Dupree,Stanley K. Fraley,2012-09-07 The mathematical technique of Monte Carlo as applied to the transport of sub atomic particles has been described in numerous reports and books since its formal development in the 1940s Most of these instructional efforts have been directed either at the mathematical basis of the technique or at its practical application as embodied in the several large formal computer codes available for performing Monte Carlo transport calculations This book attempts to fill what appears to be a gap in this Monte Carlo literature between the mathematics and the software Thus while the mathematical basis for Monte Carlo transport is covered in some detail emphasis is placed on the application of the technique to the solution of practical radiation transport problems This is done by using the PC as the basic teaching tool This book assumes the reader has a knowledge of integral calculus neutron transport theory and Fortran programming It also assumes the reader has available a PC with a Fortran compiler Any PC of reasonable size should be adequate to reproduce the examples or solve the exercises contained herein The authors believe it is important for the reader to execute these examples and exercises and by doing so to become accomplished at preparing appropriate software for solving radiation transport problems using Monte Carlo The step from the software described in this book to the use of production Monte Carlo codes should be straightforward     Russian Roulette James Mitchell,1973     *The Detective* ,1986     **A Gambling Guide** Nicolae Sfetcu,2014-05-03 Gambling as a betting action wagering money or something of material value on an event with an uncertain outcome with the primary intent of winning additional money or material goods A guide about what is gambling with a special section for online gambling casino games with both beatable casino games poker blackjack video poker with progressive jackpot pai gow poker sports betting horse racing parimutuel slot machines and other gambling machines and unbeatable casino games baccarat craps roulette keno casino war faro pachinko sic bo let it ride 3 card poker 4 card poker red dog Caribbean stud poker etc and non casino gambling games bingo lottery mahjong backgammon bridge etc Fixed odds gambling in sports is also present in this book with horse racing greyhound racing football particularly association football American football and rugby golf tennis cricket baseball basketball ice hockey snooker motor sports boxing darts cross country skiing and biathlon Please don t forget to take a look to the legality of the gambling and online gambling as well as to the articles warnings and links dedicated to the gambling addiction Extreme cases of problem gambling may cross over into the realm of mental disorders     **Comprehensive Textbook of Suicidology** Alan Lee Berman,Morton M.
