All Possible Wars? Sam J. Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards

Anarchy and Legal Order Gary Chartier, 2013 This book elaborates and defends law without the state It explains why the state is illegitimate dangerous and unnecessary

Larsen, 2016-04-30 As part of its general rethinking of America's global strategy the Bush Administration initiated a re-examination of America's nuclear doctrine that has generated considerable controversy with its focus on maintaining a reliance on nuclear weapons and potentially increasing willingness to use them Here a group of leading strategic analysts examine the background to the re-evaluation issues of implementation and potential implications internationally

The Future of Christian Realism Dallas Gingles, Joshua Mauldin, Rebekah L. Miles, 2023-04-15 In the world's most developed democracies anxiety about the future of democracy is palpable The tension between moral aspiration and moral despair has reached a point of crisis Christian realism arose during a similar time of crisis when Reinhold Niebuhr used the insights of the Christian tradition to interpret the clash between democracy and totalitarianism Beginning with Robin Lovin's account of Christian realism as a nuanced blend of theological moral and political realisms The Future of Christian Realism addresses fundamental topics in theology

ethics and politics The contributors come from different traditions span five continents and together present a case for the continuing relevance of Christian realism By paying close attention to many of the most pressing moral challenges facing societies today the authors illustrate and evaluate the enduring relevance of Christian realism [Resistance and Change in World Politics](#) Svenja Gertheiss, Stefanie Herr, Klaus Dieter Wolf, Carmen Wunderlich, 2017-03-07 This edited volume analyses different forms of resistance against international institutions and charts their success or failure in changing the normative orders embodied in these institutions Non state groups and specific states alike advocate alternative global politics at the same time finding themselves demonized as pariahs and outlaws who disturb established systems of governance However over time some of these actors not only manage to shake off such allegations but even find their normative convictions accepted by international institutions This book develops an innovative conceptual framework to understand and explain these processes using seven cases studies in diverse policy fields including international security health migration religion and internet politics This framework demonstrates the importance of coalition building and strategic framing in order to form a successful resistance and bring change in world politics **Biological Warfare and Disarmament** Susan Wright, 2002 This book proposes fresh approaches and concrete proposals to overcome one of the most intractable security problems of the twenty first century Visit our website for sample chapters **Weapons of Mass Destruction** E. Spiers, 2000-02-24 The proliferation of weapons of mass destruction has continued to give cause for concern even after the end of the Cold War This book analyses how the prospects for proliferation have changed since the 1990s particularly in light of the Gulf War and the UN inspections of Iraq It will examine the new pattern of incentives and disincentives for proliferation the utility of these weapons at state and sub state levels and their implications for arms control and international security *Terror by Consent* Lori J. Underwood, 2007 Terror by Consent is an analysis of social contract theory as it is applied to problems in the modern world including poverty terrorism ideological warfare and political cynicism The initial chapters of this book summarize and critique major social contract theories including those of Hobbes Locke Rousseau Kant and Rawls Subsequent chapters address modern political issues such as governmental legitimacy allocation of scarce resources ideological crises and the rise of terrorism *Democratic Wars* A. Geis, L. Brock, H. Mueller, 2006-02-28 The book turns the democratic peace theme on its head rather than investigating the reasons for the supposed pacifism of democracies it looks for the causes of their militancy In order to solve this puzzle the authors look across International Relations political theory political philosophy and sociology *Threat of Ballistic Missiles in the Middle East* Arie Stav, 2004-06-01 This addresses the complex issue of defence against ballistic missiles by intercepting them at various stages of their trajectory The book poses both technical and conceptual questions regarding the issue of missile to missile interception and other options **The Price of Peace** Charles Reed, David Ryall, 2007-02-15 Lively political and public debates on war and morality have been a feature of the post Cold War world The Price of Peace argues that a re examination of the just war tradition is therefore required The authors suggest

that despite fluctuations and transformations in international politics the just war tradition continues to be relevant. However, they argue that it needs to be reworked to respond to the new challenges to international security represented by the end of the Cold War and the impact of terrorism. With an interdisciplinary and transatlantic approach, this volume provides a dialogue between theological, political, military, and public actors. By articulating what a reconstituted just war tradition might mean in practice, it also aims to assist policy makers and citizens in dealing with the ethical dilemmas of war.

In parallel, the People's Republic of China is constantly modernizing its ballistic missile forces and is gearing up for a possible contingency with its self-proclaimed high-tech adversaries. The Air Force Law Review, 2016. *North Korea and Northeast Asia* Samuel S. Kim, Tai Hwan Lee, 2002. North Korea's regime has managed to survive in the face of serious internal and external challenges. Kim, political science, Columbia U. and Lee, foreign policy and security studies, Sejong Institute, South Korea, present eight essays that address North Korea's system survival strategies in the context of these challenges from a variety of theoretical perspectives, including asymmetrical conflict theory, mercantile neorealism, and prospect theory. Japan, Russia, South Korea, and the United States are the Northeast Asian powers for the purposes of this discussion. The global, regional, and national forces that have shaped patterns of conflict and cooperation with the Northeast Asian powers and the effects of the security and economic domains on system survival strategies. The Evolving U.S. Nuclear Narrative Rebecca K.C. Hersman, Clark Murdock, Shanelle Van, 2016-10-28. In recent years, it has become increasingly clear to many observers that the Department of Defense must better communicate to the officers at the tactical end of the nuclear mission a rationale for nuclear weapons and deterrence, the critical role that they play in the post-Cold War strategy of the United States, and the value of nuclear weapons to the security of the American people. This report tracks the changing conceptual and political landscape of U.S. nuclear deterrence to illuminate the gap in prioritizing the nuclear arsenal and to build a compelling rationale for tactical personnel explaining the role and value of U.S. nuclear weapons.
