Received 24 March 1977

This supplement to the 1976 edition of "Review of particle properties", Particle Data Group [Rev. Mod. Phys. 48, No. 2, Part II (1976)], contains tabulations of experimental data bearing on the "new particles" and related topics. Categories covered include charmed particles, ψ 's and their decay products, and heavy leptons. Errata to the previous edition are also given.

As in 1973, we have decided this year to publish only a supplement to the previous edition of the "Review of Particle Properties", rather than a complete update; the latter will appear instead in April 1978 in Physics Letters B.

¹ The Berkeley Particle Data Center is jointly supported by the U.S. Energy Research and Development Administration, the Office of Standard Reference Data of the National Bureau of Standards, and the National Science Foundation.

This supplement consists primarily of a Table and *Long and Listings* giving results relating to charmed particles, ψ 's and their decay products, heavy leptons, quarks, magnetic monopoles, intermediate bosons, and other proposed states. Several mini-reviews in the *Listings* discuss various aspects of these particles. Also presented are some cross section plots for e^+e^- and ψN scattering, which were not included in the 1976 edition. Finally, errata to the 1976 edition are given.
