Kime Steve F.

Seapower In The Nuclear Age The United States Navy And Nato 19498:

Seapower in the Nuclear Age Joel J. Sokolsky, 2021-01-27 This book first published in 1991 provides a major analysis of the prelude to the US's Cold War maritime strategy showing how NATO's maritime forces were organised in the period. It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance's nuclear and conventional deterrent forces. It looks at the structure of the main naval commands, the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO's naval posture in the 1970s. Drawing upon many declassified documents, this account fills an important gap in postwar literature on American seapower and its relation to European security. It also addresses important aspects of NATO strategy and organisation.

Seapower in the Nuclear Age Anthony Eugene Sokol, 1961 **Maritime Strategy and the Nuclear Age** Geoffrey Till, 1982 **The Navy of the Nuclear Age, 1947-2007**, 2008 **United States Conventional Naval Strategy in the Nuclear Age** William Ralph Swan, 1972 **The Role of Sea Power in a Nuclear - Thermo Nuclear Age** Finis G. Johnson, 1963 **American Strategy for the Nuclear Age** Walter F. Hahn, John C. Neff, 1960 *A Soviet Navy for the Nuclear Age* Kime Steve F., 1980

Though the Imperial Russian Navy had some glorious moments and the modern Soviet Navy has become ever more visible, naval power has never played a primary role in either the Russian or the Soviet scheme of nationhood. The Soviet Navy is only part of a vast, highly integrated array of continental and intercontinental military power, and Soviet military power is viewed by Soviet leaders as merely a single element of a broad correlation of political, economic and military forces in the world. There is no question, however, that military power is critical in this Soviet view of the world and that the Soviet Navy has managed to flourish.
