The Dynamics of Asian Economic Development Hitoshi Hirakawa,Ferdinand C. Maquito,2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world s attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China s Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural

change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China

Technology and Industrial Progress G. N. Von Tunzelmann, 1995-01-01 What has dictated the rate and direction of technological change How central has it been to industrial progress How has it related to other determinants of economic growth and development In *Technology and Industrial Progress* Dr von Tunzelmann examines theoretical views on the nature and contribution of technology and the empirical evidence from the major industrializing countries from the 18th century to the present day The experiences of countries regarded in their time as the leaders of industrialization Britain in the 18th century the United States in the 19th century and Japan in the 20th century are critically compared by the author The following chapters study the transfer of each of these patterns of technology and growth to later industrializers such as continental Europe the Soviet Union and today's newly industrializing countries Adopting approaches drawn from evolutionary economics Dr von Tunzelmann links micro level phenomena relating to individual firms and technologies to macro level outcomes as reflected in economic growth and development This long awaited book is exceptional both in the range of countries surveyed and the breadth of topics analysed encompassing changes in production processes products and marketing management and finance

International Production Networks in Asia Michael Borras, Dieter Ernst, Stephan Haggard, 2003-09-02 The economic crisis of 1997 called East Asia's economic miracle into question and generated widespread criticism of the region's developmental models However the crisis did little to alter the growing economic integration of American Japanese and Chinese firms who have created cross border production networks This book addresses the changing nature of high tech industries in Asia particularly in the electronics sector where such networks are increasingly designed to foster and to exploit the region's highly heterogeneous technology skills and know how
