Sculptural Sphere:

Sculptural Sphere Rainald Schumacher, 2004 The multi dimensionality of our daily experiences is reduced by the television and internet media to the surface of a flat screen Thus reality loses more and more of its spatial qualities even as theoretical physicists develop increasingly sophisticated models to better understand the structures of time and space As they employ an ever growing number of dimensions in this endeavor the mode of our sensual reception continues to become as flat and one dimensional as the monitors of the computers at which we work Throughout the history of art sculpture has been prized as one of the foremost artistic expressions in western culture one that employs far less illusionism than for instance painting The works included in *Sculptural Sphere* are analyzed based on their spatial parameters Their dimensions prove useful in defining the sculptural sphere that surrounds our bodies as well as our reception of our multi dimensional spatial environment

The Sculptural in the (Post-)Digital Age Mara-Johanna Kölmel, Ursula Ströbele, 2023-06-19 Digital technologies have profoundly impacted the arts and expanded the field of sculpture since the 1950s Art history however continues to pay little attention to sculptural works that are conceived and materialized using digital technologies How can we rethink the artistic medium in relation to our technological present and its historical precursors A number of theoretical approaches discuss the implications of the so called Aesthetics of the Digital referring above all to screen based phenomena For the first time this publication brings together international and trans historical research perspectives to explore how digital technologies re configure the understanding of sculpture and the sculptural leading into the post digital age Up to date research on digital technologies expansion of the concept of sculpture Linking historical sculptural debates with discourse on the new media and post digital culture

The Sculptural Imagination Alex Potts, 2000-01-01 Potts also offers a detailed view of selected iconic works by sculptors ranging from Antonio Canova and Auguste Rodin to Constantin Brancusi David Smith Carl Andre Eva Hesse and Louise Bourgeois key players in modern thinking about the sculptural The impact of minimalism features prominently in this discussion for it disrupted accepted understanding of how a viewer interacts with a work of art thereby placing the phenomenology of viewing three dimensional objects for the first time at the center of debate about modern visual art

Jacket Sculptural Materiality in the Age of Conceptualism Marin R. Sullivan, 2017-07-05 *Sculptural Materiality in the Age of Conceptualism* is structured around four distinct but interrelated projects initially realized in Italy between 1966 and 1972 Yayoi Kusama's Narcissus Garden Michelangelo Pistoletto's Newspaper Sphere Sfera di giornali Robert Smithson's Asphalt Rundown and Joseph Beuys's Arena These works all utilized non traditional materials collaborative patronage models and alternative modes of display to create a spatially and temporally dispersed arena of matter and action with photography serving as a connective material thread within the sculpture it reflects While created by major artists of the postwar period these particular projects have yet to receive substantive art historical analysis especially from a sculptural perspective Here they anchor a transnational narrative in which sculpture emerged as a node a

center of transaction comprising multiple material phenomenon including objects images and actors When seen as entangled polymorphous entities these works suggest that the charge of sculpture in the late postwar period came from its concurrent existence as both three dimensional phenomena and photographic image in the interchanges among the materials that continue to activate and alter the constitution of sculpture within the contemporary sphere
