Love to Learn Isabelle C. Hau, 2025-02-11 The most important aspect of early childhood in general and education in particular is the quality and care of the relationships a child forms Love to Learn shows how to build and develop these relationships and unlock every child s true potential Early relationships are the key to healthy brain development resilience and lifelong flourishing Children need to be loved to be valued to interact and to be listened to When children have the space and time to play and explore through nurturing positive relationships then children learn But loving relationships are precisely what so many children are missing and modern factors are making it more difficult for children to build these necessary bonds Kids are growing up in smaller families with fewer siblings and in more single parent households They have fewer adult family friends and mentors They have less contact with grand parents and grand adults They spend 60% less time with friends than children did a decade ago They play outside less half the time spent by their parent s generation They find themselves increasingly immersed in solitary realms of screens a modern sanctuary where parents seek refuge as well Many kids are so overscheduled they have less time to build friendships Love to Learn offers a vision for a future where learning is relational and love is a literacy It is a provocative paradigm shift from child centered education to relationship centered learning It weaves in stories of perseverance empathy creativity and showcases innovations anchored in the latest neuroscience and technology advance all driven by the desire to unlock the inherent human potential in any child This hope filled book seeks to change how we raise our children how we run early learning environments and how we construct care full communities It aims to inspire and engage readers catalyze new solutions and in doing so change our understanding of childhood itself

Census Commissioner, 1923 *Early and School-Age Care in Santa Monica* Ashley Pierson, Lynn A. Karoly, Gail L. Zellman, Megan K. Beckett, 2014-04-22 The landscape of early learning and out of school time programs in the City of Santa Monica is complex with numerous providers and funding streams This complexity reflects its evolution in response to changes in federal state and local priorities and initiatives Future shifts in funding levels program auspices and other features are likely In July 2012 the City of Santa Monica Human Services Division

and the Santa Monica Malibu Unified School District contracted with the RAND Corporation to conduct an assessment of child care programs in Santa Monica The study was motivated in part by the perception of some stakeholders that the system of care had become fragmented and complex Additional motivations were the uncertainty of resource streams stemming from recent and anticipated state and federal budget cuts and a desire to ensure youth well being in the community The project sought to assess how well Santa Monica s child care programs meet the needs of families including child care and early education programs serving children from birth to kindergarten entry as well as care for school aged children focusing on kindergarten through eighth grade in the hours before and after school and in the summer Overall recommendations for improvement focused on advancing access quality service delivery and financial sustainability
