Universities and the Myth of Cultural Decline Jerry Herron, 1988 Jerry Herron argues that the vision of culture as an end in itself has been all too thoroughly fulfilled in the present state of humanities education but only because the humanities have lost their social function In this book he attempts to provide a constructive alternative to the nostalgia and pessimism currently prevailing In Herron s view the humanities are not really irrelevant it is that the intellectual and political conversation that they represent is only latent rather than publicly manifest The humanities can only be justified in a world of work and power by proving useful in that world The academic humanities harbor a general intellectual conversation that could potentially be interesting and even useful to society at large Arguing that the prevailing analyses are wide of the mark Herron recommends that universities undertake to promote a new cultural literacy Based on a collaborative enterprise open to all its focus is the effective sharing of information and experience **Demographic Trends and the Scientific and**

Engineering Work Force United States. Congress. House. Committee on Science and Technology. Task Force on Science Policy, 1986 **Women in Academe** Mariam K. Chamberlain, 1989-03-16 The role of women in higher education as in many other settings has undergone dramatic changes during the past two decades This significant period of progress and transition is definitively assessed in the landmark volume Women in Academe Crowded out by returning veterans and pressed by social expectations to marry early and raise children women in the 1940s and 1950s lost many of the educational gains they had made in previous decades In the 1960s women began to catch up and by the 1970s women were taking rapid strides in academic life As documented in this comprehensive study the combined impact of the women s movement and increased legislative attention to issues of equality enabled women to make significant advances as students and to a lesser extent in teaching and academic administration Women in Academe traces the phenomenal growth of women s studies programs the notable gains of women in non traditional fields the emergence of campus women s centers and research

institutes and the increasing presence of minority and re entry women Also examined are the uncertain future of women s colleges and the disappointingly slow movement of women into faculty and administrative positions This authoritative volume provides more current and extensive data on its subject than any other study now available Clearly and objectively it tells an impressive story of progress achieved and of important work still to be done **Resources in Education** ,1993 Gypsy Academics and Mother-teachers Eileen E.
