River Out Of The Eden A Darwinian View Of Life:

River Out of Eden Richard Dawkins, 2008-08-04 How did the replication bomb we call life begin and where in the world or rather in the universe is it heading Writing with characteristic wit and an ability to clarify complex phenomena the New York Times described his style as the sort of science writing that makes the reader feel like a genius Richard Dawkins confronts this ancient mystery

River Out of Eden Richard Dawkins, 2014-03-20 The No 1 SUNDAY TIMES bestseller A fascinating explanation of how evolution works from bestselling author of THE GOD DELUSION Dawkins is a brilliant communicator SUNDAY TELEGRAPH A model of simplicity and power Douglas Adams The river of Dawkins's title is a river of DNA flowing through time from the beginning of life on earth to the present and onwards Dawkins explains that DNA must be thought of as the most sophisticated information system imaginable Life is just bytes and bytes of information he writes Using this perspective he describes the mechanisms by which evolution has taken place gradually but inexorably over a period of three thousand million years It is the story of how evolution happens rather than a narrative of what has actually happened in evolution He discusses current views on the process of human evolution including the idea that we all trace back to a comparatively recent African Eve and speculates that the information explosion that was unleashed on Earth when DNA came into being has almost certainly happened in other places in the universe

Maupassant's Fiction and the Darwinian View of Life Laurence A. Gregorio, 2005 The Naturalists wrote from a scientific point of view and no science had more currency in society in the late nineteenth century than Darwin's theory of evolution Until now this motif in Guy de Maupassant has escaped critical attention Maupassant's Fiction and the Darwinian View of Life examines evolutionary theory in the literature in a way accessible to students of literature and science alike It first explains the theoretical basis and Maupassant's affinity for it then studies one short story La Ficelle in its entirety proposing a new and interesting interpretation based on evidence read through a Darwinian lens The remaining chapters organize a lively Darwinian reading of Maupassant according to topics such as natural selection heredity and materialism The book shows that Darwinism and the economic variety of Social Darwinism figure significantly in Maupassant's fiction It is a must for students and teachers of Naturalism and Darwinism across the liberal arts

Yockey,2005-04-18 Publisher Description **A Science-Theology**

Rapprochement Cyril Orji,2018-10-12 This timely and fascinating work addresses questions of ultimate concerns for Christian believers by clarifying what religious believers statement God creates means in relation to the mechanistic determinism of science enthusiasts and the New Atheist Movement Drawing from the methodological works of C S Peirce Bernard Lonergan and Wolfhart Pannenberg the book creatively shows how the old science theology conflict or warfare can be turned into one of collaboration or rapprochement Using the works of these three thinkers it departs from the common practice of treating the field of science theology as an abstract mainstream theology The book takes a stand on contextual theology treating the problem posed by Richard Dawkins and his fellow New Atheists as one in need of a creative solution It also suggests that the dialogue between science and theology must take seriously the experiences and challenges from different social and cultural contexts The text shows how these experiences can lead to the kind of creative theological thinking we see in the works of Pannenberg and Lonergan who both explicate not only how an understanding of an evolutionary universe is compatible with the Christian doctrine of creation but also how a methodological comparison of science and theology reveals a common concern for human understanding and openness to divine agency Philosophy and the Christian Worldview David Werther,Mark D. Linville,2012-02-02 Philosophy and the Christian Worldview is a collection of new essays written by fifteen philosophers of religion Bringing together some of the leading lights in current academic philosophy of religion including William Hasker Charles Taliaferro and Keith Yandell it offers a fresh perspective on four major areas of discussion Religion and Epistemology Religion and Morality Religion and Metaphysics and Religion and Worldview Assessment United by the argument that the core claims of religion have metaphysical epistemic and moral entailments these essays represent a state of the art discussion in contemporary philosophy of religion **The Mystery of Evolutionary Mechanisms** Robert F. Shedinger,2019-06-28 Is Darwinian evolution really the most successful scientific theory ever proposed or even the best idea anyone has ever had as Daniel Dennett once put it The Mystery of Evolutionary Mechanisms provides a comprehensive critical reading of the literature of evolutionary biology from Darwin to Dobzhansky to Dawkins revealing this popular account of evolution to be a grand narrative of Darwinian triumph that greatly overstates the empirical validity of modern evolutionary theory The mechanisms driving the evolutionary process truly remain a mystery more than one hundred fifty years after Origin of Species a fact that can free religion scholars to think in more creative ways about the positive contributions religious reflection might make to our understanding of life s origin and diversity The Mystery of Evolutionary Mechanisms calls for an embrace of mystery understood not as an abdication of the scientific quest

for truth but as a courageous and humble acknowledgment of the limits of human reason and an openness to a fundamentally religious orientation toward life

Atheist Persona John J. Pasquini, 2014-04-15 In the past as in the present science has explored the reasons for belief In recent years with the rise of categorical practical and militant atheism the scientific and philosophical community has begun studying the worldview of atheism The Atheist Persona Causes and Consequences is a summary of the most recent research by the best of scholars on the subject of atheism In an effort to create a more courteous dialogue between theists and atheists this book acknowledges that while there are reasons for believing in God there are also reasons for not believing in God Atheist Persona showcases how the worldview we choose to accept determines how we live our lives and how we influence those around us

P. Moreland,Stephen C. Meyer,Christopher Shaw,Ann K. Gauger,Wayne Grudem,2020-06-20 Winner of the ECPA Book of the Year Award for Bible Reference Works Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic evolution yet produced Explains why theistic evolution is not congruent with a biblical worldview Features nineteen essays written by well known experts in their fields Designed to be used as a textbook for courses on religion and evolution Accessible for those without expertise in the subject *Critical Realism and the Objective Value of Sustainability* Gabriela-Lucia Sabau,2024-02-29

Critical Realism and the Objective Value of Sustainability contributes to the growing discussion surrounding the concept of sustainability using a critical realist approach within a transdisciplinary theoretical framework to examine how sustainability objectively occurs in the natural world and in society. The book develops an ethical theory of sustainability as an objective value rooted not in humans' subjective preferences but in the holistic web of relationships, interdependencies and obligations existing among living things on Earth, a web believed to have maintained life on Earth over the last 3.7 billion years. It proposes three pillars of sustainability ethics: contentment for the human existence given to us, justice beyond distributive justice, and meaningful freedom within ecological and moral limits. Using abductive reasoning, the book infers that there is an out of this world Sustainer behind the Earth's sustainability, acting as a metaphysical source of all being and value. It argues that sustainability value, accepted as a shared understanding of the common good, must guide individual decisions and socio-economic development efforts as a matter of deliberate choice, as well as be built on the awareness that there are non-negotiable pre-established conditions for our planet's sustainability. This book will be of interest to students and scholars across fields of inquiry including sustainability, sustainable development, environmental philosophy, and ethics, philosophy of science, and ecological economics, and to whoever may wonder why seasons exist and why humans have creative minds.

Living the Good Life Eulie R Brannan, 2021-10-13. The question, "What is the good life?" has been the subject of many philosophical discussions and writings over the centuries. Millions of ordinary people have considered it as they started out on the road of life. The author reviews some of the thoughts by Greek philosophers but concentrates on the Apostle Peter's statement in I Peter 3:10-12: "The tongue is a powerful instrument for good or evil. God gave us the power to make choices about the decisions life calls on us to make, but these choices have consequences. Many evil roads open up for us, and we must choose to turn away from them and choose to do good. Our happiness in life largely depends on our being at peace with God, ourselves, and others. This requires real commitment on our part. Christ promised to give his disciples a special kind of peace, not as the world gives. Paul spoke of it as the peace of God which surpasses all understanding." Philippians 4:7. This peace comes from such things as remembering God loves us, keeping our conscience clear, learning the secret of contentment, being satisfied with who we are, keeping contact with the Heavenly Father in prayer. God promises, "The eyes of the Lord are on the righteous, and his ears are open to their cry." Psalm 34:15. The author concludes with some things his ninety-three years have taught him: Life will sometimes be hard; God's law of sowing and reaping is unalterable; Need for people in his life; All need meaningful work; Our self-respect affects how others regard us; We all have a need for something to look forward to; God can be trusted; We don't know what tomorrow may bring.

The Environmental Uncanny Brian A. Irwin, 2024-06-27. The *Environmental Uncanny* argues that the increasing destitution of our world is the result of a certain forgetfulness we have forgotten that the basis of our knowledge is not calculative reason but our participation in the natural world. The modern built environment is exemplary of this forgetfulness and induces an uncanniness that can help us to understand the nature of

our environmental crisis This book offers a unique interdisciplinary perspective on the global environmental crisis Ranging from traditional phenomenology including substantial discussion of both Merleau Ponty and Heidegger to philosophy of biology to architectural and urban design theory to landscape photography it makes illuminating connections to paint a multifaceted picture Tracing the root causes of dwindling biodiversity deforestation and suburban sprawl we can find how might we mark the path back toward a mode of rich inhabitation in a contemporary age In charting out how it is that we are losing our world Irwin offers a thought as to how we might regain it The Earth Is Our Home Nelson Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views **The ^AErotic Life of Manuscripts** Yii-Jan Lin,2016-01-04 The Erotic Life of Manuscripts explores the curious relationship between the field of New Testament textual criticism and the biological sciences beginning in the eighteenth century and extending into the present
