**The Changing Languages of Europe** Bernd Heine, Tania Kuteva, 2006-06-22 The languages and dialects of Europe this book shows are becoming increasingly alike Furthermore this unifying process goes at least as far back as the Roman empire is accelerating and affects every one of Europe's 150 or so languages including those of different families such as Basque and Finnish The changes are by no means restricted to lexical borrowing but involve every grammatical aspect of the language They are usually so minute that neither native speakers nor trained linguists notice them But they accumulate and give rise to new grammatical structures that lead in turn to new patterns of areal relationship Professor Heine and Professor Kuteva look for the causes of linguistic change in cultural and economic exchanges across national and regional boundaries and in the processes that occur when speakers learn or are in close contact with another language Testing their data and conclusions against findings from elsewhere in the world the authors reconstruct and reveal when how and why common grammatical structures have evolved and continue to evolve in processes of change that will they argue transform the linguistic landscape of Europe The book is written in clear non technical language It will appeal to scholars and students of language change and variation in Europe and elsewhere It will also interest everyone concerned to understand the nature of language and language change

The Political Economy of Pacific Russia Jing Huang, Alexander Korolev, 2016-11-08 This thought provoking book edited by Jing Huang and Alexander Korolev redefines the complex political and economic landscape of the Asia Pacific region Written by internationally recognized experts from Russia China South Korea Japan Norway and Singapore it provides an in depth

analysis of international cooperation in the development of Russia's Far East and Siberia. It explores the geo-economic and geopolitical standing of Pacific Russia and examines both the factors that lie behind and the mechanisms that allow its integration into Asia. The authors argue that such development is essential for diversifying Russia's economy but that this turn to Asia is still inconsistent and would benefit from being truly international and multilateral. The protracted crisis in relations between Russia and the West they point out has only made it more significant. This edited volume will appeal to political scientists, economists, scholars of development studies and international relations and policy makers. **Russian**

**Trade Policy Reform for WTO Accession** Harry G. Broadman, 1998-01-01. Russia has manifested considerable interest in accession to the World Trade Organization (WTO). This volume contains four policy papers that focus on the most prominent topics during the ongoing WTO accession process: 1. the dispersion of Russia's tariff structure; 2. trade and investment in the service sectors; 3. the treatment of state trading enterprises; and 4. the policy regime governing foreign direct investment. Bringing the Russian Federation into the rules-based WTO system is an objective broadly shared by the world community. Accession to the WTO comes at a critical juncture for the Russian government to focus on many important policy issues to stimulate growth. As part of the process of making liberalization commitments as required by the existing members of the WTO, accession provides an opportunity to lock in reforms. Exploring the US Language Flagship Program Dianna

Murphy, Karen Evans-Romaine, 2016-11-07. A number of reports in the US have highlighted the country's need for improved second language skills for both national security and economic competitiveness. The Language Flagship program launched in 2002 aims to raise expectations regarding language proficiency levels at the post-secondary level and to address structural gaps in the curricula of many L2 programs. This federally funded program provides opportunities for US undergraduate students in any specialization to reach a professional level of competence in a targeted second language by graduation. This volume highlights innovative practices that enable students to achieve this goal even those with no exposure to the second language prior to university. This book explores the rationale and history of the federal program and showcases models and strategies of existing Flagship programs. **Russian Stage Two** Actr, 2009-07-27.
