First published in 1989 Russia's Age of Silver represents a major contribution to the history of the international economy during the eighteenth century challenging old prejudices and establishing the importance of Russian precious metal production Ian Blanchard examines the nature of the Central and South America specie crisis of 1670 to 1760 and the response of European precious metal producers He highlights the rise of the Russian copper industry to a position of world supremacy and the Siberian gold and silver mines to old world supremacy The study explains why Russia experienced little inflation and why no metal was exported the economy acted as a sponge absorbing the flood of coins as monetary expansion was paralleled by rapid economic growth These developments doubled average per capita incomes over the course of the century so that between 1788 and 1807 the average Russian enjoyed an income equivalent to that of their British counterpart Providing a comprehensive analysis this reissue will be of particular value to students and researchers with an interest in Russian economic history The Economics of World War I Stephen Broadberry, Mark Harrison, 2005-09-29 This unique volume offers a definitive new history of European economies at war from 1914 to 1918 It studies how European economies mobilised for war how existing economic institutions stood up under the strain how economic development influenced outcomes and how wartime experience influenced post war economic growth Leading international experts provide the first systematic comparison of economies at war between 1914 and 1918 based on the best available data for Britain Germany France Russia the USA Italy Turkey Austria Hungary and the Netherlands The editors overview draws some stark lessons about the role of economic development the importance of markets and the damage done by nationalism and protectionism A companion volume to the acclaimed *The Economics of World War II* this is a major contribution to our understanding of total war **Russia Since 1980** Steven Rosefielde, Stefan Hedlund, 2009 Russia since 1980 recounts the epochal political economic and social changes that destroyed the Soviet Union ushering in a perplexing new order Two decades after Mikhail Gorbachev initiated his regime wrecking radical reforms Russia has reemerged as a superpower It has survived a hyperdepression modernized restored private property and business adopted a liberal democratic persona and asserted claims to global leadership Many in the West perceive these developments as proof of a better globalized tomorrow while others foresee a new cold war Globalizers contend that Russia is speedily democratizing marketizing and humanizing creating a regime based on the rule of law and respect for civil rights Opponents counterclaim that Russia before and during the Soviet period was similarly misrepresented and insist that Medvedev's Russia is just another variation of an authoritarian Muscovite model that has prevailed for more than five centuries The cases for both positions are explored while chronicling

events since 1980 and a verdict is rendered in favor of Muscovite continuity Russia will continue challenging the West until it breaks with its cultural legacy

Jewish Immigrant Entrepreneurship in New York and London 1880-1914 A.

Godley, 2001-07-18 How successful were the East European Jewish immigrants in London compared with the vast majority that went to New York This critical question one that lies at the heart of debates on Jewish modernity ethnic and racial assimilation and the impact of culture on entrepreneurship is assessed systematically for the first time in this volume Using new evidence of Jewish immigration mobility and assimilation Andrew Godley shows that despite similar backgrounds and opportunities the Jews in London were far less entrepreneurial and those in New York As the Jewish immigrants assimilated either American or British cultural values those in New York moved en masse into self employment while those in London opted to remain as workers Godley then reinterprets the broad thrust of British twentieth century economic history emphasising how these long standing anti entrepreneurial and highly conservative craft cultural values among the English working classes acted as a drag on innovation hampering industrial relations investment and growth

The Political Economy of Stalinism Paul R. Gregory, 2004 This book uses the formerly secret Soviet state and Communist Party archives to describe the creation and operations of the Soviet administrative command system It concludes that the system failed not because of the jockey i e Stalin and later leaders but because of the horse the economic system Although Stalin was the system's prime architect the system was managed by thousands of Stalins in a nested dictatorship The core values of the Bolshevik Party dictated the choice of the administrative command system and the system dictated the political victory of a Stalin like figure This study pinpoints the reasons for the failure of the system poor planning unreliable supplies the preferential treatment of indigenous enterprises the lack of knowledge of planners etc but also focuses on the basic principal agent conflict between planners and producers which created a sixty year reform stalemate

Russia and America Colin White, 2023-06-14 Russia and America 1987 examines the divergence between two countries organised on diametrically opposed economic principles one centrally planned state dominated the other a highly decentralised market economy free

from significant government intervention It highlights not the political changes brought about by the Russian revolution but a longer more gradual process of interaction between physical and human environments A comparative study extending over several centuries is used to account for the striking differences in their economic history **Before Command** Paul R. Gregory, 2014-07-14 In a work with significant implications for present day economic reform in the Soviet Union Paul Gregory examines Russian and Soviet economic history prior to the installation of the administrative command system By drawing on basic economic statistics from 1861 to the 1930s Gregory's revisionist account debunks a number of myths promulgated by historians in both the East and the West He demonstrates that the Russian economy under the tsars performed much better than has previously been supposed the Russian economy and its financial institutions were integrated into the world economy allowing Russia to attract significant foreign capital Furthermore he shows that Stalin's justifications for the abandonment of the New Economic Policy in the late 1920s were incorrect the so called crises of NEP were either fabricated or the result of misguided economic thinking Before Command is the culmination of the author's lifelong study of the economic history of Russia and the Soviet Union In convincing detail it describes little known Russian and Soviet successes with market capitalism while it also shows the problems inherent in a mixed system such as the NEP which seeks to combine very strong elements of command with market resource allocation Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 The Standard of Living and Revolutions in Imperial Russia, 1700-1917 Boris Mironov, 2012-05-31 This is the first full scale anthropometric history of Imperial Russia 1700 1917 It mobilizes an immense volume of archival material to chart the growth weight and other anthropometric indicators of the male and female populations in order to chart how the standard of living in Russia changed over slightly more than two centuries It draws on a wide range of data statistics on agricultural production taxation prices and wages nutrition and demography to draw conclusions on the dynamics in the standard of living over this long period of time The economic social and political interpretation of these findings make it possible to reconsider the prevailing views in the historiography and to offer a new perspective on Imperial Russia
