Edible Films and Coatings for Food Applications Milda E. Embuscado, Kerry C. Huber, 2009-06-10 Edible films and coatings play an important role in the quality safety transportation storage and display of a wide range of fresh and processed foods Edible films and coatings while preventing moisture loss and maintaining quality prevent spoilage and microbial contamination of foods The edible film and coating industry is now a multimillion dollar industry Less than 1 million in 1999 the market has grown to more than 100 million and is expected to grow to 350 million by 2008 according to James Rossman of Rossman Consulting Pharmaceutical and consumer products have been responsible for the tremendous increase This growth has produced an enormous amount of scientific articles patents and research projects undertaken by members of the food industry academia and research institutions *Edible Films and Coatings for Food Applications* brings together this vast wealth of scientific knowledge in a systematically organized volume It examines the science application function and market for edible films and coatings

Apolipoproteins, Triglycerides and Cholesterol Viduranga Yashasvi Waisundara, Miljana Z. Jovandarić, 2020-06-17 Lipids are one of the most important biomolecules and given their relationship with several non communicable diseases at large this makes them significant to be studied both biochemically and clinically As the title of the book suggests apolipoproteins triglycerides and cholesterol are focused herein with fresh perspectives and novel insights while certain overlooked areas are given their due attention Although these three terms are very broad the book aims at primarily serving as an update to existing knowledge It is hoped that the readers will benefit from this book in advancing their understanding about the biochemical pathways clinical applications and remedial action in terms of ensuring health and wellbeing as well as in identifying gaps that would help set the directions of scientific investigations in the future

Ion Channels in Biophysics and Physiology Lei Zhou, 2022-02-09 This book gathers relatively recent and significant topics in the field of ion channel research Ion channels form the molecular basis for membrane excitability in cells present in the cardiovascular and nervous systems In many non excitable cells ion channels contribute to diverse physiological functions including the secretion of signaling compounds like hormones and insulin cell volume regulation intracellular signaling especially Ca²⁺ signaling etc Many human diseases have been attributed to abnormal channel functions and defective membrane expression of channel proteins On the other hand ion channels are excellent models for studying protein biophysics especially the allosteric regulation of protein function by miscellaneous stimuli Therefore research on ion channels

carries significant meaning for the understanding of basic protein biophysics and diverse physiological functions Such vital information also assists in developing novel and effective treatments for related human diseases This book provides graduates and scientists in both basic and clinical levels a comprehensive understanding of cutting edge advances and a useful and stimulating platform for tackling their own questions about ion channels

Genetic Diseases of the Eye Elias I. Traboulsi, Professor of Ophthalmology and Director Center for Genetic Eye Diseases Elias I Traboulsi, Med, Virginia Miraldi Utz, Department Chair Pediatric & Neuro-Ophthalmology Arif O Khan, 2025-08-22 Since the publication of the Human Genome Project in 2001 and the development of Genome Wide Association Studies GWAS there has been a major shift toward large scale international collaboration in genetic eye disease research Eye researchers involved in genetics have now joined forces with traditional epidemiologists to develop the field of genetic epidemiology Whilst ophthalmic geneticists had focused on rare pathogenic variants mutations with strong effects epidemiologists had focused on common gene variants with small but additive effects see Figure 1 These two areas have now merged identifying a spectrum of genetic variants that are rare intermediate or common with strong medium or mild pathogenicity
