Parks And Woodlands Of London:

The Parks and Woodlands of London Andrew Crowe, 1987-01-01 Parks , 1976 **London's Urban Landscape** Christopher Tilley, 2019-05-07

London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape Edited by Christopher Tilley the volume is inspired by phenomenological thinking and presents fine grained ethnographies of the practices of everyday life in London In doing so it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture The first part of the volume considers the residential sphere of urban life discussing in detailed case studies ordinary residential streets housing estates suburbia and London's mobile linear village of houseboats The second part analyses the public sphere including ethnographies of markets a park the social rhythms of a taxi rank and graffiti and street art London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places and the paths of movement between them What stories do door bells and house facades tell us about contemporary life in a Victorian terrace How do antiques acquire value and significance in a market How does living in a concrete megastructure relate to the lives of the people who dwell there These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life

A Guide to the Parks, Woodlands and Commons of Greater London Andrew Crowe,1987-02-01

Parks in Medieval England S. A. Mieson,2009-07-16 Parks were prominent and indeed controversial features of the medieval countryside but they have been unevenly studied and remain only partly understood Stephen Mieson provides the first full length study of the subject examining parks across the country and throughout the Middle Ages in their full social economic jurisdictional and landscape context The first half of the book investigates the purpose of these royal and aristocratic reserves which have been variously claimed as hunting grounds economic assets landscape settings for residences and status symbols An emphasis on the aristocratic passion for the chase as the key motivation for park making provides an important challenge to more recent views and allows for a deeper appreciation of the connection between park making and the expression of power and lordship The second part of the volume examines the impact of park creation on wider society from the king and aristocracy to peasants and townsmen Instead of the traditional emphasis on the importance of royal regulation greater attention is paid to the effects of lordly park making on other members of the landed elite and ordinary people These widespread enclosures interfered with customary uses of woodland and waste hunting practices roads and farming not surprisingly they could become a focus for aristocratic feud popular protest and furtive resistance Combining historical archaeological and landscape evidence this ground breaking work provides fresh insight into contemporary values and how they helped to shape the medieval landscape

The Birds of London Andrew Self,2014-02-27 The first comprehensive avifauna for the London area ever published covering the status distribution and history of every species on the regional list in rich detail The parks reservoirs rooftops and gardens of London here defined as the area within 20 miles of St Paul s Cathedral have a surprisingly rich avifauna including a healthy population of one of Britain s rarest breeders the Black Redstart The region also has a remarkable list of rarities in recent years Canary Wharf has proven to be a magnet for vagrants while one of the very few British records of Tengmalm s Owl hails from Plaistow an unfortunate bird stoned to death by local urchins in 1877 Some species like the Peregrine Falcon Black headed Gull and Ring necked Parakeet have seen their fortunes soar over recent decades others such as House Sparrow have suffered a population collapse While as recently as a century ago the London area had breeding populations of birds such as Wryneck and Red backed Shrike which are now nationally extinct The County Avifauna series provides detailed information on the range and status of bird species at county level

Peterken,1996-03-28 A fascinating account of woodland natural history for all those concerned with woodland management and ecology Garden and Forest Charles Sprague Sargent,1894 The Encyclopaedia Britannica ,1903 **Shades of Green** Ruth Tittensor,2016-10-31 This book takes a fresh look at the most disliked tree in Britain and Ireland explaining the reasons it was introduced and why it became ubiquitous in the archipelagos of northwest Europe Sitka spruce has contributed to the Pacific Coast landscapes of North America for over ten millennia For the Tlingit First Nation it is the most important tree in terms of spiritual relationships art and products in daily use such as canoes containers fish traps and sweet cakes Since the late nineteenth century it has also been the most important tree to the timber industry of west coast North America The historical background to the modern use of Sitka spruce is explored The lack of cultural reference may explain negative public response when treeless uplands in the UK and Ireland were afforested with introduced conifer species particularly Sitka spruce following two World Wars The multipurpose forestry of today recognizes that Sitka spruce is the most important tree to the timber industry and to a public which uses its many products but fails to recognize the link between growing trees and bought goods The apparently featureless and wildlife less Sitka spruce plantations in UK uplands are gradually developing recognizable ecological features Sitka spruce has the potential to form temperate rain forests this century as well as to produce much needed goods for society The major contribution of Sitka spruce to landscapes and livelihoods in western North America is by contrast widely accepted But conserving natural old growth forests sustaining the needs of First Nations and producing materials for the modern timber industry will be an intricate task *An Environmental History of Wildlife in England 1650 - 1950* Tom Williamson,2013-12-05 Choice Outstanding Academic Title 2014 While few

detailed surveys of fauna or flora exist in England from the period before the nineteenth century it is possible to combine the evidence of historical sources ranging from game books diaries churchwardens accounts and even folk songs and our wider knowledge of past land use and landscape with contemporary analyses made by modern natural scientists in order to model the situation at various times and places in the more remote past This timely volume encompasses both rural and urban environments from 1650 to the mid twentieth century drawing on a wide variety of social historical and ecological sources It examines the impact of social and economic organisation on the English landscape biodiversity the agricultural revolution landed estates the coming of large scale industry and the growth of towns and suburbs It also develops an original perspective on the complexity and ambiguity of man animal relationships in this post medieval period **Reports** Great Britain. Parliament. House of Lords,1830 **Garden and Forest** ,1888 The High Middle Ages Trevor Rowley,2019-07-08 Originally published in 1986 The High Middle Ages begins in the late twelfth century and ends not with the arrival of the Tudor monarchs in 1485 but with the destruction of the wealth and power of the Church in the 1530s The book looks at how the passing of the monasteries marked the transition from an economic and social system based on a balance however shifting and uneasy between the church and state to a supreme reign of the church The book discusses how the later middle ages were a period not of decay but of rapid change It examines how social and economic convulsion emerged in a society marked by restless energy and creativity The three centuries covered in the book mark a key period of extensive change to the landscape and environment of England between 1200 to 1550 *General Catalogue of Printed Books* British Museum.
