Programming as if People Mattered Nathaniel S. Borenstein, 2014-07-14 Through a set of lively anecdotes and essays Nathaniel Borenstein traces the divergence between the fields of software engineering and user centered software design and attempts to reconcile the needs of people in both camps Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 The Integration of Faith and Learning Robert A. Harris, 2004-04-22 The Integration of Faith and Learning A Worldview Approach provides students with the philosophical context and practical tools necessary for making the connections between Christian knowledge and the knowledge they will acquire during their undergraduate and graduate years in higher education This book focuses on helping students understand how worldviews influence the interpretation of data and even what is judged to be knowledge itself The worldviews of philosophical naturalism postmodernism and Christianity are compared and analyzed Throughout the book emphasis is placed on helping students develop the practical skills needed to evaluate knowledge claims and to integrate all knowledge into a unified whole through the touchstone of Christian truth *Pit Bull* Bronwen Dickey, 2016-05-10 The hugely illuminating story of how a popular breed of dog became the most demonized and supposedly the most dangerous of dogs and what role humans have played in the transformation When Bronwen Dickey brought her new dog home she saw no traces of the infamous viciousness in her affectionate timid pit bull Which made her wonder How had

the breed beloved by Teddy Roosevelt Helen Keller and Hollywood's Little Rascals come to be known as a brutal fighter Her search for answers takes her from nineteenth century New York City dogfighting pits the cruelty of which drew the attention of the recently formed ASPCA to early twentieth century movie sets where pit bulls cavorted with Fatty Arbuckle and Buster Keaton from the battlefields of Gettysburg and the Marne where pit bulls earned presidential recognition to desolate urban neighborhoods where the dogs were loved prized and sometimes brutalized Whether through love or fear hatred or devotion humans are bound to the history of the pit bull With unfailing thoughtfulness compassion and a firm grasp of scientific fact Dickey offers us a clear eyed portrait of this extraordinary breed and an insightful view of Americans relationship with their dogs

The Museum Effect Jeffrey K. Smith, 2014-05-29 Museums libraries and cultural institutions provide opportunities for people to understand and celebrate who they are were and might be These institutions educate the public and civilize society in a variety of ways ranging from community events to a single child making a first visit The Museum Effect documents this phenomenon explains how it happens and shows how institutions can facilitate this process Cultural institutions vary dramatically in size nature and purpose but they all allow visitors to hold conversations with artists and authors perhaps long dead These conversations sometimes with others present and sometimes with artists scientists explorers or authors not present allow visitors to explore their lives and their possible selves Cultural institutions inspire personal reflection and help visitors better themselves in that they leave having contemplated what is noble excellent or exemplary about the society in which they live The museum effect is a process through which cultural institutions educate and civilize us as individuals and as societies These institutions allow visitors to spend some time with their thoughts elevated and leave the institution better people in some meaningful fashion than when they entered This visionary book presents the underlying idea and the argument for the museum effect along with empirical research supporting that argument It will help those working in museums libraries and archivists to facilitate this process and study how this is working in their own institutions

Untamed Leadership Brent A. Carter, 2011 Instincts shape who we are as leaders They encapsulate the social variety we exhibit to others from the servant to the tyrant Though they are integrated into our every thought and deed we are relatively unaware of what they are or how they impact us Perhaps the frenzied lives we lead are to blame or maybe we spend too much time developing the veneer of leadership rather than excavating its core substance No matter the cause each day we are presented opportunities to make differences in the lives we touch As we awaken to the reality that who we are on the inside has a direct role in what we project on the outside we will have begun the process of apprehending Untamed Leadership

Learning to Rival Linda Flower,Elenore Long,Lorraine Higgins,2000-04-01 Learning to Rival tells the inside story of college and high school writers learning to rival to actively seek rival hypotheses and negotiate alternative perspectives on charged questions It shows how this interdisciplinary literate practice alters with the context of use and how in learning to rival in school and out students must often negotiate conflicts not apparent to instructors This study of the rival hypothesis stance a powerful literate practice claimed by both humanities and science initially posed two questions how does the rival hypothesis stance define itself as a literate practice as we move across the boundaries of disciplines and genres of school and community how do learners crossing these boundaries interpret and use the family of literate practices especially in situations that pose problems of intercultural understanding Over the course of this project with urban teenagers and minority college students the rival hypothesis stance emerged as a generative and powerful tool for intercultural inquiry posing in turn a new question how can the practice of rivaling support the difficult and essential art of intercultural interpretation in education The authors present the story of a literate practice that moves across communities as well as the stories of students who are learning to rival across the curriculum Learning to Rival offers an active strategic approach to multiculturalism addressing how people negotiate and use difference to solve problems In the spirit of John Dewey s experimental way of knowing it presents a multifaceted approach to literacy research combining contemporary research methods to show the complexity of rivaling as a literate practice and the way it is understood and used by a variety of writers As a resource for scholars teachers and administrators in writing across the curriculum studies writing program administration service learning and community based projects as well as literacy rhetoric and composition this volume reveals how learning a new literate practice can force students to encounter and negotiate conflicts It also provides a model of an intercultural inquiry that uses difference to understand a shared problem

Reading Empirical Research Studies John R. Hayes,Richard E. Young,Michele L. Matchett,Maggie McCaffrey,Cynthia Cochran,2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to

provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric. Aiming to cultivate new attitudes toward empirical research, this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather than methods that extend the power of humanist researchers trying to solve the problems of their discipline.

Quasi-Experimentation

Charles S. Reichardt, 2019-08-15. Featuring engaging examples from diverse disciplines, this book explains how to use modern approaches to quasi-experimentation to derive credible estimates of treatment effects under the demanding constraints of field settings. Foremost expert Charles S. Reichardt provides an in-depth examination of the design and statistical analysis of pretest-posttest nonequivalent groups, regression discontinuity, and interrupted time series designs. He details their relative strengths and weaknesses and offers practical advice about their use. Reichardt compares quasi-experiments to randomized experiments and discusses when and why the former might be a better choice. Modern methods for elaborating a research design to remove bias from estimates of treatment effects are described as are tactics for dealing with missing data and noncompliance with treatment assignment. Throughout, mathematical equations are translated into words to enhance accessibility.

Handbook of Mixed Methods in Social & Behavioral Research Abbas Tashakkori, Charles Teddlie, 2003

The Handbook contains a gold mine of articles by leading scholars on what has come to be known as the third methodological movement in social research. Aimed at surveying the differing viewpoints and disciplinary approaches of mixed methods, this breakthrough book examines mixed methods from the research enterprise to paradigmatic issues to application. The book also discusses the strengths and weaknesses of mixed methods designs and provides an array of specific examples in a variety of disciplines from psychology to nursing. The book closes with a brief section on how to teach and perform collaborative research using a mixed methods research design. Written so that it can be used either as a pedagogical tool or as a reference for researchers, the book is rich in examples and includes a glossary, easy-to-follow diagrams, and tables to help readers become more familiar with the language and controversies in this evolving area.
