*Parks for Profit* Kevin Loughran, 2022-01-25 A new kind of city park has emerged in the early twenty first century Postindustrial parks transform the derelict remnants of an urban past into distinctive public spaces that meld repurposed infrastructure wild looking green space and landscape architecture For their proponents they present an opportunity to turn disused areas into neighborhood anchors with a host of environmental and community benefits Yet there are clear economic motives as well successful parks have helped generate billions of dollars of city tax revenues and real estate development Kevin Loughran explores the High Line in New York the Bloomingdale Trail 606 in Chicago and Buffalo Bayou Park in Houston to offer a critical perspective on the rise of the postindustrial park He reveals how elites deploy the popularity and seemingly benign nature of parks to achieve their cultural political and economic goals As urban economies have become restructured around finance real estate tourism and cultural consumption parks serve as civic shields for elite oriented investment Tracing changing ideas about cities and nature and underscoring the centrality of race and class Loughran argues that postindustrial parks aestheticize past disinvestment while serving as green engines of gentrification A wide ranging investigation of the political cultural and economic forces shaping park development *Parks for Profit* reveals the social inequalities at the heart of today's new urban landscape

**Profit** Mark Stoll, 2022-11-08 Profit getting more out of something than you put into it is the original genius of homo sapiens who learned how to unleash the energy stored in wood exploit the land and refashion ecosystems As civilization developed we found more and more ways of extracting surplus value from the earth often deploying brutally effective methods to discipline people to do the work

needed Historian Mark Stoll explains how capitalism supercharged this process and traces its many environmental consequences The financial innovations of medieval Italy created trade networks that with the European discovery of the Americas made possible vast profits and sweeping cultural changes to the detriment of millions of slaves and indigenous Americans the industrial age united the world in trade and led to an energy revolution that changed lives everywhere But when efficient production left society awash in goods a new sort of capitalism predicated on endless individual consumption took its place This story of incredible ingenuity and villainy begins in the Doge's palace in medieval Venice and ends with Jeff Bezos aboard his own spacecraft Mark Stoll's revolutionary account places environmental factors at the heart of capitalism's progress and reveals the long shadow of its terrible consequences
