Arrow Debreu choice theory and its extensions are presented from the Primal Dual and Revealed Preference points of view Consumers are not the only agents in the economy as Producers are present as well Beginning with a study of the Arrow Debreu idea that producers choose from a convex production set so as to maximize profit the book considers extensions and generalizations of this framework particularly to non convex environments The study is presented from the Primal and Dual points of view The final chapter in the book provides a link to its Companion Volume The Chapter indicates how the theories of consumer and producer choice studied here help inform answers of the second question posed above Resources are available to instructors who adopt this book More details at www.worldscientific.com/worldscibooks/10.1142/12789_sm

institutions decision rules routines or consumer preferences for explaining the complex evolutionary changes in the economy In so doing evolutionary economics significantly broadens the scope of economic analysis and sheds new light on key concepts and issues of the discipline This handbook draws on a stellar cast list of international contributors ranging from the founders of the field to the newest voices The volume explores the current state of the art in the field of evolutionary economics at the levels of the micro e g firms and households meso e g industries and institutions and macro e g economic policy structure and growth Overall the Routledge Handbook of Evolutionary Economics provides an excellent overview of current trends and issues in this rapidly developing field
