Constitutional Yearbook ,1928 The Sunken Gold Joseph A. Williams,2017-09-01 On January 25 1917 HMS
Laurentic struck two German mines off the coast of Ireland and sank The ship was carrying 44 tons of gold bullion to the still neutral United States via Canada in order to finance the war effort for Britain and its allies Britain desperately needed that sunken treasure but any salvage had to be secret since the British government dared not alert the Germans to the presence of the gold Lieutenant Commander Guybon Damant was the most qualified officer to head the risky mission Wild gales battered the wreck into the shape of an accordion turning the operation into a multiyear struggle of man versus nature As the war raged on Damant was called off the salvage to lead a team of covert divers to investigate and search through the contents of recently sunk U boats for ciphers minefield schematics and other secrets The information they obtained once in the hands of British intelligence proved critical toward Allied efforts to defeat the U boats and win the war But Damant had become obsessed with completing his long deferred mission His team struggled for five more years as it became apparent that the work could only be accomplished by muscle grit and persistence Using newly discovered sources author Joseph A Williams provides the first full length account of the quest for the Laurentic s gold More than an incredible story about undersea diving adventure The Sunken Gold is a story of human persistence bravery and patriotism The Parliamentary Debates Great Britain. Parliament,1908 **The Submarine Service, 1900-1918** Nicholas Lambert,2020-11-25 The year 2001 marks the centenary of the Royal Navy s submarine service In the aftermath of the 2016 celebrations of the Battle of Jutland centenary it is worth considering how the First World War at sea changed This volume opens with an examination of the background to the Board of Admiralty s decision in 1900 to buy submarines bringing to light documents that go a long way toward dispelling the myth that Britain s pre 1914 naval leaders were opposed to the development of the submarine as a major weapon Indeed the documents show that senior naval officers and influential civilians in Whitehall believed that the advent of the submarine would revolutionize naval warfare in a way that would bolster the Royal Navy s position as the world s predominant naval power This edited selection of documents illustrates not only the Admiralty s thinking on the employment of the submarine between 1900 and 1918 it also charts the technical development of British submarines and explains issues such as why the pioneer submariners came to regard themselves as an elite group within the Royal Navy and were allowed to become the silent service *Ill-Made Alliance* Brock Millman,1998-04-20 In 1939 faced with the German

invasion of Czechoslovakia and a growing Italian threat in the Balkans Turkey and Britain and later France signed an alliance in which Turkey linked itself politically and militarily with Britain and France in exchange for financial assistance for its rearmament program Despite the agreement however when the war came to the Mediterranean Turkey did not become involved Presenting a new interpretation of why the alliance failed Brock Millman explores Anglo Turkish relations leading up to the alliance of 1939 taking into account the broader economic military and strategic issues While previous accounts suggest that Turkey entered into the alliance reluctantly Millman contends that it not only wanted an alliance but sought as close a relationship as Britain would concede in the prewar years He attributes the failure of the alliance mainly to Britain's lack of support namely its inability to fit Turkey into its strategy in the Mediterranean its failure to produce a coherent operational plan that could encompass Turkish military co operation and its unwillingness to provide Turkey with timely and much needed financial material and industrial assistance Divided into three parts *The Ill Made Alliance* examines the roots and course of the Anglo Turkish rapprochement in the years 1934-38 the economic military and political factors in 1938-39 that inhibited development of the emerging alliance to the point where it might have been fully functional and the collapse of the alliance in 1939-40

One World Tomorrow , *British Cruisers* Norman Friedman, 2011-01-24 An extraordinarily detailed account of the development of Royal Navy cruisers a towering work from the author of *Fighting the Great War at Sea* Warship 2012 For most of the twentieth century Britain possessed both the world's largest merchant fleet and its most extensive overseas territories It is not surprising therefore that the Royal Navy always showed a particular interest in the cruiser a multipurpose warship needed in large numbers to defend trade routes and police the empire Above all other types the cruiser's competing demands of quality and quantity placed a heavy burden on designers and for most of the interwar period Britain sought to square this circle through international treaties restricting both size and numbers In the process she virtually invented the heavy cruiser and inspired the large 6in armed cruiser neither of which ironically served her best interests This book seeks to comprehend for the first time the full policy background from which a different and entirely original picture of British cruiser development emerges After the war the cruiser's role was reconsidered and the final chapters of the book cover modernizations the plans for missile armed ships and the convoluted process that turned the through deck cruiser into the Invincible class light carriers With detailed appendices of ship data and illustrated in depth with photos and A D Baker's specially commissioned plans *British Cruisers* truly matches the lofty standards set by Friedman's previous books on British destroyers Wow Lavishly illustrated with a photograph or line plan on almost every page The text is packed with technical information detail and description of design construction and application of these important ships
