Committee on the Judiciary. Subcommittee on the Constitution, 1997 **A Different Kind of Discipline** Tony Humphreys, 1998-09-01 Discipline is a topical issue It safeguards our rights as individuals and without appearing to impacts all our relationships In this ground breaking book bestselling author and psychologist Dr Tony Humphreys addresses the many issues surrounding discipline in both the broad and immediate sense With his usual clarity he helps define areas that have become confused in our rapidly changing and expanding society A common misconception is that discipline applies only to children but it is as much an issue for adults as it is for young people It is not about controlling others Dr Humphreys points out instead it is about helping others to learn to control themselves Discipline demands creativity commitment and time It is about parents teachers carers and communities working as partners True discipline is not abusive aggressive cynical or manipulative It is about clear communication consistent application adaptability support and co operation Most of all it is about respect acceptance and love In *A Different Kind of Discipline* Dr Humphreys guides us through steps to create a positive environment in homes schools and communities where mutual respect and thus discipline all have their place *What Is Right for Children?* Karen Worthington, 2016-02-11 Combining feminist legal theory with international human rights concepts this book examines the presence participation and treatment of children in a variety of contexts Specifically through comparing legal developments in the US with legal developments in countries where the views that children are separate from their families and potentially in need of state protection are more widely accepted The authors address the role of religion in shaping attitudes about parental rights in the US with particular emphasis upon the fundamentalist belief in natural lines of familial authority Such beliefs have provoked powerful resistance in the US to human rights approaches that view the child as an independent rights holder and the state

as obligated to provide services and protections that are distinctly child centred. Calling for a rebalancing of relationships within the US family to become more consistent with emerging human rights norms, this collection contains both theoretical debates about and practical approaches to granting positive rights to children. Teaching Exceptional Children Mojdeh Bayat, 2016-11-10. Teaching Exceptional Children is an ideal textbook for introductory graduate and undergraduate courses on early childhood special education and teaching in inclusive classrooms. Bayat's clear and accessible writing, a visually appealing design, and focused pedagogy in each chapter help make it possible to cover a significant amount of material. This powerful text identifies specific behavioral characteristics and presents theoretical information grounded in neuroscience and child development research for a wide range of disabilities. Research-based best practices for effectively working with children with various disabilities in inclusive classrooms are provided in each chapter. The second edition has been fully updated based on the DSM 5 and includes new sections on contemporary issues in inclusion of children with disabilities in early childhood classrooms such as challenging behaviors, using technology at risk, children promoting mental health, and family issues. A robust pedagogical program along with online resources for instructors and students provides full support, including Chapter Objectives and Key Terms, help frame each chapter. Discussion, Critical Thinking, Essay, Short Answer, and Review Questions at the beginning throughout and concluding chapters prompt students to fully engage with the material. Homework, Field Assignments provide opportunities for students to apply their knowledge to real world situations. Real Life Vignettes illustrate concepts in action. Color Photos, Figures, and Tables clarify concepts in a visually engaging way. Recommended Resources and References offer guidance for further study. The companion website <http://routledge textbooks.com/textbooks/9781138802209> includes instructor resources for teaching and planning, including an Instructor's Manual with additional ideas for assignments and projects, web links, and video links with reflection questions, a test bank, and PowerPoint lecture slides. The site also includes tools for students to engage with and master the concepts and terminology introduced in the book.

Improving Parental Involvement Garry Hornby, 2000-03-01. It is acknowledged that effective schools involve parents effectively. This study describes how schools can achieve this aim and how to increase standards of achievement. It covers the field from nursery to secondary schools and is aimed at teachers, governors, welfare workers, advisers, and PTAs.

Procreative Justice Erik Magnusson, 2025-07-31. This book explores how considerations of justice apply to procreative decision making. Despite its immense personal significance, procreation is an inherently other-regarding endeavor. By its very nature, the decision to procreate is the decision to bring into existence another morally considerable being, one who will be exposed to the full range of harms, benefits, and risks that accompany a typical human life, and one who cannot by its nature ever consent to being born. Moreover, when this decision is undertaken in a community of persons, it is also a decision to affect the lives of others in a host of profound, if often underappreciated ways, from its effects on population size and environmental sustainability to its consequences for a community's distribution of resources. In many ways, of course, these

interests coincide adults need children for their parenting projects societies need citizens for the maintenance of their institutions and children themselves are often happy to have been brought into existence However as the book demonstrates the various interests that are implicated by procreative decision making can also come into conflict as well and in ways that raise basic questions of justice Through a systematic examination of six of these questions the author argues that taking adequate stock of the conflicting interests at stake in procreative decision making leads to a narrower view of the conditions under which it is morally permissible to procreate and a much more demanding conception of our procreative responsibilities Procreative Justice will be of interest to researchers and advanced students working on the morality of procreation and related areas of philosophy including bioethics intergenerational ethics environmental ethics population ethics and the ethics of the family

Hillel Steiner and the Anatomy of Justice Stephen De Wijze,Matthew H. Kramer,Ian Carter,2009-06-02 In this volume essays by an international roster of contributors evaluate the political philosophy of contemporary philosopher Hillel Steiner The study concludes with a response by Steiner himself

The Subject of Care Eva Feder Kittay,Ellen K. Feder,2003-10-01 All people spend a considerable portion of their lives either as dependents or the caretakers of dependents The fact of human dependency a function of youth severe illness disability or frail old age marks our lives not only as those who are cared for but as those who engage in the work of caring In spite of the time energy and resources material and emotional social and individual that dependency care requires these concerns rarely enter into philosophical legal and political discussions In The Subject of Care feminist scholars consider how acknowledgement of the fact of dependency changes our conceptions of law political theory and morality as well as our very conceptions of self Contributors develop feminist understandings of dependency reassessing the place dependency occupies in our lives and in a just social order

Suffer the Children Richard P. Hiskes,2021 In 1973 Hillary Rodham Clinton famously stated that children s rights is a slogan in search of a definition used to bolster various arguments for peace and for specific rights but without any coherent conception of children as political beings In 1989 the United Nations established the basis for this definition in the Convention on the Rights of the Child CRC a document every nation in the world save the United States has ratified Still human rights theorists scholars and jurists continue to disagree as to the theoretical justification for children s human rights In Suffer the Children Richard P Hiskes establishes the first substantive theoretical foundation for the human rights of children As Hiskes argues recognizing the rights of children fundamentally alters the meaning and usefulness of human rights in a global context Ironically the case for children s rights as Hiskes argues should be seen as the evolution distillation or maturing of human rights in general Children s human rights will end the debate about whether groups can have rights because globally many rights claims today are precisely group claims including those from children Moreover Hiskes provides a new critical assessment of the United Nations CRC and explores child activism for human rights worldwide in courts on social networks and in public demonstrations to show how children are already claiming their rights in ways that

will fundamentally change the meaning both of rights themselves and of democratic processes Giving children rights in a way that avoids privileging any single cultural experience of children would make rights no longer a Western individualistic idea but a truly global one *The Broadview Anthology of Social and Political Thought - Volume 2: The Twentieth Century and Beyond* Andrew Bailey, Samantha Brennan, Will Kymlicka, Jacob T. Levy, Alex Sager, Clark Wolf, 2008-09-12 The second volume of this comprehensive anthology covers the twentieth and early twenty first centuries The anthology is broad ranging both in its selection of material by figures traditionally acknowledged as being of central importance and in the material it presents by a range of other figures The material in this volume is presented in three sections The first Power and the State includes selections by such figures as Goldman Lenin Weber Schmitt and Hayek Among those included in the Race Gender and Colonialism section are de Beauvoir Gandhi Fanon and Young The third and by far the longest section Rights Based Liberalism and its Critics focuses on the many interrelated directions that social and political philosophy has taken since the publication of John Rawls s ground breaking *A Theory of Justice* in 1971 In order to better meet the needs of today s students the editors have made every effort to include accurate and accessible translations of the readings Additionally every selection has been painstakingly annotated and each figure is given a substantial introduction highlighting her or his major contributions within the tradition For figures of central importance the editors have included extended introductions that place the figure in the context of intellectual history as well as of political thought In order to ensure the highest standards of accuracy and accessibility the editors have consulted dozens of leading academics during the course of the volume s development many of whom have contributed introductory material as well as advice The result is an anthology with unparalleled pedagogical benefits The *Broadview Anthology of Social and Political Thought* sets the new standard for social and political philosophy instruction *The Child as Citizen* Felton Earls, 2011-06-09 Marking the 20th anniversary of the United Nations General Assembly s adoption of the Convention on the Rights of the Child CRC this volume of the *ANNALS* considers conceptual legal and practical issues related to the realization of children as citizens **German Constitutional Law** Christian Bumke, Andreas Vosskuhle, 2019 This revised English version of the seventh edition of the Casebook *Verfassungsrecht* includes a new outline of the German constitution the BVerfG Court and its jurisprudence It condenses more than six decades of constitutional jurisprudence in order to familiarize readers with the style technique and language of the Court *Constitutionalism in Asia* Wen-Chen Chang, Li-ann Thio, Kevin YL Tan, Jiunn-rong Yeh, 2014-02-19 This book of text cases and materials from Asia is designed for scholars and students of constitutional law and comparative constitutional law The book is divided into 11 chapters arranged thematically around key ideas and controversies enabling the reader to work through the major facets of constitutionalism in the region The book begins with a lengthy introduction that critically examines the study of constitutional orders in Asia highlighting the histories colonial influences and cultural particularities extant in the region This chapter serves both as a provisional orientation towards the major constitutional developments seen

in Asia both unique and shared with other regions and as a guide to the controversies encountered in the study of constitutional law in Asia Each of the following chapters is framed by an introductory essay setting out the issues and succinctly highlighting critical perspectives and themes The approach is one of challenge and response whereby questions of constitutional importance are posed and the reader is then led by engaging with primary and secondary materials through the way the various Asian states respond to these questions and challenges Chapter segments are accompanied by notes comments and questions to facilitate critical and comparative analysis as well as recommendations for further reading The book presents a representative range of Asian materials from jurisdictions including Bangladesh China Hong Kong India Japan Mongolia Nepal Pakistan South Korea Sri Lanka Taiwan Timor Leste and the 10 ASEAN states

Justice and Legitimacy in Upbringing Matthew Clayton, 2006-04-06 Issues concerning the upbringing of children are among the most contested in modern political debate How should childrearing rights and resources be distributed between families To what extent are parents morally permitted to shape the beliefs and desires of their children At what age should children acquire adult rights such as the right to vote Justice and Legitimacy in Upbringing sets out a liberal conception of political morality that supports a set of answers to these questions which many liberals have been reluctant to accept The central argument is that the ideals of justice and individual autonomy place significant constraints on both governments and parents Clayton insists that while their interests should count directly in allocating childrearing rights parents should exercise their rights in accordance with these liberal ideals He argues that we owe our children a childhood that develops their sense of justice but in which further attempts to enrol them into particular religious practices for instance are illegitimate Justice and Legitimacy in Upbringing is a work of applied political philosophy that will be of interest to students of political theory the philosophy of education and social and public policy
