In the foreground, a black and white photograph is laid out, showing a dark, rectangular object, possibly a piece of equipment or a specimen, on a light-colored surface. The overall lighting is soft and warm, suggesting an indoor setting with natural light.

 inspirations that initiated the enquiry into the physical world and its evolution as a discipline Simultaneously it motivates the  
 reader to step ahead with a little dismay to undertake a journey in the astonishing world of physics It starts with the  
 observation of nature and posits the questions which kept perplexing the mind of great physicists of our time In finding  
 answers it verily explores the relationship of the observer with the object And while so doing it catapults the readers into the  
 bizarre world of natural laws equations hypothesis and theorems The presentation reserves its difference unlike books  
 published these days in the treatment of the subject without involving mathematics or without making tall claims of seeking
