Drivers of Corruption Tina Søreide, 2014-10-15 This report provides an overview of arguments explaining the risk of corruption Corrupt acts are subject to decision making authority and assets available for grabbing These assets can be stolen created by artificial shortage or become available as the result of a market failure Assets that are especially exposed to corruption include profits from the private sector revenues from the export of natural resources aid and loans and the proceeds of crime Whether or not opportunities for corruption are exploited depends on the individuals involved the institution or society they are part of and the law enforcement circumstances Corruption usually persists in situations in which players are aware of the facts but nonetheless condone the practice Absence of reaction can result from information asymmetries in which the people who are supposed to act are not aware of the need to act coordination failure patronage determined loyalty and incentive problems at the political level This review of results and insights from different parts of the scholarly literature on corruption focuses on areas where research can guide anticorruption policy The report also describes a number of corruption related challenges in need of more attention from researchers

Islamic Identity, Postcoloniality, and Educational Policy Jeffrey Ayala Milligan, 2020-02-26 This book theorizes a philosophical framework for educational policy and practice in the southern Philippines where decades of religious and political conflict between a minority Muslim community and the Philippine state has plagued the educational and economic development of the region It offers a critical historical and ethnographic analysis of a century of failed attempts under successive U S colonial and independent Philippine governments to deploy education as a tool to mitigate the conflict and assimilate the Muslim minority into the mainstream of Philippine society and examines recent efforts to integrate state and Islamic education before proposing a philosophy of prophetic pragmatism as a more promising framework for educational policy and practice that respects the religious identity and fosters the educational development of Muslim Filipinos It represents a timely contribution to the search for educational policies and practices more responsive to the needs and religious identities of Muslim communities emerging from conflict not only in the southern Philippines but in other international contexts as well

T. Quah,2011-07-21 As corruption is a serious problem in many Asian countries their governments have introduced many anti corruption measures since the 1950s This book analyzes and evaluates the anti corruption strategies employed in Hong Kong SAR India Indonesia Japan Mongolia the Philippines Singapore South Korea Taiwan and Thailand *Islamic Identity, Postcoloniality, and Educational Policy* J. Milligan,2005-07-31 Tensions between Muslim communities and state institutions are endemic in many parts of the world For decades successive colonial and independent governments in the Philippines have deployed educational policy as a tool to mitigate one such conflict between Muslims and Christians a conflict which has claimed more than 100 000 lives since the 1970 s Postcolonial Education and Islamic Identity in the Southern Philippines offers a postcolonial critique of this century long educational project in an effort to understand how educational policy has failed Muslim Filipinos and to seek insight from their experience into the potential and pitfalls of educational responses to ethnic and religious tensions *Accountability in education: meeting our commitments* UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover Navigating the Common Good in Teacher Education Policy Nikola Hobbel,Barbara L. Bales,2018-05-11 Navigating the Common Good in Teacher Education Policy examines the changing relationships between the state and the common or public good Using teacher education policy as the frame of analysis the authors examine history cultural context and lived experiences in 12 countries and the European Union to explicate which notions of justice social
