Jean Sibelius and His World Daniel M. Grimley, 2011-08-08 New perspectives on the greatest Finnish composer of all time Perhaps no twentieth century composer has provoked a more varied reaction among the music loving public than Jean Sibelius 1865 1957 Originally hailed as a new Beethoven by much of the Anglo Saxon world he was also widely disparaged by critics more receptive to newer trends in music At the height of his popular appeal he was revered as the embodiment of Finnish nationalism and the apostle of a new musical naturalism Yet he seemingly chose that moment to stop composing altogether despite living for three more decades Providing wide cultural contexts contesting received ideas about modernism and interrogating notions of landscape and nature *Jean Sibelius and His World* sheds new light on the critical position occupied by Sibelius in the Western musical tradition The essays in the book explore such varied themes as the impact of Russian musical traditions on Sibelius his compositional process Sibelius and the theater his understanding of music as a fluid and improvised creation his critical reception in Great Britain and America his late style in the incidental music for *The Tempest* and the parallel contemporary careers of Sibelius and Richard Strauss Documents include the draft of Sibelius's 1896 lecture on folk music selections from a roman clef about his student circle in Berlin at the turn of the century Theodor Adorno's brief but controversial tirade against the composer and the newspaper debates about the Sibelius monument unveiled in Helsinki a decade after the composer's death The contributors are Byron Adams Leon Botstein Philip Ross Bullock Glenda Dawn Goss Daniel Grimley Jeffrey Kallberg Tomi Mäkelä Sarah Menin Max Paddison and Timo Virtanen

American Design in the Twentieth Century Gregory Votolato, 1998 Author Greg Votolato presents the intricate story of how design evolved as a profession and a leisure activity Votolato demonstrates that design in affluent American culture is as much about personalization of the material world as it is about the performance and appearance of manufactured goods 114 illustrations

Integrated Architecture Liangyong Wu, 2013-12-01 Integrated Architecture is both a historical and contemporary work The book was first published in 1989 by Wu Liangyong one of contemporary China's most influential architects and theoreticians with the title *A General Theory on Architecture* His eminence is also recognised by the international architectural community above all the group of architectural and urban planning theoreticians battling for a more decisive reform to the concepts methodologies and practices presiding over the construction and requalification of the contemporary metropolis First met professor Wu Liangyong in 2005 at the Faculty of Architecture at the Tsinghua University of Beijing his Faculty Wu Liangyong founded the school in 1949 at the age of 24 together with Liang Sicheng the father of modern Chinese architectural studies From this moment more than sixty seven years ago professor Liangyong has remained a central figure in Beijing's academic community He remains a constant source

of inspiration not only national to education reforms and above all theoretical methodological and operative research into architecture the city and the territory He is a rare figure present throughout a lengthy historical period witness the world over to tumultuous upheavals in society and its cities A period whose most dramatic and exalting manifestations were perhaps to be found in China a period of war of hope of revolutions of great leaps forward of presumptions horrors errors new leaps forward and incomprehensible economic growth of irreversible social and cultural metamorphoses and what interests us most as architects of staggering urban growth and territorial transformations The intellect of this minute and genteel figure held fast against the storms of history The observation of events and the humanist and scientific principles of his personal culture continuously nourished an increasingly more effective reflection on the meaning of architecture in today's world He also clearly saw its inextricable ties to the substance of the city and the impossibility to substitute the figure of the architect scientist humanist and artist A few years after our meeting having absorbed direct lessons from Wu's work as an architect and theoretician I proposed an Italian translation of an anthology of his writings The material was to be drawn from his many books and essays on architecture and the city published continuously over the course of his incomparable career Professor Wu Liangyong responded with a challenge in lieu of this anthology of texts he proposed a full translation in Italian and English of a book published twenty years ago 1989's *A General Theory on Architecture* Given the pace of cultural debate it would not have been out of place to imagine a book firmly sedimented in history I understood instead that it was a milestone in the expression of Wu Liangyong's ideas a benchmark that in all likelihood served as the starting point for his later theories even the most recent Published in other fundamental essays they range across the vast field of human settlements touching on all components of the man-made environment Lucio Valerio Barbera **"Craft, Space and Interior Design, 1855-2005"**

Sandra Alföldy, 2017-07-05 Constructed space is defined by its shape by the materials with which it is enclosed and by the objects that are placed within or decorate its exterior or interior The interaction of these crafted objects or decorated surfaces with space provides viewers or inhabitants with visual clues about the environment as well as visual cues about decorum viewers can know what kind of behaviour is expected and what the space means Furnishings and dress textile panels and clay pots stained glass and gesso panels all defined as craft or decorative art give architectural space defined as high art its character without craft architecture is empty and devoid of meaning This engaging collection of essays presents the first sustained exploration of the relationship of craft to architectural spaces The book unravels the complex ways in which craft controls manipulates organises and defines space to highlight how the relationship between craft and space can be understood as a form of communication between related parts that combine to form a unified whole Mid-Century Modern Interiors Lucinda Kaukas Havenhand, 2019-01-24 Mid-Century Modern Interiors explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design's most globally important designers it also saw

the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history

The Dome and the Rock James Baird, 2020-03-03 Originally published in 1968 In The Dome and the Rock Structure in the Poetry of Wallace Stevens James Baird traces the process of Wallace Stevens's Grand Poem and the total structure that it accomplished in language In the words of Professor Baird The full art of Stevens is organized with architectural precision The shape of the mind becomes a building the framework of which is founded in a willed symmetry of design In The Dome and the Rock James Baird exposes the capacity of Wallace Stevens to design his poetry in a manner similar to an architect and he reveals the craftsmanship of Wallace's acts as builder

Architecture in Michigan Wayne Andrews, 1982 A pictorial survey of Michigan architecture from 1831 to the present Architecture in Michigan a pictorial survey of Michigan architecture from 1831 to the present explores the architecture of Detroit and many other cities towns and villages Here is Romantic Michigan before the Civil War with dozens of examples of Greek Gothic and Italian villas from Grosse Ile to Grass Lake Tecumseh and Ypsilanti as well as Gothic churches Then there is Glorious Michigan of the exuberant 1870s and 1880s when architects evoked the Paris of the Second Empire and the doctrine of John Ruskin cast its peculiar spell And Discreet Michigan when the wealthy following the lead of the Vanderbilts in New York revived the Renaissance as the proper style for Michigan dynasties And finally Modern Michigan with Albert Kahn the greatest factory architect in history Eliel and Eero Saarinen the talented Finns the time when the buildings of modern Michigan began to acquire an international reputation The expanded text of this unique book dips deep into Michigan history covering every generation since Michigan entered the Union in 1837
