**Jacques Crovisier, Thérèse Encrenaz**

## Searching For Comets:

Searching for Comets Louis Brewer Hall, 1990 Using the missions to explore the phenomenon of Halley's Comet the author gives us a look at the science of the study of comets      *David Levy's Guide to Observing and Discovering Comets* David H. Levy, 2003-05-15 David Levy has held a lifelong passion for comets and is one of the most successful comet discoverers in history In this book he describes the observing techniques that have been developed over the years from visual observations and searching to photography through to electronic charge coupled devices CCDs He combines the history of comet hunting with the latest techniques showing how our understanding of comets has evolved over time This practical handbook is suitable for amateur astronomers from those who are casually interested in comets and how to observe them to those who want to begin and expand an observing program of their own Drawing widely from his own extensive experience Levy describes how enthusiastic amateurs can observe comets and try to make new discoveries themselves David H Levy is one of the world's foremost amateur astronomers He has discovered seventeen comets seven using a telescope in his own backyard and had a minor planet Asteroid 3673 Levy named in his honor He is best known as the co discoverer of the famous 1994 Shoemaker Levy 9 comet Levy is frequently interviewed in the media and succeeded Carl Sagan as science columnist for Parade magazine He has written and contributed to a number of books most recently David Levy's Guide to the Night Sky Cambridge 2001      COMETS! David J. Eicher, 2013-09-23 Practical guide to the history and science of comets including techniques and tips on how to observe and image them      The Quest for Comets David H. Levy, 2013-11-11 The brilliant trailing beauty of fiery comets has inspired fear wonder and awe since the dawn of human history Brighter than stars moving and disappearing in their own singular orbits comets have been among the most mysterious elements in the sky eluding our understanding until very recently With the aid of space probes scientists have discovered that these swiftly moving chunks of ice and carbon are more plentiful and far more dangerous than suspected Scientists are also beginning to realize the monumental role played by comets in the development of the Earth and solar system David Levy describes in dramatic detail the thrilling yet often devastating effects of comet collisions In the dawn of our solar system the Earth was barraged with comets that may have carried the materials necessary to lay the foundations for life on this planet Levy also presents compelling evidence for later comet collisions including those of the age of dinosaurs Great impacts Levy asserts not only caused the extinction of the dinosaurs but ushered in new species of life As Levy so clearly explains scientists are realizing that comet collisions are virtually inevitable Levy reveals possible future collisions with the Earth and describes the terrible risks to life they would pose He even shows how we might prepare to withstand the impact of large comets in the future

**Observing Comets, Asteroids, Meteors, and the Zodiacal Light** Stephen J. Edberg, David H. Levy, 1994-10-06 When can you see fireballs and who should you contact if you spot one When is it best to hunt for comets and meteors and whereabouts How do you gauge the size of the coma in the head of a comet and estimate its degree of condensation Clear

and easy to use this guide shows you how to make successful and valuable observations and records of comets asteroids meteors and the zodiacal light For each topic the historical background and current scientific understanding support a wealth of observational techniques Comet observers are shown techniques for search and discovery They can learn how to make visual estimates of brightness and size and how to make photographic studies of cometary heads and tails Asteroid hunters will find a life list of quarry and guidelines on how to search for these objects and then how to photograph or electronically image them Fruitful photographic and electronic methods for studying meteors and meteor showers are provided Visual and photographic techniques show you how to examine the often elusive zodiacal light The more adventurous are provided with advanced techniques on how to make successful astrometric spectroscopic and electronic observations This is rounded off with an invaluable list of centres world wide to contact with your details of unusual sightings

*Searching the Stars* Marilyn B Ogilvie, 2011-11-08 Caroline Herschel is best known as the less significant sister of the astronomer William Herschel Yet the romantic notion of her tirelessly working for her brother while he made his studies of the heavens documenting his discoveries so he could achieve greatness in the scientific world couldn't be further from the truth When Caroline wasn't working as her brother's assistant she was sweeping the stars with her own small telescope given to her by William Not only did she unearth three important nebulae but she discovered no fewer than eight comets in her own right When William became Astronomer Royal to King George III in 1782 Caroline too received an annual salary making her the first ever woman to work as a professional scientist William was made a fellow of the Royal Society in 1781 after discovering the planet Uranus It wasn't until 1828 but the Society would eventually reward Caroline too with its Gold Medal This award would not be awarded to another woman until 1996 This fascinating biography of one of our most outstanding scientists reveals the hardships experienced by a woman pursuing a male profession Yet how did this unattractive diminutive woman gain the respect of her professional colleagues her country and even her king As Marilyn B Ogilvie investigates this extraordinary life the determination humility and passion of one unremarkable woman come to light

*The Observatory*, 1883 A review of astronomy varies [Cosmic Discoveries](#) David H. Levy, 2010-09-09 For many millennia the starry night sky has been a source of wonder and awe to men and women who have tried to unravel the mystery of the billion distant lights that fill the heavens after dark The story of the great discoverers who succeeded in explaining part of the mystery is told here with the joy and infectious enthusiasm that only a fellow discoverer can convey David Levy codiscoverer of Comet Shoemaker Levy 9 with his wife Wendee Wallach Levy evokes that marvelous moment of Eureka as he masterfully relates each story He gives the reader a glimpse of the enthralling adventure of cosmic discovery through stories of the most famous and brilliant astronomers Beyond their personal accomplishments these scientists expanded all of humanity's understanding of the universe and our place within it For example Galileo's breathtaking discovery of the moons of Jupiter new worlds that refused to orbit the sun challenged the whole doctrine of the earth being the center of the universe

With the start of the 20th century Shapley pushed back the envelope that had been opened by Galileo by proving that the center of our galaxy is very far beyond our own sun And Hubble showed that even our galaxy is but a tiny part of a universe that is rapidly expanding In describing these milestones of science Levy reveals his own spirited conversations with such luminaries of the imagination as the discoverer of the planet Pluto Clyde Tombaugh and one of the world s greatest science fiction writers Sir Arthur C Clarke Through Levy s unique perspective on cosmic discovery he is able to connect his own personal life story with that of astronomers of the past and by extension with the history of the whole universe As the codiscoverer of the spectacular comet that crashed into Jupiter Levy formulated a whole new range of exciting questions about the universe Do comets serve to transport the elements of life from one planet to the next What is the evidence that a large comet once hit the earth Will the earth someday be in danger of colliding with another such comet and will we have the technology to stop it This fascinating book will excite any of us who have stared at the night sky in awe and amazement David Levy and Wendee Wallach Levy Vail AZ are continuing their ongoing search for new comets David Levy is the president of the Jarnac Observatory science editor for PARADE magazine a contributing editor to Sky and Telescope and Sky News magazines and the author of *Starry Nights The Quest for Comets and Impact Jupiter* among other books [Journal](#)

Astronomical Society of Southern Africa,1925 **The Journal of the Astronomical Society of South Africa** Astronomical Society of Southern Africa,1925 *Encyclopedia of Astronomy & Astrophysics* P Murdin,2001-01-01 In a unique collaboration Nature Publishing Group and Institute of Physics Publishing have published the most extensive and comprehensive reference work in astronomy and astrophysics This unique resource covers the entire field of astronomy and astrophysics and this online version includes the full text of over 2 750 articles plus sophisticated search and retrieval functionality and links to the primary literature The Encyclopaedia s authority is assured by editorial and advisory boards drawn from the world s foremost astronomers and astrophysicists This first class resource is an essential source of information for undergraduates graduate students researchers and seasoned professionals as well as for committed amateurs librarians and lay people wishing to consult the definitive astronomy and astrophysics reference work **Getting Acquainted with Comets** Robert Shirley Richardson,1967 [Comet Science](#) Jacques Crovisier,Thérèse Encrenaz,2000-03-09 This book provides a comprehensive overview of our current knowledge of comets It presents a fascinating survey of the study of comets throughout history from antiquity to the present day and includes the most recent discoveries on the exceptional comets Hale Bopp and Hyakutake The authors discuss the role of comets in the formation of our Solar System and describe the links between comets asteroids and the recently discovered Kuiper belt objects The book also includes new insights into the composition and nature of cometary nuclei with results from the most up to date observation techniques Written in a clear and lively style and beautifully illustrated this book will appeal to anyone interested in comets and astronomy professionals and amateurs alike It will be of particular interest to students and researchers in

astronomy astrophysics and planetary science as well as general readers with a good background in physics

**The Scientific Papers of Sir William Herschel** William Herschel, 1912

**First Light** Richard Preston, 2012-04-04 Seven years before Richard Preston wrote about horrifying viruses in *The Hot Zone* he turned his attention to the cosmos In *First Light* he demonstrates his gift for creating an exciting and absorbing narrative around a complex scientific subject in this case the efforts by astronomers at the Palomar Observatory in the San Gabriel Mountains of California to peer to the farthest edges of space through the Hale Telescope attempting to solve the riddle of the creation of the universe Richard Preston's name became a household word with *The Hot Zone* which sold nearly 800 000 copies in hardcover was on *The New York Times*'s bestseller list for 42 weeks and was the subject of countless magazine and newspaper articles Preston has become a sought after commentator on popular science subjects

**From Cave Art to Hubble** Jonathan Powell, 2019-11-20 Since ancient times humans have been engaged in a continual quest to find meaning in and make sense of sights and events in the night sky Cultures spread around the world recorded their earliest efforts in artwork made directly on the natural landscapes around them and from there they developed more and more sophisticated techniques for observing and documenting astronomy This book brings readers on an astronomical journey through the ages offering a history of how our species has recorded and interpreted the night sky over time From cave art to parchment scribe to modern X ray mapping of the sky it chronicles the ever quickening development of tools that informed and at times entirely toppled our understanding of the natural world Our documentation and recording techniques formed the bedrock for increasingly complex forays into astronomy and celestial mechanics which are addressed within these chapters Additionally the book explores how nature itself has recorded the skies in its own way which can be unraveled through ongoing geological and archaeological studies This tale of human discovery and ingenuity over the ages will appeal to anybody interested in the field of astronomy and its rich cultural history

## Decoding **Searching For Comets**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its power to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Searching For Comets**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
