Sea Shepherd My Fight For Whales And Seals:

Sea Shepherd Paul Watson, Warren Rogers, Joseph Newman, 1982 Records in detail Watson's heroic war against the whalers and seal hunters who are decimating the animal populations *From Environmental Action to Ecoterrorism?* Gerry Nagtzaam, 2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change

Eye of the Whale Dick Russell, 2001 Eye of the Whale focuses on one great whale in particular the coastal traveling California gray whale Gray whales make the longest migration of any mammal from the lagoons of Baja California to the feeding grounds of the Bering Strait between Alaska and Siberia nearly 6 000 miles That the gray whale exists today is nothing short of miraculous Whaling fleets twice massacred the species to near extinction first during the nineteenth century and again during the early part of the twentieth century BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

International Environmental Law Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law

Learning How to Fly Britt Lind, 2020-05-29 From the time she was three years old living in Norway Britt loved animals and surrounded herself with them When she moved with her family to America she discovered she also loved performing But she had parents who considered all of that a sin Even cheerleading was a big no no but somehow Britt managed to overcome their objections After Clint Eastwood cast her in Play Misty for Me while living in Carmel she moved to L A and quickly was able to obtain work Featured roles led to co starring roles which led to guest starring roles She married a producer had a beautiful baby girl and was working as an actress She had it all Then

tragedy struck and she lost everything Acting work became hard to find and life became a matter of survival After a daring move to New York she found herself singing in Carnegie Hall with a gospel group and working in a musical But still she felt she had not lived up to her expectations and she became overwhelmed with hopelessness But a God given epiphany set her back on track and she realized she had a very good reason to go on *International Perspectives on Maritime Security*

,1996 The International Politics of Whaling Peter J. Stoett,2011-11-01 Whales large mysterious intelligent and endangered In 1986 a global moratorium on whaling was issued by the International Whaling Commission However that decision was not without controversy Some countries such as Norway continue to whale in defiance of the ban In this fascinating book Peter Stoett combines ecological sensitivity with a hard assessment of the political realities of the international regime to examine this important issue The International Politics of Whaling examines contemporary whaling issues with an emphasis on three factors our knowledge of whales and current whale populations and the impact of whaling the actors and institutions involved in the debate over whaling and the ethical dimension Reluctantly he concludes that the current global moratorium on whaling is problematic and that we must focus instead on habitat preservation in order to protect whales more effectively Red Leviathan Ryan Tucker Jones,2022-05-30 A revealing and authoritative history that shows how Soviet whalers secretly helped nearly destroy endangered whale populations while also contributing to the scientific understanding necessary for these creatures salvation The Soviet Union killed over six hundred thousand whales in the twentieth century many of them illegally and secretly That catch helped bring many whale species to near extinction by the 1970s and the impacts of this loss of life still ripple through today s oceans In this new account based on formerly secret Soviet archives and interviews with ex whalers environmental historian Ryan Tucker Jones offers a complete history of the role the Soviet Union played in the whales destruction As other countries especially the United States Great Britain Japan and Norway expanded their pursuit of whales to all corners of the globe Stalin determined that the Soviet Union needed to join the hunt What followed was a spectacularly prodigious and often wasteful destruction of humpback fin sei right and sperm whales in the Antarctic and the North Pacific done in knowing violation of the International Whaling Commission s rules Cold War intrigue encouraged this destruction but as Jones shows there is a more complex history behind this tragic Soviet experiment Jones compellingly describes the ultimate scientific irony today s cetacean studies benefited from Soviet whaling as Russian scientists on whaling vessels made key breakthroughs in understanding whale natural history and behavior And in a final twist Red Leviathan reveals how the Soviet public began turning against their own country s whaling industry working in parallel with Western environmental organizations like Greenpeace to help end industrial whaling not long before the world s whales might have disappeared altogether **Make It a Green Peace!** Frank Zelko,2013-04-03 The emergence of Greenpeace in the late 1960s from a loose knit group of anti nuclear and anti whaling activists fundamentally changed the nature of environmentalism its purpose philosophy and tactics around the world And yet there has been no

comprehensive objective history of Greenpeace's origins until now. *Make It a Green Peace* draws upon meeting minutes, internal correspondence, manifestos, philosophical writings, and interviews with former members to offer the first full account of the origins of what has become the most recognizable environmental non-governmental organization in the world. Situating Greenpeace within the peace movement and counterculture of the 1960s, Frank Zelko provides a much deeper treatment of the group's groundbreaking brand of radical media-savvy direct action environmentalism than has been previously attempted. Zelko traces the complex intellectual and cultural roots of Greenpeace to the various protest movements of the 1950s and 1960s, highlighting the influence of Quakerism with its practice of bearing witness, Native American spirituality, and the non-violent resistance of Gandhi. Unlike the more strait-laced, less confrontational Sierra Club and Audubon Society, early Greenpeaceers smoked dope, dropped acid, wore their hair long, and put their bodies on the line, interposing themselves between the harpoons of whalers and the clubs of seal hunters to save the animals and achieve what they hoped would be a lasting transformation in the way humans regarded the natural world. And while it may not have achieved its most revolutionary goals, Greenpeace inarguably created a heightened awareness of environmental issues that endures to this day. Narrating the key campaigns and arguments among the group's early members, *Make It a Green Peace* vividly captures all the drama, pathos, and occasional moments of absurd comic relief of Greenpeace's tumultuous first decade. [Radical Environmental Resistance](#) Heather Alberro, 2023-11-29 Exploring the role of direct action within times of severe social and ecological upheaval, this book evokes the rich, diverse world that radical environmental activists and indigenous environmental protectors are fighting for. [Tales of an Ecotourist](#) Mike Gunter Jr., 2017-11-21 Crossing the far corners of the globe, *Tales of an Ecotourist* showcases travel from the hot and humid Amazon jungle to the frozen but dry Antarctic as a simple yet spellbinding lens to better understand the complex issue of climate change. At its core, climate change is an issue few truly understand, in large part due to its dizzying array of scientific, economic, cultural, social, and political variables. Using both keen humor and memorable anecdotes while weaving respected scientific studies along the way, Mike Gunter Jr. transports the reader to five famous eco-destinations: from the Galapagos Islands to the Great Barrier Reef, revealing firsthand the increasing threats of climate change. Part travelogue, part current events exposé with a healthy dose of history, ecology, and politics, these tales of eco-adventure tackle such obstacles head-on while fleshing out much-needed personal context to perhaps society's greatest threat of all. **A Reenchanted World** James William Gibson, 2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again. For more than two centuries, Western cultures, as they became ever more industrialized, increasingly regarded the natural world as little more than a collection of useful raw resources. The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining; the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets. In the famous lament of Max Weber, our surroundings became disenchanted with nature's magic swept

away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in *Understanding the Cultures of Fishing Communities* James R. McGoodwin, Food and Agriculture Organization of the United Nations, 2001-01-01 Small scale fishing accounts for almost 95% of the world's fishing and it has been estimated that small scale fishing activities support the livelihoods of more than 200 million people worldwide The purpose of this document is to help fisheries officials gain a clearer understanding of the cultures of small scale fishing communities It is hoped this will enable the development of more successful management policies and practices and empower people in such communities to improve their livelihoods The document highlights the importance of sustaining the rights of access to resources and the integration of cultural considerations into fisheries management policies It includes six case studies from distinct cultural regions of the world *Biological Revolution* Beverly D. Conley, 2002-04-08 Biological Revolution reviews biotech and other scientific developments highlights moral ethical and legal questions relating to both human and nonhuman rights issues and suggests avenues for a practical response Besides analysis and historical perspective this documented work contains spiritual insight i e the latter part of Chapter 2 through Chapter 5 includes Bible prophecy or scripture relevant to world events There are 14 Chapters to this work titled Cutting the Cord to Earth and Heredity The Heavens Bear Witness Re Creation Roots and Rock Following the Precedents Value Legacy of Violence In This Day Decisions Life Patents Reverence for Life Born Free Born Property Exploitation and Coming Together Biological Revolution is written to a general national international audience including near future human tailored beings **Deception** Britt Lind, 2020-05-12 the story takes some refreshingly unexpected turns picking a path through genre cliches and keeping readers guessing Fans of silver screen crime should approve as in many respects this reads like the novelization of a movie Kirkus Britt Lind has written an intriguing mystery filled with twists and turns that takes place in a world she knows well from every perspective Carlyne Grager Talent Representative and Owner of Dramatic Artists Agency Los Angeles and Seattle The battle between good and evil is ill defined in the land of Hollywood Rarely do kind compassionate souls win the spoils of war which makes their rare victories all the sweeter Josh Sibley singer songwriter is handsome talented smart and headed for oblivion Alcohol provides relief when his demons threaten to overwhelm his every effort to break free of his past When his friend Jennie Seger arranges for him to write songs for a multi million dollar feature all his doubts and fears fall away and he embraces the opportunity like a starving man who has found a bounteous feast during a famine Lightning strikes his lonely heart in the form of singer actress Lila Levy who is married to the producer of the movie and flaunts her sexuality at Josh knowing her breathtaking beauty

more than makes up for her lack of talent Knowing his love for Lila is doomed from the start he overlooks her shortcomings and keeps his feelings under wraps as he teaches her to sing his songs But this is Hollywood and nothing is as it seems Lila has secrets that Josh cannot begin to fathom and doesn't want to know When her husband Stan is murdered Lila disappears and Josh is confronted by the woman determined to track her down Sergeant Rosemaria Baker of the Beverly Hills Police Department Rosemaria is the opposite of Lila hates show business and considers Josh a delusional loser When the cops track down Lila and bring her in Lila declares herself innocent and the fight for the soul of Josh Sibley begins

Green Is the New Red Will Potter, 2011-04-12 At a time when everyone is going green most people are unaware that the FBI is using anti terrorism resources to target environmentalists and animal rights activists The courts are being used to push conventional boundaries of what constitutes terrorism and to hit nonviolent activists with disproportionate sentences Some have faced terrorism charges for simply chalking slogans on the sidewalk Like the Red Scare this Green Scare is about fear and intimidation using a word eco terrorist to push a political agenda instill fear and silence dissent The animal rights and environmental movements directly threaten corporate profits every time activists encourage people to go vegan to stop driving to consume fewer resources and live simply Their boycotts are damaging and corporations and the politicians who represent them know it In many ways the Green Scare like the Red Scare can be seen as a culture war a war of values Will Potter outlines the political legal extra legal and public relations strategies that are being used to threaten even acts of nonviolent civil disobedience with the label of terrorism Here is a guided tour into the world of radical activism that introduces the real people behind the headlines and tells the story of how everyday people are being prevented from speaking up for what they believe in Potter a contributor to The Next Eco Warriors warns that the U S government is using post 9 11 anti terrorism resources to target environmentalists and animal right activists in some cases for doing nothing but speaking up Potter warns of the crumbling of the legal wall separating terrorist from dissident or undesirable and concludes his account with a call to action and a decry of the injustice that results in the terrorist label being put on those who threaten American corporate interests Alarming Publishers Weekly In this hard hitting debut journalist Potter likens the Justice Department targeting of environmentalists today to McCarthyism in the 1950s A shocking exposé of judicial overreach Kirkus Reviews Starred review Will Potter is an award winning reporter who has written for publications including the Chicago Tribune the Dallas Morning News and Legal Affairs and has testified before the U S Congress about his reporting He is the creator of www.GreenIsTheNewRed.com where he blogs about the Green Scare

Animality and Children's Literature and Film A. Ratelle, 2014-11-27 Examining culturally significant works of children's culture through a posthumanist or animality studies lens Animality and Children's Literature and Film argues that Western philosophy's objective to establish a notion of an exclusively human subjectivity is continually countered in the very texts that ostensibly work to this end

Soul, Self, and Society Edward L. Rubin, 2015-02-17 Political and social commentators regularly bemoan the decline of

morality in the modern world They claim that the norms and values that held society together in the past are rapidly eroding to be replaced by permissiveness and empty hedonism But as Edward Rubin demonstrates in this powerful account of moral transformations these prophets of doom are missing the point Morality is not diminishing instead a new morality centered on an ethos of human self fulfillment is arising to replace the old one As Rubin explains changes in morality have gone hand in hand with changes in the prevailing mode of governance throughout the course of Western history During the Early Middle Ages a moral system based on honor gradually developed In a dangerous world where state power was declining people relied on bonds of personal loyalty that were secured by generosity to their followers and violence against their enemies That moral order exemplified in the early feudal system and in sagas like The Song of Roland The Song of the Cid and the Arthurian legends has faded but its remnants exist today in criminal organizations like the Mafia and in the rap music of the urban ghettos When state power began to revive in the High Middle Ages through the efforts of the European monarchies and Christianity became more institutionally effective and more spiritually intense a new morality emerged Described by Rubin as the morality of higher purposes it demanded that people devote their personal efforts to achieving salvation and their social efforts to serving the emerging nation states It insisted on social hierarchy confined women to subordinate roles restricted sex to procreation centered child rearing on moral inculcation and countenanced slavery and the marriage of pre teenage girls to older men Our modern era which began in the late 18th century has seen the gradual erosion of this morality of higher purposes and the rise of a new morality of self fulfillment one that encourages individuals to pursue the most meaningful and rewarding life path Far from being permissive or a moral abdication it demands that people respect each other's choices that sex be mutually enjoyable that public positions be allocated according to merit and that society provide all its members with their minimum needs so that they have the opportunity to fulfill themselves Where people once served the state the state now functions to serve the people The clash between this ascending morality and the declining morality of higher purposes is the primary driver of contemporary political and cultural conflict A sweeping big idea book in the vein of Francis Fukuyama's The End of History Charles Taylor's The Secular Age and Richard Sennett's The Fall of Public Man Edward Rubin's new volume promises to reshape our understanding of morality its relationship to government and its role in shaping the emerging world of High Modernity

Conservation Directory, 1986 **Dwelling in Political Landscapes**
Anu Lounela, Eeva Berglund, Timo Kallinen, 2019-05-22 People all over the globe are experiencing unprecedented and often hazardous situations as environments change at speeds never before experienced This edited collection proposes that anthropological perspectives on landscape have great potential to address the resulting conundrums The contributions build on broadly phenomenological structuralist and multi species approaches to environmental perception and experience but they also argue for incorporating political power into analysis alongside dwelling cosmology and everyday practice The book's 13 ethnographically rich chapters explore how the material and the conceptual are entangled in and as landscapes but it

also looks at how these processes unfold at many scales in time and space involving different actors with different powers. Thus it reaches towards new methodologies and new ways of using anthropology to engage with the sense of crisis concerning environment, movements of people, climate change and other planetary transformations. Dwelling in political landscapes: contemporary anthropological perspectives builds substantially upon anthropological work by Tim Ingold, Anna Tsing and Philippe Descola and on related work beyond which emphasises the ongoing and open ended yet historically conditioned ways in which humans and nonhumans produce the environments they inhabit. In such work landscapes are understood as the medium and outcome of meaningful life activities where humans like other animals dwell. This means that landscapes are neither social/cultural nor natural but socio-natural. Protesting against and moving on from the proverbial dualisms of modern Western and maybe capitalist thought is only the first step in renewing anthropology's methodology for the current epoch, however. The contributions ask how seemingly disconnected temporal, representational, economic and other systemic dynamics fold back on lived experience that are materialised in landscapes. Foremost through studying how socially valued landscapes become irreversibly disturbed, commodified or subjected to wilful markings or erasures, the book explores a number of approaches to how landscapes are entangled in the ways people gather and organise themselves. Mindful of troubling changes in Earth Systems, all the authors argue from empirics. They show that processes of landscape change are always both habitual and laden with choices. That is, landscape change is political. Undoubtedly, landscape politics is bound up not just in how nature has been imagined but in long histories of consumption. Today an alarming quest for raw materials and energy continues to change both political and geological formations. Meanwhile dominant socio-political aspirations mean the exploitation of staggering volumes of cheap resources like fossil fuels in order to sustain economic processes that are as taken for granted as they are unsustainable. Like anthropology generally, this book attends to the contextual details buried in such planet-scale pictures. Building on traditional anthropological strengths, many authors consider the details of how the past is brought into the present or erased from it in material flows and sensory awareness as well as in narratives that are explicitly linked to particular landscapes. Colonial identity formation and the different ways that it links with how landscape is viewed and managed for instance for resource development for a global market, whether in Southern Africa, Israel/Palestine, the Canadian arctic or Indonesia, is a particularly striking example of how to talk about landscape is also to talk about past, present and future. And as the idea that we inhabit the Anthropocene becomes commonplace, the discipline can meaningfully discuss the current era as one of disavowed ruins as well as of poorly understood multispecies relations. To think of landscape as historically produced across multiple scales does not mean ignoring its sensuous qualities, let alone its role in cosmological systems. On the contrary, the analyses in the collection attend to the ways people's movements through the landscape produce it as a material and conceptual resource. Taken together, the book's ethnographic analyses take on board the unprecedented conditions under which people everywhere are having to make sense and forge relationships to the worlds they inhabit. Since

landscapes are not what they used to be neither can anthropology be
