## Sea Defence Works:

*Coastal Defence* Institution of Civil Engineers (Great Britain), 2002 The construction of coastal defences has allowed many people to live and work in safety in areas of the United Kingdom that would otherwise have been lost to the sea However building and maintaining such defences is a difficult and expensive undertaking with inevitable consequences for the environment In rural areas some existing defences have been abandoned and given the predicted effects of global warming this policy may be extended in the future This guide explains how shorelines can be managed in a cost effective and environmentally acceptable manner and includes guidance on the design construction and maintenance of coastal defences

Management and the USA and Australia This book is the first to address the legal regulatory aspects of coastal land management from a systematic cross national comparative perspective By including both successful and less effective strategies it aims to inform professionals graduate students policy makers and NGOs of the legal and socio political challenges as well as the better practices from which others could learn

**Environmental Design Guidelines for Low Crested Coastal Structures** Stephen J. Hawkins,Hans Falk Burcharth,Barbara Zanuttigh,Alberto Lamberti,2010-07-07 The effect of manmade activities is primarily local but can extend far away from the location of intervention This underlines the importance of establishing coastal zone management plans covering large stretches of coastlines In recent years interest in Low Crested Structures coastal defense structures with a low crest has been growing together with awareness of the sensitivity to environmental impacts produced by coastal defenses The relation between wave climate beach erosion beach defence means habitat changes and beach value which clearly exists based on EC research results suggests the necessity of an integrated approach when designing coastal protection schemes In accordance with this need the present design guidelines cover structure stability and construction problems hydro and morphodynamic effects environmental effects colonisation of the structure and water quality societal and economic impacts recreational benefits swimming safety beach quality Environmental Design Guidelines for Low Crested Coastal Structures is specifically dedicated to Low Crested Structures and provides methodological tools both for the engineering design of structures and for the prediction of performance and environmental impacts of such structures A briefing of current best practice for local and national planning authorities statutory agencies and other stakeholders in the coastal zone is also covered Presented in a generic way this book is appropriate throughout the European Union taking into account current European Commission policy and directives for the promotion of sustainable development and integrated coastal zone management Fills the gap between engineering and ecology in coastal defense planning Shows the reader how to perform an integrated design of coastal defense schemes Presents latest insights on hydro morphodynamics induced by structures Provides directly applicable tools for the design of low crested structures Highlights socio economic perspectives in coastal defense design

*Coastal Structures 2007 (In 2 Volumes) - Proceedings Of The 5th Coastal Structures International Conference, Cst07* Alberto Lamberti,Leopoldo Franco,Giuseppe Roberto Tomasicchio,2009-06-09 Coastal Structures are undergoing renewal and innovation to better serve the needs of our society from environmental co existence and habitat enhancement to risk management The CSt07 conference is the fifth in a series that highlight significant progress in the innovation design and construction of coastal structures Proceedings of these CSt conferences have yielded milestone works frequently cited references in the field This two volume proceedings contains the final revised version of 178 papers that have been reviewed selected and discussed at the CSt07 conference The volume brings to readers a comprehensive range of contributions covering all aspects of research design construction and maintenance of coastal structures including new up to date interesting topics such as tsunamis and

storm surge defences climate change piled coastal structures as well as ecological issues a new addition to the traditional program

**Coastal Erosion and Protection in Europe** Enzo Pranzini, Allan Thomas Williams, 2013 Climate change is now creating enhanced risks of coastal erosion through storms and rising sea levels This text provides a comprehensive review of the entire coastline of Europe and provides a comparative analysis of the various erosion problems and solutions from across the continent

*Artificial Structures and Shorelines* H. Jesse Walker, 2012-12-06 This volume is the result of an initiative of the Commission on the Coastal Environment of the International Geographical Union The initial concept from which the plan has proceeded was presented at the 24th International Geographical Congress in Japan in 1980

**AUTHORSHIP AND COVERAGE** All of the articles in this volume have been written by specialists familiar with the coastal segment discussed Nearly all have been prepared by citizens of the country and for that matter even each subregion considered In the case of exceptions e g Suriname the authors have conducted fieldwork on the coast of the country they treat In order to preserve the on the spot integrity of the volume it was decided not to fill in the blanks along the world s coastline with library researched chapters Thus coverage is variable Nearly every coastal country in Europe is represented whereas for Africa and South America there are major gaps In addition there are 2 instances of overlap In the case of England with a shoreline of nearly 3 000 km a complementary chapter on Lincolnshire with a shoreline of only 155 km is included The other case is the general article on the Baltic Coast of the USSR which is supported by chapters on Estonia and Lithuania
