Participation and Political Equality Sidney Verba, Norman H. Nie, Jae-on Kim, 1978-10-31 In this survey of political participation in seven nations Nigeria Austria Japan India the Netherlands Yugoslavia and the United States the authors examine the relationship between social economic and educational factors and political participation The book provides insight into an ongoing debate among political scientists and sociologists why is political participation in some nations distributed evenly across economic social and educational lines whereas other nations foster participation only by their privileged classes The book treats politics not only as a dependent variable influenced by socioeconomic factors but also as an independent variable that affects levels of political participation through variations in party systems and linkages between parties and other organizations

Nie, 1987-01-16 Participation in America represents the largest study ever conducted of the ways in which citizens participate in American political life Sidney Verba and Norman H Nie addresses the question of who participates in the American democratic process how and with what effects They distinguish four kinds of political participation voting campaigning communal activity and interaction with a public official to achieve a personal goal Using a national sample survey and interviews with leaders in 64 communities the authors investigate the correlation between socioeconomic status and political participation Recipient of the Kammerer Award 1972 Participation in America provides fundamental information about the nature of American democracy

Understanding the Political Culture of Hong Kong: The Paradox of Activism and Depoliticization Lam Wai-man, 2015-06-03 This book challenges the widely held belief that Hong Kong's political culture is one of indifference The term political indifference is used to suggest the apathy naivete passivity and utilitarianism of Hong Kong's people toward political life Taking a broad historical look at political participation in the former colony Wai man Lam argues that this is not a valid view and demonstrates Hong Kong's significant political activism in thirteen selected case studies covering 1949 through the present Through in depth analysis of these cases she provides a new understanding of the nature of Hong Kong politics which can be described as a combination of political activism and a culture of depoliticization

Understanding Political Theory Mr. Rohit Manglik, 2023-03-23 In this book we will study about the subject of Understanding Political Theory exploring its key themes developments and importance in the broader context of the discipline The book offers foundational and in depth understanding tailored to build academic insight and critical thought

Voice and Inequality Carew Boulding, Claudio A. Holzner, 2021 Understanding who participates in politics and in which kinds of activities is central to understanding how democracies work This book offers the first large scale empirical analysis

of political participation in 18 Latin American countries with a focus on understanding the political behavior of the region's poorest citizens. Poor people in Latin America vote, protest, and contact government officials at surprisingly high levels, approaching or exceeding levels of activism of individuals with significantly more resources and schooling. To explain this puzzling finding, we argue that key institutions of democracy, including civil society, political parties, and competitive party systems, are especially important for understanding the activism of poorer citizens and, as a result, have profound effects on inequalities in political participation.

Democratization in Taiwan Philip Paolino, 2016-12-05 Taiwan faces many of the same challenges as most newly democratized nations, such as the legacy of an authoritarian government, a traditional culture, ethnic division, and non-majoritarian political institutions. Each chapter in this volume sheds light on the democratization process. The contributors examine questions concerning the state of political trust, ethnicity, democratic values, and political institutions. In the post-Cold War era, when America's foreign policy is focusing on how best to foster democratic transition throughout the world, the lessons that can be learned from Taiwan's democratization impart valuable lessons to students and scholars.

The Political Theory of Conservative Economists Conrad Waligorski, 1990 A study of the political theory that underlies the conservative economic thought of such economists as Milton Friedman, James Buchanan, and Friedrich Hayek and its implications for public policy. The author analyzes the political content of ideas that justify a laissez-faire policy.

Peacebuilding and Ex-Combatants Johanna Söderström, 2014-12-17 The book examines how ex-combatants in post-war and peacebuilding settings engage in politics, as seen in the case of Liberia. The political mobilization of former combatants after war is often perceived as a threat, ultimately undermining the security and stability of the state. This book questions this simplified view and argues that understanding the political voice of former combatants is imperative. Their post-war role is not black and white; they are not just bad or good citizens but rather engage in multiple political roles: spoilers, victims, disengaged beneficiaries, as well as motivated and active citizens. By looking at the political attitudes and values of former combatants and their understanding of how politics functions, the book sheds new light on the political reintegration of ex-combatants. It argues that political reintegration needs to be given serious attention at the micro level but also needs to be scrutinized in two ways: first, through the level of political involvement, which reflects the extent and width of the ex-combatants' voice; second, in order to make sense of political reintegration, we also need to uncover what values and norms inform their political involvement. The content of their political voice is captured through a comparison with democratic ideals. Based on interviews with over 100 Liberian ex-combatants, the book highlights that their relationship with politics overall should be characterized as an expression of a politics of affection. This book will be of much interest to students of peacebuilding, African politics, democratization, political sociology, conflict resolution, and IR. Security Studies in general.
