Parting The Desert The Creation Of The Suez Canal:

Parting the Desert Zachary Karabell, 2009-08-26 Award winning historian Zachary Karabell tells the epic story of the greatest engineering feat of the nineteenth century the building of the Suez Canal and shows how it changed the world The dream was a waterway that would unite the East and the West and the ambitious energetic French diplomat and entrepreneur Ferdinand de Lesseps was the mastermind behind the project Lesseps saw the project through fifteen years of financial challenges technical obstacles and political intrigues He convinced ordinary French citizens to invest their money and he won the backing of Napoleon III and of Egypt's prince Muhammad Said But the triumph was far from perfect the construction relied heavily on forced labor and technical and diplomatic obstacles constantly threatened completion The inauguration in 1869 captured the imagination of the world The Suez Canal was heralded as a symbol of progress that would unite nations but its legacy is mixed **Parting the Desert** is both a transporting narrative and a meditation on the origins of the modern Middle East

Parting the Desert Zachary Karabell, 2003 The building of the Suez Canal was considered the greatest engineering feat of the 19th century but as Zachary Karabell shows in this book there was much more to it than just a marvel of construction In addition **Parting the Desert** describes an extraordinary meeting between East and West **The Boundless Sea** David Abulafia, 2019-09-16 From the beginning of history to the present a sweep of the world's oceans and seas and how they have shaped the course of civilization From the author of the acclaimed *The Great Sea* **Magnificent** radiates scholarship and a sense of wonder and fun *Simon Sebag Montefiore Book of the Year* *The Economist* David Abulafia's new book guides readers along the world's greatest bodies of water to reveal their primary role in human history The main protagonists are the three major oceans the Atlantic the Pacific and the Indian which together comprise the majority of the earth's water and cover over half of its surface Over time as passage through them gradually extended and expanded linking first islands and then continents maritime networks developed evolving from local exploration to lines of regional communication and commerce and eventually to major arteries These waterways carried goods plants livestock and of course people free and enslaved across vast expanses transforming and ultimately linking irrevocably the economies and cultures of Africa Europe Asia and the Americas Far more than merely another history of exploration **The Boundless Sea** shows how maritime networks gradually formed a continuum of interaction and interconnection Working chronologically Abulafia moves from the earliest forays of peoples taking hand hewn canoes into uncharted waters to the routes taken daily by supertankers in the thousands History on the grandest scale and scope written with passion and precision this is a project few could have undertaken Abulafia whom *The Atlantic* calls superb writer with a gift for lucid compression and an eye for the telling detail proves again why he ranks as one of the world's greatest storytellers **The Oxford Handbook of Modern Egyptian**

History Beth Baron, Jeffrey Culang, 2024 Until relatively recently scholars of Egyptian history understood the modern period to begin with the movement of European people and ideas to Egypt's northern shores precipitated by Napoleon's invasion in

1798 From this perspective modern Egyptian history was animated by the diverse and sometimes contradictory ways in which Egyptians responded over time to colonial power and modern forms of knowledge This handbook featuring 26 originally commissioned essays by top scholars in the field adds to a growing literature that complicates the facile colonizer colonized and modern tradition binaries undergirding this view Modern Egyptian history is a continuous process of translation and adaptation invention and reinvention Bringing together a dynamic and accomplished group of historians of Egypt the book maps the present state of modern Egyptian history highlighting the most promising avenues of research and laying new ground upon which future generations of scholars may build The contributors address both long persisting themes in the field though in new ways as well as new themes reshaping how we understand modern Egyptian history and thus Middle Eastern and global history These include environment family infrastructure intellectuals labor law literature medicine politics popular culture and slavery Within these categories they explore issues of gender race and class The questions these scholars consider reflect pressing contemporary concerns and debates including medical sovereignty and bodily autonomy the management of the environment the rights and movements of workers courts and legal struggles cultural expression production and reception and the relationship between the army state and society

The Great Sea David Abulafia, 2011-06-01 Connecting Europe Asia and Africa the Mediterranean Sea has been for millennia the place where religions economies and political systems met clashed influenced and absorbed one another In this brilliant and expansive book David Abulafia offers a fresh perspective by focusing on the sea itself its practical importance for transport and sustenance its dynamic role in the rise and fall of empires and the remarkable cast of characters sailors merchants migrants pirates pilgrims who have crossed and re crossed it Ranging from prehistory to the 21st century The Great Sea is above all a history of human interaction Interweaving major political and naval developments with the ebb and flow of trade Abulafia explores how commercial competition in the Mediterranean created both rivalries and partnerships with merchants acting as intermediaries between cultures trading goods that were as exotic on one side of the sea as they were commonplace on the other He stresses the remarkable ability of Mediterranean cultures to uphold the civilizing ideal of convivencia living together Now available in paperback The Great Sea is the definitive account of perhaps the most vibrant theater of human interaction in history

The Letters of Richard Cobden Richard Cobden, 2007 The third volume of Cobden's Letters covers the Crimean War the Indian Mutiny and the preliminary negotiations over the Anglo French Commercial Treaty of 1860 It reveals the tension between public and private life experienced by Cobden from 1854 until 1859

To Rule the Waves Bruce Jones, 2022-11-22 From a brilliant Brookings Institution expert an important The Wall Street Journal and penetrating historical and political study Nature of the critical role that oceans play in the daily struggle for global power in the bestselling tradition of Robert Kaplan's The Revenge of Geography For centuries oceans were the chessboard on which empires battled for supremacy But in the nuclear age air power and missile systems dominated our worries about security

and for the United States the economy was largely driven by domestic production with trucking and railways that crisscrossed the continent serving as the primary modes of commercial transit. All that has changed as nine tenths of global commerce and the bulk of energy trade is today linked to sea based flows. A brightly painted forty foot steel shipping container loaded in Asia with twenty tons of goods may arrive literally anywhere else in the world how that really happens and who actually profits from it show that the struggle for power on the seas is a critical issue today. Now in vivid, closely observed prose Bruce D Jones conducts us on a fascinating voyage through the great modern ports and naval bases from the vast container ports of Hong Kong and Shanghai to the vital naval base of the American Seventh Fleet in Hawaii to the sophisticated security arrangements in the Port of New York. Along the way the book illustrates how global commerce works that we are amidst a global naval arms race and why the oceans are so crucial to America's standing going forward. As Jones reveals the three great geopolitical struggles of our time for military power for economic dominance and over our changing climate are playing out atop within and below the world's oceans. The essential question he shows is this: who will rule the waves and set the terms of the world to come. Shanghaiing Sailors Mark Strecker, 2014-05-19. Shanghaiing or forcing a man to join the crew of a merchant ship against his will plagued seafarers the world over between 1849 and 1915.

Perpetrators were known as crimps and they had no respect for a man's education, social status, race, religion or seafaring experience. The merchant ships were involved in the opium, tea and gold trades and the practice was spurred by the opening of the Suez Canal. A major reason for it was a shortage of sailors and the unwillingness of seamen to sail on certain types of ships. They suffered from great deprivations all for a paltry sum usually squandered during shore leave. Navies and pirates had their own form of shanghaiing called impressment. This work explores the rich history of shanghaiing and impressment with a focus on victims and also considers the 19th century seafarer and the circumstances that made shanghaiing so lucrative. **Port Economics, Management and Policy** Theo Notteboom, Athanasios Pallis, Jean-Paul Rodrigue, 2022-01-31.

Port Economics, Management and Policy provides a comprehensive analysis of the contemporary port industry showing how ports are organized to serve the global economy and support regional and local development. Structured in eight sections plus an introduction and epilog, this textbook examines a wide range of seaport topics covering maritime shipping and international trade, port terminals, port governance, port competition, port policy and much more. Key features of the book include: Multidisciplinary perspective drawing on economics, geography, management science and engineering. Multisector analysis including containers, bulk, break bulk and the cruise industry. Focus on the latest industry trends such as supply chain management, automation, digitalization and sustainability. Benefitting from the authors' extensive involvement in shaping the port sector across five continents, this text provides students and scholars with a valuable resource on ports and maritime transport systems. Practitioners and policymakers can also use this as an essential guide towards better port management and governance. **British and French Colonialism in Africa, Asia and the Middle East** James R.
