This book celebrates the legacy of theologian Marcella Althaus Reid 1952 2009 and her particular influence in Asia and South America Her work has served as a significant source of inspiration to many scholars ministers and activists challenging heteronormative theologies but her sudden death in 2009 cut short the nascent and elegant theological thought for which she so valued Contributors to this book succinctly investigate aspects of the vast work of Althaus Reid by discussing issues of gender race and sexuality in Asia and South America utilising the liberation queer and indecent theologies she espoused Each chapter demonstrates how her legacy is alive and thriving today but also points towards to the potential future impact of her prolific theological output By highlighting the ground breaking work of Althaus Reid this book will serve as a key reference for scholars of Liberation Queer and Indecent Theology as well as Asian and Latinx religions      Nomads of the Borneo Rainforest Bernard Sellato,1994-08-01

The Punan societies of Borneo traditionally nomadic rainforest hunters and gatherers have undergone a transformation over the past centuries As downriver farming peoples expanded upstream and their cultures and technologies diffused the Punan gradually abandoned their nomadic existence for a more sedentary life of trade related activities and subsistence agriculture But the culture that has emerged from these changes is still based on the enduring ideological premises of nomadism This study historical in perspective examines the many factors ecological economic commercial political social cultural and ideological that have played a part in this continuing transformation

Foreword by Georges Condominas      Beyond the Green Myth Peter G. Sercombe,Bernard Sellato,2008-03-18 Borneo with its tales of White Rajahs and tribes of headhunters has long excited the Western imagination Today however there is another green imagination at work Mention of the island is more likely to evoke images of tropical deforestation and concern about the cruel dispossession and displacement of indigenous peoples who once lived in relative harmony with their environment It is perhaps not suprising then that most books dealing with the nomadic hunter gatherers of Borneo have principally been pictorial studies There is indeed a dearth of scholarship regarding these peoples a situation that this first ever comprehensive review of nomadic groups in the Borneo rain forest aims to rectify Presenting a wealth of new research contributed by an international team of scholars the volume covers all of those parts of Borneo where nomads called Penan

Punan or by various other names are or were known to exist and provides a comparative historical ecological study of these groups The study is primarily concerned with issues of modernization including the monetary economy formalized institutions centralized power structures contractual relationships and extraction activities and development policies The impact of these policies is analyzed with special regard to the natural environment inhabited by these small scale societies as well as the use of its resources The book has no stiff theoretical orientation but informs ongoing debates about changing forms of ethnicity relations between minorities and the state minorities rights and survival native discourse the sustainability of tropical forest use and the neo romantic environmentalist myth of so called wise traditional peoples

**The Sea Dyaks and Other Races of Sarawak** Borneo Literature Bureau,1963      **The Dragon and the Rainbow** Robert Blust,2023-08-21 Modernization and conversion to world religions are threatening the survival of traditional belief systems leaving behind only mysterious traces of their existence This book based upon extensive research conducted over a period of nearly four decades brings scientific rigor to one of the questions that have always attracted human curiosity that of the origin of the dragon The author demonstrates that both dragons and rainbows are cultural universals that many of the traits that are attributed to dragons in widely separated parts of the planet are also attributed to rainbows and that the number and antiquity of such shared traits cannot be attributed to chance or common inheritance but rather to common cognitive pathways by which human psychology has responded to the natural environment in a wide array of cultures around the world      *Malaysia Official Year Book* Malaysia,1968      **The Coming of the Gods: Description and analysis** James Jemut Masing,1997      **Two Years in the Jungle** William Temple Hornaday,1894      **Two years in the jungle; the experiences of a hunter and naturalist in India** William Temple Hornaday,1885
