Paris Et Ses Environs 90:

Le Corbusier and the Occult Jan Birksted,2009 Le Corbusier grew up in La Chaux de Fonds in Switzerland a city described by Karl Marx as one unified watchmaking industry Among the unifying social structures of La Chaux de Fonds was the Loge L Amiti the Masonic lodge with its francophone moral social and philosophical ideas including the symbolic iconography of the right angle rectitude and the compass exactitude Le Corbusier would later describe these as my guide my choice and as his time honored ideas ingrained and deep rooted in the intellect like entries from a catechism Through exhaustive research that challenges long held beliefs J K Birksted s *Le Corbusier and the Occult* traces the structure of Le Corbusier s brand of modernist spatial and architectural ideas based on startling new documents in hitherto undiscovered family and local archives Publisher

The Deaths of Henri Regnault Marc Gotlieb,2016-06-09 This is the first book in many years about the nineteenth century French artist Henri Regnault Controversial and celebrated in his day Regnault did not live long He died at the age of 28 in the Franco Prussian War becoming a hero of the French nation What sets him apart from the more conventional members of the French academy is his great skill in painting Oriental exotic subjects and doing so in a highly materialistic vein designed to produce through elements like gold paint garish colors and odd details blatant amusement for the eye In a word his images are both delightful and awful Gotlieb s book combines biography history and comparative readings of works by Regnault with those by other French artists such as Delacroix Fromentin and Renoir It also importantly explores the afterlives of Regnault as a cultural and artistic figure as well as his diminishment during the rise of modernism and his eventual demise in the history of art

Working with Limestone Vibeke Olson,2017-05-15 This new volume in the AVISTA series focuses on the study of medieval limestone As the principal building material in the Middle Ages and a prized medium for architectural sculpture limestone played a significant role in medieval artistic manufacture The choice of material inherently informed the final product thus understanding the material and its uses gives insight into the medieval creative process and the production driven choices that were made by masons and sculptors Quality limestone was a highly sought after commodity that was often shipped across great distances yet in other instances masons made do with locally available resources Through an intensive study of medium many broader topics can be addressed for instance the economics of medieval construction the artistic process or the application of modern technology in understanding and preserving medieval buildings and sculpture The papers collected in this volume present the depth and scope of recent scholarship in the field through a wide ranging overview of the state of the discipline of medieval stone studies They address such

methodological approaches to the study of limestone as the use of neutron activation analysis to determine quarries of origin issues of labor and transportation as well as issues faced in the cleaning and conservation of limestone This volume is the first comprehensive study in English that investigates limestone as an essential component of large scale medieval artistic production and as such it is a valuable resource for both students and scholars in the field Second Catalogue of the Library of the Peabody Institute of the City of Baltimore, Including the Additions Made Since 1882 Johns Hopkins University.
