Sea And Shore:

The Sea Shore (Collins New Naturalist Library, Book 12) C. M. Yonge, 2017-08-31 A comprehensive authoritative account of the natural history of the seashore from earliest times to the present day **House documents**, 1876 *The Sea Shore Ecology of Hong Kong* Brian Morton, John Morton, 1983-04-01 Hong Kong is strategically located between the temperate Japonic and the great tropical Indo West Pacific zoogeographic provinces Influenced by the currents of the South China Sea and the huge outflow of fresh water from the Pearl River Hong Kong's marine flora and fauna are extremely diverse Temperate species may appear if only briefly during the cooler winter months Conversely air and water temperatures remain high enough for a strong tropical component Hong Kong is comparatively rich in mangrove stands and reef corals are well developed subtidally There is a strong north west to south east salinity gradient further enhancing diversity Geologically the Hong Kong shore is a drowned coastline deeply incised and with former mountain peaks represented by numerous off shore islands This book reviews the factors creating and maintaining Hong Kong's living shore and describes the wide range of plants and animals found within the intertidal boundaries of the shore A full range from exposure to shelter is to be found from communities of the sheer rock faces beaten by the storm waves of the South China Sea to the denizens of mudflats in high shelter at the heads of harbours and inlets For the first time the occupants of these various shores are illustrated and described both as individual species and as components of a rich mosaic of life The factors of pollution and development that are destroying the diversity of the rich complex of shores are described *Enlisted Transfer Manual* United States. S. Furneaux, 2015-08-05 Excerpt from *The Sea Shore* To sea side naturalists it must be a matter of great surprise that of the inhabitants of our coast towns and villages and of the pleasure seekers that swarm on various parts of the coast during the holiday season so few take a real interest in the natural history of the shore The tide flows and ebbs and the restless waves incessantly roll on the beach without arousing a thought as to the nature and cause of their movements The beach itself teems with peculiar forms of life that are scarcely noticed except when they disturb the peace of the resting visitor The charming vegetation of the tranquil rock pool receives but a passing glance and the little world of busy creatures that people it are scarcely observed while the wonderful forms of life that inhabit the sheltered nooks of the rugged rocks between the tide marks are almost entirely unknown except to the comparatively few students of Nature So general is this apparent lack

of interest in the things of the shore that he who delights in the study of littoral life and scenes but seldom meets with a kindred spirit while following his pursuits even though the crowded beach of a popular resort be situated in the immediate neighbourhood of his hunting ground About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
