granting them the monopoly in sea trade and using the Anatolian Greeks as the main active bearers and transmitters of Persian customs and culture More research into this chapter of Persian history is still required

self understanding and identity formation has been shaped not least through its colonial experiences Until recently such colonial experience has led to a very static picture in our analysis of colonial encounters However as a result of post colonialism post modernism and now globalization our conception of colonization has undergone a rapid and far reaching conceptual change Gone are the days when the Black Sea region was seen as a sea of barbarian wilds enlightened by small flicks of Greek civilization along the coast Settling the Black Sea region was a challenge for the Greeks Compared with the Mediterranean this happened relatively late and the attempt of settling the land was not always equally successful In fact frequently the power balance was in favour of the indigenous population Nevertheless the cultivation of the land and the establishment of exchange systems must have been beneficial for all participants in the exchange network In this volume the acts of an international interdisciplinary conference held at Sandbjerg Manor House Denmark in January 2006 are published 19 contributions by scholars from Denmark France Georgia Great Britain the Netherlands Russia and Ukraine give a profound discussion of various topics such as the physical arena of the colonial encounters as spaces of identity the layout of land and protection of cities the dynamics of the cultural exchange the perception of how it was to be Greek in the Pontic realm and finally the reciprocal strategies exerted by the Greeks and Scythians in Olbia as described in Herodotos Fourth Book of his Histories Through the many sided contributions it is also revealed how self and other is two sides of the same coin yesterday today and tomorrow

metonymically conveyed zoomorphic designs creating an alternative ecological reality The nomadic elite nucleus embraced this elaborate image system to construct collective memory in reluctant diverse political alliances organised around shared geopolitical goals rather than ethnic ties Largely known by the term e animal stylee this zoomorphic visual rhetoric became so ubiquitous across the Eurasian steppe network that it transcended border regions and reached the heartland of sedentary empires like China and Persia This book shows how a shared fluency in animal style design became a status defining symbol and a bonding agent in opportunistic nomadic alliances and was later adopted by their sedentary neighbours to showcase worldliness and control over the e Othere In this study of enormous geographical scope the author raises broader questions about the place of nomadic societies in the art historical canon
