worthy since and the continual reports of Water Monsters Bigfoot Mystery Big Cats and U F C s Unidentified Flying Cryptids are largely ignored or used as newspaper fillers to entertain us Andy s focus is on current research and sightings pictures videos and eyewitness accounts of the many cryptids of the British Isles Although vast advancements in science and technology have brought great discoveries in other lesser known parts of the world our island lies largely underexplored and overlooked At night outside of the busy cities and next to the unlit lakes and lonely mountains it is an island in darkness where nobody ventures into the woods anymore and the pervading paradigm scare all but the most foolhardy scientists away from any serious investigation of the many yet to be discovered Beasts Of Britain *Beastly Britain* Karen R.

The Fabled Coast Sophia Kingshill, The Estate of Jennifer Westwood, 2012-06-28. Pirates and smugglers, ghost ships and sea serpents, fishermen's prayers and sailors' rituals: the coastline of the British Isles plays host to an astonishingly rich variety of local legends, customs, and superstitions. In *The Fabled Coast*, renowned folklorists Sophia Kingshill and Jennifer Westwood gather together the most enthralling tales and traditions, tracing their origins and examining the facts behind the legends. Was there ever such a beast as the monstrous Kraken? Did a Welsh prince discover America centuries before Columbus? What happened to the missing crew of the *Mary Celeste*? Along the way, they recount the stories that are an integral part of our coastal heritage, such as the tale of Drake's Drum, said to be heard when England was in peril, and the mythical island of Hy-Brasil, which for centuries appeared on sea charts and maps to the west of Ireland. The result is an endlessly fascinating, often surprising journey through our island history.

Disentangled R. France, 2023-09-14. The Definitive Study and Solution to the Centuries-old Mystery of the World's Most Sighted Sea Serpent. There is a long history of conflating sightings of unidentified marine objects (UMOs), as purported sea serpents. Most sightings are either of an extremely brief duration or made by a single observer and thus often easy to dismiss. This is not the case, however, with respect to the so-called Gloucester Sea Serpent, which frequented the Massachusetts and New York coasts during the early nineteenth century. Witnessed by hundreds of people for extended periods, repeatedly over many days, the Gloucester UMO is the most sighted sea serpent in history. As well due to being the object of study at the time and shortly thereafter by naturalists, the mysterious creature remains the most thoroughly investigated of all putative sea serpents. For these reasons, it has achieved an exalted status among cryptozoologists who maintain it represents the best evidence for the existence of sea serpents. For the first time, an eminently qualified aquatic biologist and ethnozoologist presents the definitive history of the phenomena and carefully examines the evidence. It is concluded that the most parsimonious explanation behind the Gloucester Sea Serpent is as early evidence for what is today recognized as being one of the most serious threats to marine biodiversity: entanglement in fishing gear and other maritime debris. Therefore, although widely considered to be restricted to the advent and widespread use of non-degradable plastic in the middle of the twentieth century, this new interpretation of the Gloucester UMO suggests that entanglement has a much longer environmental history than is commonly believed. Robert L. France is a world-renowned

scientist at Dalhousie University and the author or editor of twenty books and two hundred papers on a wide range of environmental subjects He has undertaken conservation biology research from the High Arctic to the tropics on organisms from bacteria to whales which has been cited many thousands of times in the literature Dr France is a leading authority on many aspects of aquatic zoology including marine ecology and ethnozoology and may be the most qualified person to have recently undertaken research and published peer reviewed articles on the beguiling and befuddling topic of aquatic mystery animals known as cryptids
