**Gary Shapiro**

## Robert Smithson Mapping Dislocations:

*Robert Smithson*, Robert Smithson Robert Smithson, Ann Reynolds, 2001 **Robert Smithson** Robert Smithson, Eugenie Tsai, Cornelia H. Butler, Thomas E. Crow, Alexander Alberro, Museum of Contemporary Art (Los Angeles, Calif.), Moira Roth, Whitney Museum of American Art, 2004 This catalogue is the major study of Smithson 1938-1973 who is most renowned as an early earthworks artist and creator of Spiral Jetty a 1 500 foot rock coil dramatically situated in the Great Salt Lake *Cartographies of New York and Other Postwar American Cities* Monica Manolescu, 2018-10-03 *Cartographies of New York and Other Postwar American Cities* Art Literature and Urban Spaces explores phenomena of urban mapping in the discourses and strategies of a variety of postwar artists and practitioners of space Allan Kaprow Claes Oldenburg Vito Acconci Gordon Matta Clark Robert Smithson Rebecca Solnit Matthew Buckingham contemporary Situationist projects The distinctive approach of the book highlights the interplay between texts and site oriented practices which have often been treated separately in critical discussions Monica Manolescu considers spatial investigations that engage with the historical and social conditions of the urban environment and reflect on its mediated nature Cartographic procedures that involve walking and surveying are interpreted as unsettling and subversive possibilities of representing and navigating the postwar American city The book posits mapping as a critical nexus that opens up new ways of studying some of the most important postwar artistic engagements with New York and other American cities Robert Smithson *Unearthed* Eugenie Tsai, Robert Smithson, 1991 Robert Smithson *Unearthed* Drawings Collages Writings the first full survey of this artist's work reevaluates its larger resonance and its place in the historical development of recent art Eugenie Tsai's re-presentation of the work of Smithson expands our understanding of his achievement Looking beyond the Minimalist structures and the earthworks for which she is best known she explores his intellectual and aesthetic roots his early imaginings and discovers a richer range of personal affect in Smithson's art than we had been led to expect **The Stack** Benjamin H. Bratton, 2016-02-19 A comprehensive political and design theory of planetary scale computation proposing that The Stack an accidental megastructure is both a technological apparatus and a model for a new geopolitical architecture What has planetary scale computation done to our geopolitical realities It takes different forms at different scales from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems from interfaces drawn by the augmentation of the hand and eye to users identified by self-quantification and the arrival of legions of sensors algorithms and robots Together how do these distort and deform modern political geographies and produce new territories in their own image In *The Stack* Benjamin Bratton proposes that these different genres of computation smart grids cloud platforms mobile apps smart cities the Internet of Things automation can be seen not as so many species evolving on their own but as forming a coherent whole an accidental megastructure called The Stack that is both a computational apparatus and a new governing architecture We are inside The Stack and it is inside of us In an

account that is both theoretical and technical drawing on political philosophy architectural theory and software studies Bratton explores six layers of The Stack Earth Cloud City Address Interface User Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling not only computational forms but also social human and physical forces This model informed by the logic of the multilayered structure of protocol stacks in which network technologies operate within a modular and vertical order offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention The Stack is an interdisciplinary design brief for a new geopolitics that works with and for planetary scale computation Interweaving the continental urban and perceptual scales it shows how we can better build dwell within communicate with and govern our worlds thestack.org

**Rethinking the Power of Maps** Denis Wood, 2010-04-16 A contemporary follow up to the groundbreaking Power of Maps this book takes a fresh look at what maps do whose interests they serve and how they can be used in surprising creative and radical ways Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter mapping practices today Thought provoking illustrations include U S Geological Survey maps electoral and transportation maps and numerous examples of critical cartography participatory GIS and map art [Robert Smithson](#)

George Thomas Baker, 2005 Devoted to the masterpiece earthwork of Robert Smithson this features a wealth of unpublished archival and new photographs and a fresh testament to the grandeur and scope of the Spiral Jetty *Robert Smithson* Robert A. Sobieszek, Robert Smithson, 1993 There have been other exhibitions of his works but Robert Smithson Photo Works is the first to examine his use of the camera and to present the way he saw the unique landscapes in which he traveled and located his art As demonstrated by curator of photography Robert A Sobieszek the photographic image was central to Smithson's art whether in collages montages sequences films or alone Smithson's final projects attempted a collaboration art and industry He believed artists could assist in reclaiming such devastated areas as open face strip mines Our expanding presence in and impact upon the land may have become so pervasive that the boundaries between nature and culture have been all but obliterated Now two decades after his death Robert Smithson's lessons are all the more vital and significant from preface [Earthwards](#) Gary Shapiro, 1995 The untimely death of Robert Smithson in 1973 at age 34 robbed postwar American art of an unusually creative practitioner and thinker Smithson's pioneering earthworks and installations of the 1960s and 70s anticipated concerns with environmentalism and site specific artistic production Gary Shapiro's insightful study of Smithson's career is the first book to address the full range of the artist's dazzling virtuosity

**SpatioTemporalities on the Line** Sebastian Dorsch, Jutta Vinzent, 2017-11-20 Lines are omnipresent in our everyday experience and language They reflect and influence the spatial and temporal structures of our world view Taking Tim Ingold's cultural history of the line as a starting point this book understands lines as expressions that allow insights into cultural

theoretical phenomena and thus go beyond their mere form The essays will investigate this premise from various disciplines architecture art cartography film literature and philosophy

**Robert Smithson, Land Art, and Speculative Realities** Rory O'Dea, 2023-10-23 This book explores the ways Robert Smithson's art revealed and defamiliarized the constructs of rational reality in order to allow radically speculative alternatives to emerge In this way his art is conceived as a true fiction that eradicates a false reality By tracing the web of correspondences between Smithson and science fictional speculative and mystical modes of thought Rory O'Dea explores the aesthetic encounters engendered by his art as a means to warp the contours of reality and loosen the boundaries of being human Given the current and impending catastrophes of the Anthropocene which represents the ever expanding planetary shadow cast by humanism the possibility of being other than human posited by Smithson's art is a matter of urgent concern The book will be of interest to scholars working in art history contemporary art American studies and environmental humanities

Open Systems Johanna Burton, Mark Godfrey, Boris Grois, 2005-09 Published on the occasion of the exhibition Open systems rethinking art c 1970 Tate Modern London 1 June 29 August 2005

**Mapping Paradigms in Modern and Contemporary Art** Simonetta Moro, 2021-07-29 Mapping Paradigms in Modern and Contemporary Art defines a new cartographic aesthetic or what Simonetta Moro calls carto aesthetics as a key to interpreting specific phenomena in modern and contemporary art through the concept of poetic cartography The problem of mapping although indebted to the spatial turn of poststructuralist philosophy is reconstructed as hermeneutics while exposing the nexus between topology space time and memory The book posits that the emergence of mapping as a ubiquitous theme in contemporary art can be attributed to the power of the cartographic model to constitute multiple worldviews that can be seen as paradigmatic of the post modern and contemporary condition This book will be of particular interest to scholars in art history art theory aesthetics and cartography

**Proceedings** Association of Collegiate Schools of Architecture. Meeting, 2004

**Robert Smithson** Ann Reynolds, 2004-10-01 An examination of the interplay between cultural context and artistic practice in the work of Robert Smithson Robert Smithson 1938 1973 produced his best known work during the 1960s and early 1970s a period in which the boundaries of the art world and the objectives of art making were questioned perhaps more consistently and thoroughly than any time before or since In Robert Smithson Ann Reynolds elucidates the complexity of Smithson's work and thought by placing them in their historical context a context greatly enhanced by the vast archival materials that Smithson's widow Nancy Holt donated to the Archives of American Art in 1987 The archive provides Reynolds with the remnants of Smithson's working life magazines postcards from other artists notebooks and perhaps most important his library from which she reconstructs the physical and conceptual world that Smithson inhabited Reynolds explores the relation of Smithson's art making thinking about art making writing and interaction with other artists to the articulated ideology and discreet assumptions that determined the parameters of artistic practice of the time A central focus of Reynolds's analysis is Smithson's fascination with the blind spots at the center of

established ways of seeing and thinking about culture For Smithson New Jersey was such a blind spot and he returned there again and again alone and with fellow artists to make art that through its location alone undermined assumptions about what and more important where art should be For those who guarded the integrity of the established art world New Jersey was elsewhere but for Smithson elsewheres were the defining if often forgotten locations on the map of contemporary culture

**Robert Smithson--sculpture** Robert Carleton Hobbs,1981 Serves as a record of Smithson s known three dimensional works strikingly illustrated with color plates and more than 225 black and white illustrations Dustjacket **Writing Architectures** Hélène Frichot,Naomi Stead,2020-10-29 Architects and fiction writers share the same ambition to imagine new worlds into being Every architectural proposition is a kind of fiction before it becomes a built fact likewise every written fiction relies on the construction of a context in which a story can take place This collection of essays explores what happens when fiction experimental writing and criticism are combined and applied to architectural projects and problems It begins with ficto criticism an experimental and often feminist mode of writing which fuses the forms and genres of essay critique and story and extends it into the domain of architecture challenging assumptions about our contemporary social and political realities and placing architecture in contact with such disciplines as cultural studies literary theory and ethnography These sixteen newly written pieces have been selected for this volume to show how ficto critical writing can be a powerful vehicle for creative architectural practice providing new opportunities to explore modes of writing about architecture both within and beyond the discipline The collection represents a broad range of geographical and cultural positions including indigenous and non Western contexts and includes a foreword and afterword by important thinkers in the domains of architectural criticism Jane Rendell and cultural studies ethnography Stephen Muecke Frieze ,2005 Resurgence in Jane Urquhart's Œuvre ; [inspired by the 48th Conference of Professors of English at the University of Orléans (May 16-18, 2008) Héliane Daziron-Ventura,Marta Dvorak,2010 This volume was inspired by the 48th Conference of Professors of English at the University of Orleans May 16 18 2008
