Partnership and Reproductive Behaviour in Low-fertility Countries Naciones Unidas. Departamento de Asuntos Económicos y Sociales,2003 *Partnership and Reproductive Behaviour in Low-fertility Countries* United Nations. Department of Economic and Social Affairs. Population Division,2003 The number of countries where the total fertility rate is below 2.1 children per woman increased more than ten fold during the last four decades This report focuses on the influence of marital or partnership behaviour on fertility levels and trends resulting in below replacement fertility Social trends considered include increasing cohabitation higher age of first marriage higher proportions of never married women over age 30 and the rapid fall in the marriage rate in the 1990s While all low fertility societies share fundamental societal features many of their socio economic and cultural features vary and thus shape the differences of demographic characteristics

The Global Spread of Fertility Decline Jay Winter,Michael Teitelbaum,2013-06-18 div This incisive study explores population movements and declining fertility in China India Japan and North America in the 21st century suggesting that politics in addition to cultural and economic concerns must be included as a prime determining factor in these powerful global trends DIV

Handbook Of The Sociology Of Youth In Brics Countries Tom Dwyer,Mikhail K Gorshkov,Ishwar Modi,Chunling Li,Mokong S Mapadimeng,2017-11-08 Youth are by definition the future This book brings initial analyses to bear on youth in the five BRICS countries Brazil Russia India China and South Africa which are home to nearly half of the world's youth Very little is known about these youth outside of their own countries since the mainstream views on youth and youth culture are derived from the available literature on youth in the industrialized West which is home to a small part of the world's youth This book aims to help fill in this gap The handbook examines the state of youth their past present and permits the development of insights about future The BRICS countries have all engaged in development processes and some remarkable improvements in young people's lives over recent decades are documented However the chapters also show that these gains can be undermined by instabilities poor decisions and external factors in those countries Periods of economic growth political progress cultural opening up and subsequent reversals rearticulate differently in each society The future of youth is sharply impacted by recent transformations of economic political and social realities As new opportunities emerge and the influence of tradition on youth's lifestyles weakens and as their norms and values change the youth enter into conflict with dominant expectations and power structures The topics covered in the book include politics education health employment leisure Internet identities inequalities and demographics The chapters provide original insights into the development of the BRICS countries and place the varied mechanisms of youth development in context This handbook serves as a reference to those who are interested in having a better understanding of today's youth Readers will become acquainted with many issues that are faced today by young

people and understand that through fertile dialogues and cooperation youth can play a role in shaping the future of the world

Handbook of Quality of Life in the Enlarged European Union Jens Alber, Tony Fahey, Chiara Saraceno, 2007-10-15

This is a comparative handbook and analysis of the social conditions and institutional contexts in the new and old member states of the enlarged EU 28 Canada's Changing Families Kevin McQuillan, Zenaida R. Ravanera, 2006-01-01 In recent

years two significant trends have had a substantial impact on Canadian families First Canadian families have been dramatically altered by high rates of separation and divorce declining fertility greater popularity of alternative family arrangements such as cohabitation and increasing involvement of women in paid labour Second changes occurring in the economy and the larger society have brought new pressures to bear on families In Canada's Changing Families editors Kevin McQuillan and Zenaida R. Ravanera explore how these developments have altered family life Using data collected in recent surveys by Statistics Canada contributors to this volume illustrate how transformed conditions in the labour market have forced families to alter their routines and the division of responsibilities within the household At the same time the government striving to maintain or increase the competitive position of the economy has moved to control spending restrain taxes and reduce deficits The result has been new demands on the family to provide or supplement services that might otherwise be provided by the state Canada's Changing Families is an eye opening study and one of great contemporary relevance

Demography: Analysis and Synthesis, Four Volume Set Graziella Caselli, Jacques Vallin, Guillaume Wunsch, 2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks Demography Analysis and Synthesis offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of Demography Analysis and Synthesis have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and

Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations

Late Fertility : Its Causal Effects on Health of the Newborn and Its Implications in Fertility Decision Process Marie Vandresse,2008 This doctoral thesis is devoted to the study of the effects of late fertility on health of the newborn and to the implications of late fertility in the fertility decision process Late fertility is defined as the reproduction process after 30 years old The interest lies as well from the maternal age point of view as from the paternal age point of view The first part is devoted to the study of the determinants of infant morbidity and mortality with a particular attention to the parental age without neglecting the other determinants The originality of this part is located from the methodological point of view We construct a structural model of infant morbidity mortality in order to isolate the causal effect of late fertility By a structural model we mean a model which represents a set of causal relationships represented mathematically by a multi equation model and graphically by directed acyclic graphs As a complementary approach a chapter of the thesis is devoted to an exploratory model highlighting the role of the extreme values rather than average values traditionally of interest in most statistical analyses Both methods are tested with Hungarian data individual registration forms of livebirths and infant deaths 1984 1984 and 1994 1998 and the Hungarian casecontrol surveillance of congenital abnormalities 1997 2002 The second part analyses the effect of parental ageing in the fertility decision process We try to determine whether the detrimental effect of late fertility on health of the child and on fecundity of the couples intervene in the preferences for a child We assume that parental age influences the preferences for a child through effects on the desire for a child and on the beliefs in the capacity of reproduction of a healthy child This hypothesis is tested using the data from the National Survey of Family Growth United States 2002 and from the Fertility and Family Survey Hungary Czech Republic and Belgium

mate selection patterns with an emphasis on the dynamics of couple formation marital roles the place and role of children and parenting in families socialization for gender roles differences in education employment and other opportunities major stressors affecting families coping and adaptation aging and life expectancy issues and much more Families in a Global Context is an insightful resource for researchers educators and advanced undergraduate and graduate students investigating comparative family topics of family life around the world and in cultural context Science Magazine's State of the Planet 2006-2007 Donald Kennedy, the Editors of Science, 2006-06-15 How often in today's environmental debates have you read that the science is in dispute even when there is overwhelming consensus among scientists Too often the voice of science is diminished or diluted for the sake of politics and the public is misled Now the most authoritative voice in U.S. science Science magazine brings you current scientific knowledge on today's most pressing environmental challenges from population growth to climate change to biodiversity loss Science Magazine's State of the Planet 2006-2007 is a unique contribution that brings together leading environmental scientists and researchers to give readers a comprehensive yet accessible overview of current issues Included are explanatory essays from Science magazine editor in chief Donald Kennedy that tie together the issues and explore the relationships among them Each of the book's 18 chapters is written by the world's leading experts such as Joel Cohen on population Peter Gleick on water Daniel Pauly on fisheries Thomas Karl on climate change science Paul Portney on energy and development Elinor Ostrom and Thomas Dietz on commons management Interspersed throughout are Science news pieces that highlight particular issues and cases relevant to the main scientific findings An added feature is the inclusion of definitions of key terms and concepts that help students and nonspecialists understand the issues Published biennially State of the Planet is a clear accessible guide for readers of all levels from students to professionals Policy Implications of Changing Family Formation Linda Hantrais, Dimităr Filipov, Francesco C. Billari, 2006-01-01 Modern European societies are witnessing a number of key changes in family structures such as postponed parenthood low fertility single parenting and increased divorce rates As a consequence of the radical changes taking place in our societies family policies often result in a complex set of targeted and sometimes contradictory measures and forms of public intervention The three authors of this volume review the major demographic challenges posed by changing patterns in family and family formation and strive to identify possible policy responses by governments They stress the need for all levels of government and the private sector to adopt an integrated and balanced approach to policy in order to create cohesive and family friendly societies This volume is a thematic compilation of the background papers on the policy implications of changing family formations prepared for the European Population Conference Strasbourg 7-8 April 2005 *Demographic Aspects of Migration* Thomas Salzmann, Barry Edmonston, James Raymer, 2010-08-24 Dr Albert Schmid President of the Federal Office for Migration and Refugees According to the United Nations about 200 million people of the estimated world population of 6.8 billion are international migrants that corresponds to about three per cent of the total

world population The proportion of international migrants in the global population has increased only marginally in the last 40 years But as a result of global population growth the absolute number of migrants has increased and their structure and spatial distribution has changed considerably A structural shift has taken place primarily in the industrialised countries where less than 20 per cent of the global workers are now living but where more than 60 per cent of all migrants worldwide reside Since 1990 more than 16 million people have moved to Germany while about 11 million have left the country in the same period Altogether 15 million people of international migration origin are living in Germany comprising almost 19 per cent of Germany's current population of 82 million At the end of 2006 about 64 million people out of Europe's population of 732 million or nine per cent lived in a European country they were not born in But why does anybody migrate at all People decide to leave because in general they expect to find better conditions and opportunities in other countries or regions

Globalized Fatherhood Marcia C. Inhorn, Wendy Chavkin, José-Alberto Navarro, 2014-10-01 Using an entirely new conceptual vocabulary through which to understand men's experiences and expectations at the dawn of the twenty first century this path breaking volume focuses on fatherhood around the globe including transformations in fathering fatherhood and family life It includes new work by anthropologists sociologists and cultural geographers working in settings from Peru to India to Vietnam Each chapter suggests that men are responding to globalization as fathers in creative and unprecedented ways not only in the West but also in numerous global locations

Marriage and Fertility Behaviour in Japan Nobutaka Fukuda, 2016-01-28 This monograph examines the influence of ideational and socio economic factors on Japanese marriage and fertility behaviour It also investigates the historical change in attitudes toward partnership and family in Japan which if current trends continue can lead to population shrinkage and an asymmetrical age structure The author first details the differences between ideational and economic approaches He examines these two behavioural models from a viewpoint of rational choice theory which he then follows with a discussion on the influence of institutional contexts on matrimony and childbirth Next the book considers salient features of Japanese marriage behaviour including the relation between these patterns and changes in society and the influence of marriage on attitudes toward partnership and family relations Coverage then goes on to explore the influence of ideational factors on fertility and analyse the impact of childbirth on couples attitudes The author also investigates attitudinal changes between generations in Japan He provides a theoretical review on the relation between socio economic development and value orientation as well as looks at the difference in attitudes from a viewpoint of cohorts and periods Overall the book presents an authoritative theoretical and empirical analysis using data from panel and repeated cross sectional surveys Throughout the author clearly identifies the sources of his data as well as the methods used in his analysis

Strong family and low fertility: a paradox? Gianpiero Dalla Zuanna, Giuseppe A. Micheli, 2006-03-30 New perspectives in interpreting contemporary family and reproductive behaviour of Mediterranean Europe 1 THE NEW GEOGRAPHY OF FERTILITY AND THE FAMILY IN EUROPE The countries of southern Europe have

begun to reduce conjugal fertility at a later date compared to most other nations in the west. This has been plained by means of the category of delay the backwardness of the pr esses of accumulation and economic development being seen as the cause of the maintaining of the reproductive models of the past. Moreover the inf ence of the Catholic Church in Italy Spain and Portugal is supposed to have delayed the processes of secularisation rendering difficult the changes in mentality necessary for assuming modern patterns of reproductive behaviour not only for fertility but also for the variables which are strictly linked to it such as sexuality contraception and abortion. Livi Bacci 1977 Lesthaeghe and Wilson 1986 1 1 The trends of very low fertility. Now the panorama is very different. Since the mid seventies southern Europe has been washed by the tide of a lowest low fertility i e TFR under 1.5 for several a prolonged period. Billari et al 2003 which in some areas 1 has reached and maintained scarcely imaginable levels for years on end. Conversely other areas of Europe where fertility started to fall many d ades earlier than in the regions of the south have recovered or maintained considerably higher levels of fertility often close to replacement level.

Transitions in World Population, 2004. Chronicles changes in world population in the last century with a particular focus on the last 50 years. Examines the social and economic factors that affect population change. Also discusses the heightened international concern since the 1950s about rapid population growth widespread fertility declines and the new world consensus reached in the 1990s about how best to respond to population trends.

Population and Family in the Low Countries H.G. Moors, Robert L. Cliquet, G. Dooghe, Dirk J. van de Kaa, 2012-12-06. Since 1972 there has been a close contact through their pUblications between the Netherlands Interuniversity Demographic Institute at The Hague and the Population and Family Study Centre at Brussels. This co operation has resulted in the joint pUblication of the journal BevoLking en Gezin Population and Family in the Dutch language. However there has been a need for wider circulation of the Dutch language studies and research in the field of population and the family. In particular it was thought necessary to make possible an exchange of ideas and findings with population and family scientists abroad. The volume Population and family in the Low Countries intends to facilitate this international discussion by at least partially lifting the language barrier curtain. Some of the articles and documents included were originally published in the Dutch language others were written especially for this volume. Population and family covers a very wide field and so do the chapters presented. In addition to demographic studies articles are presented on population and family sociology and social biology. The editors hope that this reader the first in their yearly publication series will serve its purpose.
