**Russia's Chechen Wars 1994-2000** Olga Olier,2001-09-28 An examination of the difficulties faced by the Russian military in planning and carrying out urban operations in Chechnya Russian and rebel military forces fought to control the Chechen city of Grozny in the winters of 1994 1995 and 1999 2000 as well as clashing in smaller towns and villages The author examines both Russian and rebel tactics and operations in those battles focusing on how and why the combatants' approaches changed over time The study concludes that while the Russian military was able to significantly improve its ability to carry out a number of key tasks in the five year interval between the wars other important missions particularly in the urban realm were ignored largely in the belief that the urban mission could be avoided This conscious decision not to prepare for a most stressful battlefield met with devastating results a lesson the United States would be well served to study

Zarzecki,2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997

**China's Stealth Fighter** Abraham Abrams,2025-01-02 A detailed exploration of China's J 20 stealth fighter its development impact and role in reshaping global power dynamics The United States and Soviet Union began a race to

develop the first and most capable fifth generation stealth fighters in the late 1970s The Cold War's end however was followed by both a near total collapse of Russian efforts and major cuts and delays to American programs This provided an opening for a rising and fast modernising Chinese defense industry to kick off its own ambitious program to produce a world leading fighter jet with next generation capabilities Once unveiled the program came to be seen as a herald of China's rising status as a leading player in high tech and major world power Development of the Chengdu J 20 began in the 1990s and has since consistently far exceeded expectations in both its performance and its development timeline The fighter made its first flight in 2011 and began deliveries to the People's Liberation Army Air Force in 2016 a small fraction of the time its American and Russian rivals would take Today it is the world's second most numerous stealth fighter outnumbered only by America's much smaller Lockheed Martin F 35 Lightning II with the two rivals seeing their first of many likely encounters confirmed in March 2022 As the J 20's capabilities have rapidly improved and the rate of production has significantly grown it has very conspicuously played a growing role in patrolling major hotspots in East Asia from Korea and the East China Sea to the Taiwan Strait and disputed South China Sea The J 20 program's success has been the most potent symbol of China's ascent from a minor player in combat aviation during the Cold War to the United States only peer level competitor today It has also set China on a course of pursuing multiple other fighter development efforts including a close competition with America to field the first and most capable sixth generation fighter in the 2030s The J 20 thus marks a major landmark not only in Chinese aviation history but also more broadly in the evolving balance of power between East and West as the country's technological and economic ascents allow it to successfully pursue highly ambitious weapons programs This book takes the J 20's story far back to the formation of the People's Liberation Army Air Force and its trial by fire in the Korean War tracing the rationale for developing a top end air superiority fighter It also compares its performance with rival fifth generation fighter programs in other countries and looks ahead to what the future may hold in this new arms race

**J-20 Mighty Dragon** Abraham Abrams, 2024-12-31 The J 20 fifth generation stealth fighter program has epitomised China's rise from a laggard in combat aviation into a potential world leader J 20 Mighty Dragon Asia's First Stealth Fighter in the Era of China's Military Rise details the J 20's technologies capabilities production timeline design priorities roles evolution and the formations and locations where it has been deployed the ways other countries have responded to it and how the last 30 years of China's industrial and technology sector's modernisation positioned the country to produce what may well now be the world's top air superiority fighter The J 20 program is the most high profile indicator of a turning point in the balance of power between China and the United States and has produced by far the most capable fighter that America or its allies could face in a potential conflict An assessment of the history of Chinese air superiority capabilities and how the Korean War in particular has influenced the country to place a very strong emphasis on the need to field a leading fighter for air to air combat thus provides an important deeper understanding of the program Important context to understanding the J 20's

significance and its current global standing is provided by brief assessments of the positions of the Russian and American fighter industries The parallel development of supporting assets from aerial tankers to electronic warfare planes is also explored for a better understanding of the much transformed Chinese fleet which J 20s are being inducted into The program is also shown to have had a particularly significant influence in the United States ranging from placing discourse on the F 35 s modernisation and on sixth generation fighter development in an entirely new context to stimulating the formation of new counter stealth aggressor training units development of new air to air missiles and the acquisition of E 7 flying radar aircraft among many other responses to the new challenge J 20 Mighty Dragon Asia s First Stealth Fighter in the Era of China s Military Rise is the first volume in the new Technology War series and is extensively illustrated with colour photographs throughout and specially commissioned colour artworks

*War of Intervention in Angola* Adrien Fontanellaz,Tom Cooper,José Augusto Matos,2023-06-30

Through late 1987 and early 1988 the battlefields of southern Angola moved ever further away from the border with South West Africa Namibia until the showdown between the Soviet and Cuban supported government in Luanda and South African supported insurgency of UNITA culminated in the controversial and still much disputed Battle of Cuito Cuanavale During this period Angolan and Cuban airpower slowly grew to a point where it outmatched the SAAF in turn limiting the freedom of movement of the SADF and UNITA ground forces and reducing their operations to attritional battles with little chance of achieving major victories on terms acceptable to the government in Pretoria As the changing political climate between East and West and in Africa began to bring about an end to the South African intervention in Angola and the occupation of South West Africa Namibia the government of Angola was able to switch its attentions to dealing with UNITA Volume 5 of War of Intervention in Angola examines in detail this final period of Cuban involvement in the long and tragic civil war that ruined Angola between 1975 and 1992 While the emphasis is upon the operations of the Angolan and Cuban air forces it also details how these impacted upon the ground operations of all parties This volume is richly illustrated with original photographs of the forces involved specially commissioned maps of the ground operations and a range of full color artworks
